NEO-MYTHOLOGY John Schissler Jr., 2023-05-22 The author, a wordsmith of the English language, will demonstrate how these classical entities are actually steeped in the Greek or Latin languages. Armed with that knowledge, the reader will learn derivatives for English words in an easy and relateable fashion: learning vocabulary minus the rote memorization of vocabulary lists. This newly-gained knowledge of the power of words will increase with the recognition of the root words found in the names of these gods, denigods, and heroes. Even the significance of our modern-day superheroes will also be scrutinized and so will the challenges of today's world of technology. Let the adventure begin with Neo-Mythology: 3001 Word

Odyssey! -----

----- Born in 1943, JOHN SCHISLER JR. and his family arrived in the USA in 1950. After learning the English language from childhood, Schissler went on to earn his post-secondary degree in Education at the University of Wisconsin in Milwaukee. He taught high school Latin, and English from 1968 to 2000. Since his retirement, Schissler has written four additional book: PASSAGE, IMMIGRANTS, FOUR_LEAF COVER, and I TEACH! Therefore, I Can.

Progress in Temperate Fruit Breeding H.

Schmidt, M. Kellerhals, 2012-12-06 This book contains the papers and posters presented at the Eucarpia Fruit Breeding Section Meeting held at Wädenswil/Einsiedeln, Switzerland from August 30 to September 3, 1993. It gives an overview of the latest trends in temperate fruit breeding in Europe and overseas. Three subjects were considered in special workshops: durability of scab resistance in apple, biotechnology and molecular markers. One important aim of modern fruit breeding is stable resistance to pests and diseases. Molecular markers might help to identify the genetic basis of important characters related to disease and pest resistance and components of yield and quality. Gene transfer has been successfully applied in several fruit species. However, public opinion in many countries does not favour this new technology and its products. Despite these new approaches, traditional breeding methods still predominate; many aspects of traditional breeding are considered in this book. Genetic resources and their exploitation are dealt with in a special chapter. Aspects of breeding minor crops such as walnut, almond, hippophae, cornel, etc. are also considered. Progress in Temperate Fruit Breeding is meant for fruit breeders, pomologists, lecturers, students and growers.
