### **Queering Contemporary Asian American Art** Laura

Kina, Jan Christian Bernabe, 2017-05-16 Queering Contemporary Asian American Art takes Asian American differences as its point of departure, and brings together artists and scholars to challenge normative assumptions, essentialisms, and methodologies within Asian American art and visual culture. Taken together, these nine original artist interviews, cutting-edge visual artworks, and seven critical essays explore contemporary currents and experiences within Asian American art, including the multiple axes of race and identity, queer bodies and forms, kinship and affect, and digital identities and performances. Using the verb and critical lens of "queering" to capture transgressive cultural, social, and political engagement and practice, the contributors to this volume explore the connection points in Asian American experience and cultural production of surveillance states, decolonization and diaspora, transnational adoption, and transgender bodies and forms, as well as heteronormative respectability, the military, and war. The interdisciplinary and theoretically

informed frameworks in the volume engage readers to understand global and historical processes through contemporary Asian American artistic production.

*Media, Surveillance and Affect* Nicole

Falkenhayner, 2018-12-21 Surveillance has become a part of everyday life: we are surrounded by surveillance technologies in news media, when we go down the street, in the movies, and even carry them in our own pockets in the form of smartphones. How are we constructing imaginaries of our realities and of ourselves as living in structures of control? What affects, emotions and feelings do we develop in societies of control, and how do we narrate them? *Media, Surveillance and Affect* represents a big step in revealing the depth of the entanglement of surveillance technology not only with our everyday lives, but with our imaginaries and affective experiences. Combining insights from affect studies with narratological and visual cultural studies approaches, the case studies in this book focus on how surveillance cameras and surveillance camera images have been used to narrate affective stories of Great Britain. Cases discussed include the memory work surrounding the murder of James Bulger in 1993 and of Lee Rigby in 2011, but also novels and artworks. With a multidisciplinary approach *Media, Surveillance and Affect* will appeal to students, scholars and specialists interested in fields such as media and cultural studies, literary studies, cultural sociology and surveillance studies.

**Fastest, Highest, Strongest** Rob Beamish,Ian Ritchie,2006-09-27 Fastest, Highest, Strongest presents a comprehensive challenge to the dominant orthodoxy concerning the use of performance-enhancing drugs in sport. Examining the political and economic transformation of the Olympic Movement during the twentieth century, the authors argue that the realities of modern sport require a serious reassessment of current policies, in particular the ban on the use of certain substances and practices. The book includes detailed discussion of: \* The historical importance of World War II and the Cold War in the development of a high-performance culture in sport \* The changing Olympic project: from amateurism to a fully professionalized approach \* The changing meaning of sport \* The role of sport science, technology and drugs in pursuing ever-better performance \* The major ethical and philosophical arguments used to support the ban on performance-enhancing substances in sport. Fastest, Highest, Strongest is a profound critical examination of modern sport. Its straightforward style will appeal to under- and post-graduate students as well as scholars of sports ethics and history, policy makers and all those interested in the changing nature of sport.
