Gas Turbine Handbook Tony Giampaolo,2020-11-26 Newly revised, this new fifth edition includes a chapter on waste heat recovery and discusses this technology in detail including a the advantages and barriers to waste heat recovery, environmental restraints, thermodynamics of heat recovery, fluid properties, boiler, condensers, steam turbines, off design behavior and exhaust catalyst. This book shows how microturbine designs rely heavily on the centrifugal compressor and are, in many aspects, similar to the early flight engines and will illustrate how the approach of the microturbine designer is to minimize cost.

Directory of Wood-framed Building Deconstruction and Reused Building Materials Companies, 2004 Robert H. Falk,2004 This is a directory of companies involved in wood-framed building deconstruction, dismantling and reused building materials, with an emphasis on those that use, resell, and/or re-manufacture salvaged wood. Companies in this directory range in scope from those that carryout targeted building removals, such as historic barns, strictly for the purpose of harvesting the antique wood in these buildings, to companies that conduct residential and commercial demolition where the primary goal is building removal, and the recovery of materials is conducted opportunistically as a by-product. The bulk of companies listed are those that either salvage or sell building materials. For ease of use, the directory lists companies two ways, alphabetically by state and then alphabetically by company type, and alphabetically by company type and then alphabetically by state.
