The Story of the Jewish People Martin Gilbert,2014-06-05 A history of Judaism written in letters from historian Martin Gilbert to his acquaintance in India, who wants to learn more about her ancestry. At her ninetieth birthday celebration in New Delhi, "Auntie Fori" revealed to her longtime acquaintance, Sir Martin Gilbert, that she was not of Indian birth but actually Hungarian—and Jewish. She did not know what this Jewish identity involved, historically or spiritually, and asked him to enlighten her. In response, Gilbert embarked on the series of letters that have been gathered to form this book, shaping each one as a concise, individually formed story. He presents Jewish history as the narrative expression—the timeline—of the Jewish faith, and the faith as it is informed by the history. In Sir Martin's hands, these stories are rich in incident and achievement, starting with Adam and Eve through the Biblical and post-Biblical periods, to the long history of the Jews in the Diaspora, and ending with an unexpected visit to an outpost of Jewry in Anchorage, Alaska. Ranging through almost every country in the world—including China and India—he maintains a chronological structure, weaving in the history of other peoples and faiths, to give Auntie Fori, and us, a sense of the larger stage on which Jewish history has played out. "Compact, breezy, and thoroughly enjoyable . . . For those, like Auntie Fori, hoping to understand the Jewish past and present, this book is a treasure." —Booklist

In Search of Lost Frogs Robin Moore,2014-09-11 The story of an expedition in search of the world's rarest and most exotic amphibians. On August 9, 2010, 33 teams from 21 countries were dispatched to search for the Lost Frogs identified by Conservation International. On their list were a host of species including, in the top ten most wanted, the Rio Pescado Stubfoot Toad, found only in Ecuador - which was to prove a triumphant rediscovery. Several months, a number of key rediscoveries - such as the Elegant Tropical Frog, last seen in 1937 and the Chalazodes Bubble-nest Frog - last seen in 1874 and two new species later, the Search for Lost Frogs had generated more than 650 news articles in 20 countries and over a billion potential viewers. Author Robin Moore was responsible for spearheading the Search for Lost Frogs and coordinating the teams. He also co-led two expeditions to Colombia and Haiti. In Colombia in search of the Mesopotamia Beaked Toad, the steamy jungles of the Choco yielded not the desired species but a brand new one - the Mr. Burns Toad, so-called because of an uncanny resemblance to the Simpsons' character; the species was selected as one of Time magazine's top ten new species of 2010. In Haiti the team found six frogs last seen 20 years before, including the Ventriloqual Frog, named for its ability to throw its voice. This fascinating new book tells the story of the expedition - its highs and lows, discoveries and failures and the campaign's ongoing work. Despite the campaign, one third of the world's amphibians remain threatened with extinction. Most of the species searched for were not found. But those that were provide a glimmer of hope. Understanding why these species have survived when many others have not should help us understand what makes these species different. In Search of Lost Frogs is a story of perseverance, disappointment, rediscovery, resilience, but ultimately of hope, written with passion and illustrated with the author's superb photographs.

Taste Makers: Seven Immigrant Women Who Revolutionized Food in America Mayukh Sen,2021-11-16 A New York Times Editors' Choice pick Named a Best Book of the Year by NPR, Los Angeles Times, Vogue, Wall Street Journal, Food Network, KCRW, WBUR Here & Now, Emma Straub, and Globe and Mail One of the Millions's Most Anticipated Books of 2021 America's modern culinary history told through the lives of seven pathbreaking chefs and food writers. Who's really behind America's appetite for foods from around the globe? This group biography from an electric new voice in food writing honors seven extraordinary women, all immigrants, who left an indelible mark on the way Americans eat today. Taste Makers stretches from World War II to the present, with absorbing and deeply researched portraits of figures including Mexican-born Elena Zelayeta, a blind chef; Marcella Hazan, the deity of Italian cuisine; and Norma Shirley, a champion of Jamaican dishes. In imaginative, lively prose, Mayukh Sen—a queer, brown child of immigrants—reconstructs the lives of these women in vivid and empathetic detail, daring to ask why some were famous in their own

time, but not in ours, and why others shine brightly even today. Weaving together histories of food, immigration, and gender, Taste Makers will challenge the way readers look at what's on their plate—and the women whose labor, overlooked for so long, makes those meals possible.

Stereoscopic Cinema and the Origins of 3-D Film, 1838-1952 Ray Zone, 2014-04-23 From stereoview cards to large-format IMAX films, 3-D technology's heightened realism and powerful visual allure have held audiences captive for over a century and a half. The technology, known as stereoscopy, creates an illusion of depth by presenting two slightly different images to the eye in print or on-screen. The advent of stereoscopic film technology excited both filmmakers and audiences, as a means of replicating all of the sounds, colors, movement, and dimensionality of life and nature for the first time. The origins of 3-D film are often linked with a proliferation of stereoscopic films in the 1950s. By the time films like *Man in the Dark* and *House of Wax* was attracting large crowds, however, the technology behind this form of filmmaking was already over a century old. *Stereoscopic Cinema and the Origins of 3-D Film, 1838-1952*, examines this novelty period of stereoscopic film, charting its progression from Charles Wheatstone's 1838 discovery of 3-D to the 1952 release of Arch Oboler's innovative film, *Bwana Devil*. Stereoscopic specialist Ray Zone argues that the development of stereoscopic film can best be understood through a historical analysis of the technology rather than of its inventors. Zone examines the products used to create stereoscopic images, noting such milestones as David Brewster's and Oliver Wendell Holmes's work with stereoscopes, the use of polarizing image selection, and the success of twin-strip 3-D films, among others. In addition, Zone looks at the films produced up to 1952, discussing public reception of early 3-D short films as well as longer features such as *Power of Love* in single-strip anaglyphic projection in 1922 and Semyon Ivanov's 1941 autostereoscope *Robinson Crusoe*. He integrates his examination of the evolution of 3-D film with other cinematic developments, demonstrating the connection between

stereoscopic motion pictures and modern film production. Stereoscopic Cinema and the Origins of 3-D Film, 1838--1952, is an exhaustive study of not only the evolution of 3-D technology and the subsequent filmmaking achievements but also the public response to and cultural impact of 3-D movies. Zone takes the reader on a voyage of discovery into the rich history of a field that predates photography and that continues to influence television and computer animation today.
