Everyone has a fantasy, whether it's having sex in a public place, spanking or being spanked, having a chick with a dick, a male being f\*\*\*\*d anally with a strap-on by a woman, a woman who is bi-curious, or even a grown man dressing up as a baby and being cared for by an older woman. Yep, I've acted out all those fantasies... well on the phone. I must say though, my sex life certainly has become interesting, to say the least. One thing I have learned while being Phone Sex Operator is what men and women

want. In this book, I will not only explain some of the terminology that a Phone Sex Operator (from now on I will call her/him a PSO) needs to know and my experiences over the years as one.

**Mobile Multimedia Processing** Xiaoyi Jiang, Matthew Y. Ma, Chang Wen Chen, 2010-03-25 The portable device and mobile phone market has witnessed rapid growth in the last few years with the emergence of several revolutionary products such as mobile TV, converging iPhone and digital cameras that combine music, phone and video functionalities into one device. The proliferation of this market has further benefited from the competition in software and applications for smart phones such as Google's Android operating system and Apple's iPhone App-Store, stimulating tens of thousands of mobile applications that are made available by individual and enterprise developers. Whereas the mobile device has become ubiquitous in people's daily life not only as a cellular phone but also as a media player, a mobile computing device, and a personal assistant, it is particularly important to address challenges timely in applying advanced pattern recognition, signal, information and multimedia processing techniques, and new emerging networking technologies to such mobile systems. The primary objective of this book is to foster interdisciplinary discussions and research in mobile

multimedia processing techniques, applications and systems, as well as to provide stimulus to researchers on pushing the frontier of emerging new technologies and applications. One attempt on such discussions was the organization of the First International Workshop of Mobile Multimedia Processing (WMMP 2008), held in Tampa, Florida, USA, on December 7, 2008. About 30 papers were submitted from 10 countries across the USA, Asia and Europe.
