JavaScript for Absolute Beginners Terry McNavage, 2011-08-23 If you are new to both JavaScript and programming, this hands-on book is for you. Rather than staring blankly at gobbledygook, you'll explore JavaScript by entering and running hundreds of code samples in Firebug, a free JavaScript debugger. Then in the last two chapters, you'll leave the safety of Firebug and hand-code an uber cool JavaScript application in your preferred text editor. Written in a friendly, engaging narrative style, this innovative JavaScript tutorial covers the following essentials: Core JavaScript syntax, such as value types, operators, expressions, and statements provided by ECMAScript. Features for manipulating XHTML, CSS, and events provided by DOM. Object-oriented JavaScript, including prototypal and classical inheritance, deep copy, and mixins. Closure, lazy loading, advance conditional loading, chaining, currying, memoization, modules, callbacks, recursion, and other powerful function techniques. Encoding data with JSON or XML. Remote scripting with JSON-P or XMLHttpRequest Drag-and-drop, animated scrollers, skin swappers, and other cool behaviors. Optimizations to ensure your scripts run snappy. Formatting and naming conventions to prevent you from looking like a greenhorn. New ECMAScript 5, DOM 3, and HTML 5 features such as Object.create(), Function.prototype.bind(), strict mode, querySelector(), querySelectorAll(), and getElementsByClassName(). As you can see, due to its fresh approach, this book is by no means watered down. Therefore, over the course of your journey, you will go from JavaScript beginner to wizard, acquiring the skills recruiters desire.

Designing with Progressive Enhancement Todd Parker, Scott Jehl, Maggie Costello Wachs, Patty Toland, 2010-04-26 Progressive enhancement is an approach to web development that aims to deliver the best possible experience to the widest possible audience, and simplifies coding and testing as well. Whether users are viewing your sites on an iPhone, the latest and greatest high-end system, or even hearing them on a screen-reader, their experience should be easy to understand and use, and as fully-featured and functional as possible. Designing with Progressive Enhancement will show you how. It's both a practical guide to understanding the principles and benefits of progressive enhancement, and a detailed exploration of examples that will teach you—whether you're a designer or a developer—how, where, and when to implement the specific coding and scripting approaches that embody progressive enhancement. In this book, you'll learn: Why common coding approaches leave users behind, and how progressive enhancement is a more inclusive and accessible alternative How to analyze complex interface designs, see the underlying semantic HTML experience that will work everywhere, and layer on advanced enhancements safely A unique browser capabilities testing suite that helps deliver enhancements only to devices that can handle them Real-world best practices for coding HTML, CSS, and JavaScript to work with progressive enhancement, and cases where forward-looking HTML5 and CSS3 techniques can be applied effectively today How to factor in accessibility features like WAI-ARIA and keyboard support to ensure universal access Detailed techniques to transform semantic HTML into interactive components like sliders, tabs, tree controls, and charts, along with downloadable jQuery-based widgets to apply directly in your projects

Stoves. Beautifully illustrated, it provides detailed information on the history of design variations which can be used to establish the age of a particular stove. New Media and Learning in the 21st Century Tzu-Bin Lin, Victor Chen, Ching Sing Chai, 2015-02-25 This volume brings together conceptualizations and empirical studies that explore the socio-cultural dimension of new media and its implications on learning in the 21st century classroom. The authors articulate their vision of new-media-enhanced learning at a global level. The high-level concept is then re-examined for different degrees of contextualization and localization, for example how a specific form of new media (e-reader) changes specific activities in different cultures. In addition, studies based in Singapore classrooms provide insights as to how these concepts are being transformed and implemented by a co-constructive effort on the part of researchers, teachers and students. Singapore classrooms offer a unique environment to study the theory-practice nexus in that they are high achieving, implicitly grounded in the eastern cultural values and well-equipped with ICT infrastructure. While these studies are arguably the state-of-the-art exemplars that synergize socio-cultural and technological affordances of the current learning environments, they also serve as improvable ideas for further innovations. The interplay between theory and practice lends support to the reciprocal improvements for both. This book contributes to the continuing debate in the field, and will lead to better learning environments in the 21st century.

Deconstructing the Myths Catching the Dream, Albuquerque, NM.,2000 This report outlines a comprehensive research agenda for Indian education from the Native perspective. It resulted from a meeting held in Albuquerque, New Mexico in April 2000, planned by a national steering committee of Indian education researchers, administrators, and association executives. The introduction describes four traits of research in Indian education and calls for a long-term commitment of funding for the basic research that needs to be done, including gathering baseline information, the interaction of culture and education, factors that make Native students successful, school/family cooperation, the nature of Indian teacher and Indian student interaction, the effects of having more Indian teachers, characteristics of exemplary programs, and identifying policy changes that will improve outcomes for Indian students. Following the mission statement and summary is a statement of current problems and descriptions of task force recommendations. Separate task forces addressed each of 10 topics: early childhood education and teaching and learning styles, special education, social factors, professional preparation, tribal colleges and universities, mainstream colleges, multicultural and bilingual education, community education, education finance, and curriculum. Each task force presents its own statement of problems and identifies research priorities. Ten appendices present the meeting agenda, sponsoring organizations, steering committee members, conference chairman biography, Executive Order 13096, descriptions of topic areas, production of Native American teachers by college and year, list of attendees, invited guests, and a bibliography containing 23 references.
