Image Brokers Zeynep Devrim Gursel,2016-04-12 Image Brokers is an in-depth ethnography that reveals the labor and infrastructure behind news images and how they are circulated. Zeynep Devrim Geursel presents an intimate look at the ways image brokers--the people who manage the distribution or restriction of images--construct and culturally mediate the images they circulate. Through this framework, news images become commodities that impact how politics and culture are visualized in the world. Set against the backdrop of the War on Terror and based on fieldwork conducted at the photojournalism industry's centers of power in New York and Paris, Image Brokers explores the transition from analog to digital technologies and shows how new digital and social media platforms continue to change photojournalism and create ever-widening distribution networks. The book is a powerful investigation of the processes of decision-making amid the changing infrastructures of representation.--Provided by publisher.

*William Cameron Menzies* James Curtis,2015 He was the consummate designer of film architecture on a grand scale. He was known for his visual flair and timeless innovation, a man who meticulously preplanned the color and design of each film through a series of continuity sketches that made clear camera angles, lighting, and the actors' positions for each scene, translating dramatic conventions of the stage to the new capabilities of film. Here is the long-awaited book on William Cameron Menzies, Hollywood's first and greatest production designer, a job title David O. Selznick invented for Menzies' extraordinary, all-encompassing, Academy Award-winning work on *Gone With the Wind* (which he effectively co-directed). It was Menzies--winner of the first-ever Academy Award for Art Direction, and who was as well a director (fourteen pictures) and a producer (twelve pictures)--who changed the way movies were (and still are) made, in a career that spanned four decades, from the 1920s through the 1950s. Now, James Curtis, acclaimed film historian and biographer, writes of Menzies' life and work as the most influential designer in the history of film. Interviewing colleagues, actors, directors, friends, and family, and with full access to the Menzies

family collection of artwork and unpublished writing, Curtis gives us the path-finding work of the movies' most daring and dynamic production designer: his evolution as artist, art director, production designer, and director. Here is a portrait of a man in his time that makes clear how the movies were forever transformed by his startling, visionary work.--Adapted from book jacket.

**Death and the Lottery Family** James D. Beeson, MD, 2013-06 Death in the Recovery Room is a tale of an underachieving family, one member of which wins the Florida State Lottery. The story weaves in and out of the members' lifestyles, depicting the major changes attendant to the windfall. Casualties occur along the way.

*Race and Photography* Amos Morris-Reich, 2016-01-11 Historian Amos Morris-Reich here tracks the trajectory of racial photography from 1876 through the Weimar and Nazi periods in Germany and, briefly, after WWII. With a particular focus on German and Jewish contexts, *Race and Photography* reveals the important role of racial photography within academic discourse on race. Photography was not simply a medium of illustration but rather it was a conduit for new forms of visual perception. Approaching the history of racial photography from an epistemic point of view raises questions concerning the similarity and specific difference of photography compared with other scientific media, and makes explicit the scientific and cultural assumptions in which different uses of photography were embedded. Paying particular attention to the effect of photography on concepts of visual perception and also to the intricate relationship between racial photography and the imagination, Morris-Reich examines numerous scientists and scholars, both prominent and obscure, who developed photographic methods for the study of race or made methodical use of photography for its study. His careful reconstruction of individual cases, conceptual genealogies, and emergent patterns points to transformations in the scientific status of photography throughout the late nineteenth and early twentieth centuries and uncovers the agency of photographic media in the history of scientific racism. This work makes a distinctive contribution to the fields of history of science, history of photography, intellectual history, European and Jewish history, and the history of race.
