Algae Laura Barsanti, Paolo Gualtieri, 2005-11-14 An exhaustive review on all things algae would require a multi-volume encyclopedic work. The Environment on Stage Julie Hudson, 2019-08-08 *The Environment on Stage: Scenery or Shapeshifter?* investigates a pertinent voice of theatrical performance within the production and reception of ecotheatre. Theatre ecologies, unavoidably enmeshed in the environment, describe the system of sometimes perverse feedback loops running through theatrical events, productions, performances and installations. This volume applies an ecoaware spectatorial lens to explore live theatre as a living ecosystem in a literal sense. The vibrant chemistry between production and reception, and the spiralling ideas and emotions this generates in some conditions, are unavoidably driven by flows of matter and energy, thus, by the natural environment, even when human perspectives seem to dominate. *The Environment on Stage* is an intentionally eclectic mix of observation, close reading and qualitative research, undertaken with the aim of exploring ecocritical ideas embedded in ecotheatre from a range of perspectives. Individual chapters identify productions, performances and installations in which the environment is palpably present on stage, as it is in natural disasters such as floods, storms, famine, conflict and climate change. These themes and others are explored in the context of site-specificity, subversive spectators, frugal modes of narrative, the shifting 'stuff' of theatre productions, and imaginative substitutions. Ecotheatre is nothing less than vibrant matter that lets the environment speak for itself

The Great Art of Light and Shadow Laurent Mannoni,2000 Widely regarded by historians of the early moving picture as the best work yet published on pre-cinema, *The Great Art of Light and Shadow: Archaeology of the Cinema* throws light on a fascinating range of optical media from the twelfth century to the turn of the twentieth. First published in French in 1994 and now translated into English, Laurent Mannoni's account projects a broad picture of the subject area now known as 'pre-cinema'. Starting from the earliest uses of the camera obscura in astronomy and entertainment, Mannoni discusses, among many other devices, the invention and early years of the magic lantern in the seventeenth century, the peepshows and perspective views of the eighteenth century, and the many weird and wonderful nineteenth-century attempts to recreate visions of real life in different ways and forms. This fully-illustrated and accessible account of a strange mixture of science, magic, art and deception introduces to an English-speaking

readership many aspects of pre-cinema history from other European countries.
