September's Camera Jeffrey Scarborough, 2007-03-26 Jeff Scarborough was the only cameraman on duty at WNBC's newsroom in New York when the attacks of 9/11 began. Armed with privileged information from the '93 attack on the World Trade Center-realizing both towers were doomed-Jeff pulled out of an emergency convoy just short of the WTC as he and reporter Rob Morrison approached the burning towers. Taking charge at the scene, Jeff ordered live-truck engineer Eddie Alonzo to stay 500 feet away and told all responding crews to back-off-dangerously becoming NBC's sole cameraman broadcasting live from Ground Zero. He permitted only the live-shot reporter to join him at his camera position-and during their live broadcast, the South Tower collapsed. They ran for their lives; Jeff rescued Eddie and stayed to videotape the panic and the North Tower collapse. September's Camera is the story of that fateful day, and of a career lived on the edge of danger-as Jeff's lens captured conflict, urban riots, blackouts, serial killers, plane crashes and human frailty in all its forms.

A New Literacies Sampler Michele Knobel, Colin Lankshear, 2007 The study of new literacies is quickly emerging as a major research field. This book «samples» work in the broad area of new literacies research along two dimensions. First, it samples some typical examples of new literacies - video gaming, fan fiction writing, weblogging, role play gaming, using websites to participate in affinity practices, memes, and other social activities involving mobile technologies. Second, the studies collectively sample from a wide range of approaches potentially available for researching and studying new literacies from a sociocultural perspective. Readers will come away with a rich sense of what new literacies are, and a generous appreciation of how they are being researched.

The Predictive Retailer Andrew Pearson, 2017-10-23 The Predictive Retailer is a retail company that utilizes the latest technological developments to deliver an exceptional personalized experience to each and every customer. Today, technology such as AI, Machine Learning, Augmented Reality, IoT, Real-time stream processing, social media, and wearables are altering the Customer Experience (CX) landscape and retailers need to jump aboard this fast moving technology or run the risk of being left out in the cold. The Predictive Retailer reveals how these and other technologies can help shape the customer journey. The book details how the five types of analytics--descriptive, diagnostic, predictive, prescriptive, and edge analytics--affect not only the customer journey, but also just about every operating function of the retailer. An IoT connected retailer can make its operations smart. Connected devices can help with inventory optimization, supply chain management, labor management, waste management, as well as keep the retailer's data centers green and its energy use smart. Social media is no longer a vanity platform, but rather it is a place to both connect with current customers as well as court new ones. It is also a powerful branding channel that can be utilized to both understand a retailer's position in the market, as well as a place to benchmark its position against its competitors. Today, technology moves at break-neck speed and it can offer the potential of anticipatory capabilities, but it also comes with a confusing variety of technological terms--Big Data, Cognitive Computing, CX, Data Lakes, Hadoop, Kafka, Personalization, Spark, etc., etc. The Predictive Retailer will help make sense of it all, so that a retail executive can cut through the confusing technological jargon and understand why a Spark-based real-time stream processing data stream might be preferable to a TIBCO Streambase one, or an IBM Streaming Analytics one. This book will help retail executives break through the technological clutter so that they can deliver an unrivaled customer experience to each and every patron that comes through their doors.

Solving the Homework Problem by Flipping the Learning Jonathan Bergmann, 2017-04-11 Teachers view homework as an opportunity for students to continue learning after the bell rings. For many students, it's often just the dreaded "H" word. How can educators change the way students view homework while ensuring that they still benefit from the additional learning it provides? It's easy. Flip the learning! In *Solving the Homework Problem by Flipping the Learning*, Jonathan Bergmann, the co-founder of the flipped learning concept, shows you how. The book outlines why traditional homework causes dread and frustration for students, how flipped learning—completing the harder or more analytical aspects of learning in class as opposed to having students do it on their own—improves student learning, and how teachers can create flipped assignments that both engage students and advance student learning. Bergmann introduces the idea of flipped videos, and provides step-by-step guidance to make them effective. The book also includes useful forms, a student survey, and a sample letter to send to parents explaining the flipped learning concept. You want your students to learn, and your students want learning to be accessible. With that in mind, read through these pages, flip the learning in your classroom, and watch students get excited about homework!

Midlife Elinor Carucci, 2019-10-08 From acclaimed photographer Elinor Carucci, a vivid chronicle of one woman's passage through aging, family, illness, and intimacy. It is a period in life that is universal, at some point, to everyone, yet in our day-to-day and cultural dialogue, nearly invisible. *Midlife* is a moving and empathetic portrait of an artist at the point in her life when inexorable change is more apparent than ever. Elinor Carucci, whose work has been collected in the previous acclaimed volumes *Closer* (2002, 2009) and *Mother* (2013), continues her immersive and close-up examination of her own life in this volume, portraying this moment in vibrant detail. As one of the most autobiographically rigorous photographers of her generation, Carucci recruits and revisits the same members of her family that we have seen since her work gained prominence two decades ago. Even as we observe telling details--graying hair, the pressures and joys of marriage, episodes of pronounced illness, the evolution of her aging parents' roles as grandparents, her children's increasing independence--we are invited to reflect on the experiences that we all share contending with the challenges of life, love, and change.

One Place after Another Miwon Kwon, 2004-02-27 A critical history of site-specific art since the late 1960s. Site-specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality. Throughout the 1970s and 1980s, as site-specific art intersected with land art, process art, performance art,

conceptual art, installation art, institutional critique, community-based art, and public art, its creators insisted on the inseparability of the work and its context. In recent years, however, the presumption of unrepeatability and immobility encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces. *One Place after Another* offers a critical history of site-specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many permutations. Informed by urban theory, postmodernist criticism in art and architecture, and debates concerning identity politics and the public sphere, the book addresses the siting of art as more than an artistic problem. It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism. The book addresses the work of, among others, John Ahearn, Mark Dion, Andrea Fraser, Donald Judd, Renee Green, Suzanne Lacy, Inigo Manglano-Ovalle, Richard Serra, Mierle Laderman Ukeles, and Fred Wilson.
