Beige Pursuit Sara Magenheimer, 2019-10 Fiction. Poetry. Women's Studies. Art. Film.

Performance Studies. A character called X journeys through a present that is neither here nor there, but feels oddly proximate. She moves through landscapes of words, ever-shifting to host the groundless present, a place and time driven by her motivated, yet contextless pursuit. Narrative is always under construction. The preferred medium for X's peregrinations: a sentence, as capacious as a three-second video, a ten-year nap, or an unexplored hard drive. In this suspended world, X's sensorium is curious and alert, but also anguished, hesitant, and precarious: she feels around for sympathetic energies and familiar faces along the way. Along what way? A book like a body might be a room for waiting, a machine for memory, a sensuous thing, an image quickly glimpsed, a performance still ongoing... You can change your rhythm in order not to panic I learned from BEIGE PURSUIT, a marvel of a book that fuses and transforms various overlapping wildernesses—that of the body subject to transformation, that of the anxiety of our current shared predicaments & the ways that anxiety is fueled to deaden response, & that of the imagination, prone to serious irreverent examination, having to constantly move within its own unfolding in words. X, pregnant, and our guide, is told by talking peonies describing the intimacy gradient that she can't enter her own home, & so it

goes□it being the ordinary blasted bureaucratic temperament of the present. A present Sara
Magenheimer illuminates by amplifying and grounding its absurdities in the daily chaotic filters of
refusal and admission.□Anselm Berrigan Is X pure data? There is mention of her bossy body, but is
that body the whole wide world? The cosmos? The singularity? X is a mother, newly, but more
pressingly, X is a blinking cursor; the promise of a word. X might be predictive text, but she herself is
unpredictable. Is X atmosphere or algorithm? What's the big diff? Are you my (biological) father, the
peonies might ask the mushroom cap, whose answer could be, 'Oh.' Rosemarie Waldrop has lunch in
the ether with Lewis Carroll then meets Renee Gladman on a shopping mall escalator to dish. I trust
this lysergic logic, shimmering through our present din.□Corrine Fitzpatrick

Interactions Werner Dreier,Angelika Laumer,Moritz Wein,2018-07-03 According to estimates, there
are over 100,000 video testimonies with victims of National Socialism. Many of the interview archives
are easily accessed, including some that are available in the Internet for free. While teachers are
hesitant in making use of this treasure of source materials, learners are familiar with the figure of the
eye-witness as communicated via film and television. But what can be taught with the help of what in
cinematographic terms is often criticised as talking heads? What constitutes a good learning setting?
And how do users interact with the - usually digitised - video testimonies and the collections that are
often available online? In January 2017 experienced educators and researchers attended an
international workshop on Localisation of video testimonies with victims of National Socialism in
educational Programmes and discussed the question of what is good practice in this specific form of
educational work. This volume is the result of that process. It provides an insight into the conceptual
and practical ideas on which the various programmes are based. The book also has a focus on video
testimonies presented at historical exhibitions and includes contributions from many countries, such as
Belarus, Canada, Israel, Macedonia, the Netherlands and South Africa.

Writing for Visual Media Anthony Friedmann,2014-06-20 Writing for Visual Media focuses on the
fundamental problems faced by writers beginning to create content for media that is to be seen rather
than read. This book takes the student from basic concepts to a first level of practice through an
explicit method that trains students to consistently identify a communications problem, think it through,
and find a resolution before beginning to write. Through successive exercises, it helps them acquire
the skill and confidence they need to write effective films, corporate and training videos, documentary,
ads, PSAs, tv series and other types of visual narrative. Writing for Visual Media also has a chapter on
writing for interactive media, including promotions, instructional programs, and games. The book

makes the student aware of current electronic writing tools and scriptwriting software through a companion CD-ROM, which offers links to demos and enriches the content of the printed book with video, audio, and sample scripts.

