An Introduction to Programming in PHP John Rhea,2021-12-04 Start taking down the zombie horde with rapid fire web development programs. This book introduces you to PHP and a wide variety of beginner programming topics like variables, conditional statements, loops and functions. You'll understand the different types of variables available to you and how to create and utilize them for maximum damage to the undead. We'll discuss conditional statements (if/then statements) and talk about how to execute different code depending on whether something is true or not such as "There's a zombie gnawing on your head!" We'll loop-dee-loop around the horde as we define and demonstrate the three kinds of PHP loops. And finally, using functions and reusable code, we'll land sucker punch after sucker punch after sucker punch on every zombie shuffling toward you. While this book presents these concepts using PHP syntax and information, nearly all of the concepts are universal to programming languages everywhere. So come along for a jaunt through the apocalypse and stock your armory with plenty of programming tools and PHP finery. Next stop ending the apocalypse!

Intertextuality in Flavian Epic Poetry Neil Coffee,Chris Forstall,Lavinia Galli Milic,Damien Nelis,2019-12-16 This collection of essays reaffirms the central importance of adopting an intertextual approach to the study of Flavian epic poetry and shows, despite all that has been achieved, just how much still remains to be done on the topic. Most of the contributions are written by scholars who have already made major contributions to the field, and taken together they offer a set of state of the art contributions on individual topics, a general survey of trends in recent scholarship, and a vision of at least some of the paths work is likely to follow in the years ahead. In addition, there is a particular focus on recent developments in digital search techniques and the influence they are likely to have on all future work in the study of the fundamentally intertextual nature of Latin poetry and on the writing of literary history more generally.

Zemiology and Human Trafficking Avi Boukli,2023-12-05 Following the rise of the zemiological movement, the concept of social harm has attracted a great deal of scholarly attention. Using this perspective, a number of scholars have sought to remove the constraining brackets surrounding criminological investigation in order to broaden its legitimate parameters of study and incorporate a wider range of un-criminalized and hidden harms. This book expands the literature on social harm by applying the concept of zemia to human trafficking investigations in Europe, North America, and Africa. This book draws attention not only to various structurally imbedded harms, but also to the wider consequences of such harms. Drawing on a range of international legal cases on trafficking, this book offers a new direction in criminological and zemiological thinking and a reimagining of criminal justice responses to harm.
