*Technology and Digital Initiatives* Juilee Decker,2015-07-09 Technology and Digital Initiatives: Innovative Approaches for Museums discloses the ways in which technology is used as a means of communicating with visitors through podcasts, apps, websites, and blogs; as an educational enhancement through off-site e-learning and onsite participation at interactive kiosks; and as non-site-based experiences through collaborative initiatives providing open access to collections worldwide. This book offers ten case studies that address technology and digital initiatives from the perspective of initiators and consumers. Each of the chapters consider the use of technology in as a means of communicating with visitors through apps, websites, and other online resources used onsite and off-site. For example, strategies of museums detailed on a global level by Jane Alexander and Elizabeth Bolander of The Cleveland Museum of Art and Sree Sreenivasan of The Metropolitan Museum of Art. Alexander and Bolander walk us through the creation of a digital roadmap, a digital vision that links the museum's mission and strategic plans to the needs of its constituencies. Sree contends that museums can lead the way with innovation in the digital sector. And he offers lessons from his experience at the Met that might provide guidelines for your work and your museum. The Innovative Approaches for Museums series offers case studies, written by scholars and practitioners from museums, galleries, and other institutions, that showcase the original, transformative, and sometimes wholly re-invented methods, techniques, systems, theories, and actions that demonstrate innovative work being done in the museum and cultural sector throughout the world. The authors come from a variety of institutions—in size, type, budget, audience, mission, and collection scope. Each volume offers ideas and support to those working in museums while serving as a resource and primer, as much as inspiration, for students and the museum staff and faculty training future professionals who will further develop future innovative approaches. Contributions by: Jane Alexander, Elizabeth Bolander, Elizabeth Botten, Gareth Brereton, Nancy E. V. Bryk, Stephen J. Bury, Duygu Camurcuoglu, Kimberly Christen, John Dallwitz, Birger Ekornåsvåg Helgestad, Jennifer E. Henel, Kelly Quinn, Sree Sreenivasan, Jonathan Taylor, Sabra Thorner, Rihoko Ueno, and Heather Marie Wells

Markets in Fashion Patrik Aspers,2012-10-02 Interest in contemporary cultural industries has grown in the past decade, as they take on a greater significance in our increasingly consumer-led society. Focusing on the world of fashion photography, this book

presents an interdisciplinary approach in which this and other aesthetic markets, such as advertising, modelling, art, music and more, can be viewed. The main thrust of this groundbreaking book, is in developing a theory for these cultural markets, characterized by insecurity, and where status and aesthetic diversity generate order and price differentiation. In these industries, services and products are offered that are a mix of the aesthetic and the economic, and for fashion photographers such as those studied here, it is necessary to carefully position themselves in the market by developing unique photographic styles and separating themselves from competitors. Yet the markets in which these industries operate differ from the type of exchange markets depicted by neoclassical economists, and therefore cannot be considered using such modes of analysis. Instead Aspers conducts his study using empirical phenomenology, an original approach presented here for the first time, which can be easily used in other empirical studies. He draws on original empirical material; participant observation and interviews generated in New York and Stockholm; which bring a depth of analysis and a relevance to this book which academics, researchers and those with a vested interest in such industries will value. Written by one of the world's brightest young economic sociologists, this fascinating book (previously published in Sweden and enthusiastically received) is endorsed by recognized industry authorities. A noteworthy book, it provides a foothold in the burgeoning sub discipline of economic sociology, and a significant analysis of the economics of the fashion photography industry.