The Book of Joshua ,2005

Wounded Leaders Nick Duffell, 2016-08-24 Political leaders in Britain are consistently drawn from a class born to be educated away from their families in institutions - elite boarding schools. This has a direct effect on their ability to love, to relate, to make good judgments and to develop the necessary leadership qualities for today's world. In this controversial and highly acclaimed book, the author guides the reader along the elite path through boarding school and Oxbridge to government, unpacking what he calls the Entitlement Illusion. Central to the Illusion is a uniquely British phenomenon, an industrialised process for turning out servants of the Empire that has been unwilling to change with the times. It was deified in the Victorian Rational Man Project and normalised by the British public, who still buy into the trance. Up to date evidence from Neuroscience shows what a poor training for leadership this actually is.

Inhaltsangabe: Einleitung: Ein Viertel unseres Gehirns dient der Verarbeitung visueller Sinneseindrücke, welche rund 80 Prozent jener Informationen ausmachen, die wir aus der Umwelt aufnehmen. Zur Kommunikation dieser Eindrücke konnten wir bis zum neunzehnten Jahrhundert ausschließlich auf visuell und sprachlich formulierte Zeichen zurückgreifen. Der Informationsgehalt wird durch sie auf das Wesentliche reduziert und über einen schmalen Kommunikationskanal übertragen, sei es in Form von Sprache oder einzelner Bilder. Dieser Vorgang kann jedoch bewusst oder unbewusst mit Fehlern behaftet sein, womit sich der Wunsch verbindet, visuelle Eindrücke direkt zu vermitteln. Zunächst konnte die Fotografie diesem Anspruch gerecht werden, später Film und Fernsehen. Die Bereitstellung

von analoger und nun auch digitaler Videotechnik ermöglicht es, visuelle und akustische Informationen einfach und preiswert zu speichern, zu verarbeiten und weiterzureichen. Der Kreislauf aus verfügbarer Technik, den daraus resultierenden Anwendungsfeldern und den durch sie wiederum steigenden Ansprüchen an leistungstärkere Technik nimmt hier kein Ende: Computer werden schneller, es können höher aufgelöste Bilder verarbeitet werden, zur Effizienzsteigerung ist noch schnellere Hardware nötig. Auch bei der Verteilung wachsen die Ansprüche, was an immer schnelleren Internetanbindungen sichtbar ist, an einem Ansteigen der Senderzahl im Fernsehen oder einer Kapazitätssteigerung von CD zu DVD sowie zu der nächsten Generation optischer Datenträger in Form von HD-DVD und Bluray Disc. Diese rasante Entwicklung wurde erst durch die Digitaltechnik ermöglicht. Bei ihr werden Informationen ähnlich wie bei der Sprache in Form von Symbolen ausgedrückt, jedoch in stark vereinfachter Form durch ein Alphabet, welches z. B. ausschließlich aus den Zeichen 0 und 1, den so genannten Bits, besteht. Ein Bit kann leicht durch Computer verarbeitet werden und besitzt eine geringe Fehleranfälligkeit. Bildinformationen gehören zu den aufwendigsten Gebieten der Digitaltechnik. Ein beispielsweise 720 mal 576 Pixel messendes Video, welches aus 25 Einzelbildern pro Sekunde besteht, führt bei einer Stunde Laufzeit und 24 Bit/Pixel zu einer Datenmenge von 895.795.200.000 Bits bzw. 104 GiB, den Ton noch nicht mitgerechnet. Zu dessen Speicherung wären 24 handelsübliche DVDs (4,7 GB Speicherkapazität, Stand 2006) nötig, die Übertragung über eine moderne Internetanbindung mit 6 Mbit/s würde über 40 Stunden in [...]

No Time Like the Future Michael J. Fox, 2020-11-17 INSTANT NEW YORK TIMES BESTSELLER

A moving account of resilience, hope, fear and mortality, and how these things resonate in our lives, by actor and advocate Michael J. Fox. The entire world knows Michael J. Fox as Marty McFly, the teenage sidekick of Doc Brown in Back to the Future; as Alex P. Keaton in Family Ties; as Mike Flaherty in Spin City; and through numerous other movie roles and guest appearances on shows such as The Good Wife and Curb Your Enthusiasm. Diagnosed at age 29, Michael is equally engaged in Parkinson's advocacy work, raising global awareness of the disease and helping find a cure through The Michael J. Fox Foundation for Parkinson's Research, the world's leading non-profit funder of PD science. His two previous bestselling memoirs, Lucky Man and Always Looking Up, dealt with how he came to terms with the illness, all the while exhibiting his iconic optimism. His new memoir reassesses this outlook, as events in the past decade presented additional challenges. In No Time Like the Future: An Optimist Considers Mortality, Michael shares personal stories and observations about illness and health, aging, the strength of family and friends, and how our perceptions about time affect the way we

approach mortality. Thoughtful and moving, but with Fox's trademark sense of humor, his book provides a vehicle for reflection about our lives, our loves, and our losses. Running through the narrative is the drama of the medical madness Fox recently experienced, that included his daily negotiations with the Parkinson's disease he's had since 1991, and a spinal cord issue that necessitated immediate surgery. His challenge to learn how to walk again, only to suffer a devastating fall, nearly caused him to ditch his trademark optimism and "get out of the lemonade business altogether." Does he make it all of the way back? Read the book.

Phoenix Rising Donald G. Lett, 2008-02 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered. Inquires like, How can a modern society scale back its dependence on gasoline as a motive source? Are there genuine alternative power sources? Are they the answer to a growing crisis? Recent announcements of hybrids like those from Honda, Toyota, and Ford have really brought attention to this issue. Hybrids that use both gasoline engines and electric motors. Really, though, alternative power sources have been around for as long as the automobile has been. The battle between and among the steam car, the electric and the gas car was fought out in the first couple of decades of the twentieth century. This book explores the ins and outs of that battle. A struggle from which the gasoline car emerged completely victorious. To such an extent that steam cars and electric cars virtually disappeared from the scene for many decades. We will look over all three alternatives, exploring their advantages and disadvantages. We will also look over the obstacles to the steamers and the electrics. Barriers that still exist to a certain extent. Handicaps that caused their disappearance in the first place.

The First 20 Hours Josh Kaufman, 2013-06-13 Forget the 10,000 hour rule— what if it's possible to learn the basics of any new skill in 20 hours or less? Take a moment to consider how many things you want to learn to do. What's on your list? What's holding you back from getting started? Are you worried about the time and effort it takes to acquire new skills—time you don't have and effort you can't spare? Research suggests it takes 10,000 hours to develop a new skill. In this nonstop world when will you ever find that much time and energy? To make matters worse, the early hours of practicing something new are always the most frustrating. That's why it's difficult to learn how to speak a new language, play an instrument, hit a golf ball, or shoot great photos. It's so much easier to watch TV or surf the web . . . In *The First 20 Hours*, Josh Kaufman offers a systematic approach to rapid skill acquisition— how to learn any new skill as quickly as possible. His method shows you how to

deconstruct complex skills, maximize productive practice, and remove common learning barriers. By completing just 20 hours of focused, deliberate practice you'll go from knowing absolutely nothing to performing noticeably well. Kaufman personally field-tested the methods in this book. You'll have a front row seat as he develops a personal yoga practice, writes his own web-based computer programs, teaches himself to touch type on a nonstandard keyboard, explores the oldest and most complex board game in history, picks up the ukulele, and learns how to windsurf. Here are a few of the simple techniques he teaches: Define your target performance level: Figure out what your desired level of skill looks like, what you're trying to achieve, and what you'll be able to do when you're done. The more specific, the better. Deconstruct the skill: Most of the things we think of as skills are actually bundles of smaller subskills. If you break down the subcomponents, it's easier to figure out which ones are most important and practice those first. Eliminate barriers to practice: Removing common distractions and unnecessary effort makes it much easier to sit down and focus on deliberate practice. Create fast feedback loops: Getting accurate, real-time information about how well you're performing during practice makes it much easier to improve. Whether you want to paint a portrait, launch a start-up, fly an airplane, or juggle flaming chainsaws, *The First 20 Hours* will help you pick up the basics of any skill in record time . . . and have more fun along the way.
