Getting Over the X Steve Brookstein,2014-10-31 It was the stuff dreams were made of. It became the ultimate nightmare. Being the first winner of the X Factor in 2004, Steve Brookstein should have had it all. Instead, he tells a story of a man sold down the river by his own record label as they championed the runner-up, G4, and forced him into an album of cover songs. This is the story of what really happened, from vicious personal attacks by Sharon Osborne and Louis Walsh to threats from Max Clifford about going public. A decade on, and Max Clifford is inside and severely discredited. So, too was Andy Coulson, an editor who ran many of the untrue stories about Steve. He has been dubbed a pub singer, a fake, a flop and bitter as the narrative that begun on the show became adopted by journalists who thought he was fair game, frequently reviewing gigs that they hadn't been to or inventing quotes he hadn't said, and always regulated by a toothless Press Complaints Commission. Ten years on, Steve is now able to lift the lid on the show itself and analyse for the first time exactly what Max Clifford said when he rang to say, 'Talk to the press and we'll bury you.'

Plastic Films in Food Packaging Sina Ebnesajjad,2012-12-31 The value of the groceries purchases in the USA is over \$500 billion annually, most of which is accounted for by packaged foods. Plastic packaging of foods is not only ubiquitous in developed economies, but increasingly commonplace in the developing world, where plastic packaging is instrumental in decreasing the proportion of the food supply lost to spoilage. This new handbook is a combination of new material and updated chapters, chosen by Dr. Sina Ebnesajjad, from recently published books on this subject. Plastic Films in Food Packaging offers a practical handbook for engineers, scientists and managers working in the food packaging industry, providing a tailor-made package of science and engineering fundamentals, best practice techniques and guidance on new and emerging technologies. By covering materials, design, packaging processes, machinery and waste management together in one book, the authors enable the reader to take a lifecycle approach to food packaging. The Handbook addresses questions related to film grades, types of packages for different types of foods, packaging technologies, machinery and waste management. Additionally the book provides a review of new and emerging technologies. Two chapters cover the development of barrier films for food packaging and the regulatory and safety aspects of food packaging. Essential information and practical guidance for engineers and scientists working at all stages of the food packaging lifecycle: from design through manufacture to recycling Includes key published material on plastic films in food packaging, updated specifically for this Handbook, and new material on the regulatory framework and safety aspects Coverage of materials and applications together in one handbook enables engineers and scientists to make informed design and manufacturing decisions

Journey Toward the Cradle of Mankind Guido Gozzano,1996 Before leaving home he had engaged to send back dispatches to La Stampa; after appearing there, his letters from India were collected and issued posthumously as Verso la cuna del mondo (1917), now published in English for the first time. The extent of Gozzano's travels - to Ceylon, Goa, Agra, Jaipur - makes one wonder how the writer was able to visit all or even most of the places he so vividly describes.

The Effect of Sterilization on Plastics and Elastomers Laurence W. McKeen,2018-02-22 The Effect of Sterilization Methods on Plastics and Elastomers, Fourth Edition brings together a wide range of essential data on the sterilization of plastics and elastomers, thus enabling engineers to make optimal material choices and design decisions. The data tables in this book enable engineers and scientists to select the right materials and sterilization method for a given product or application. The book is a unique and essential reference for anybody working with plastic materials that are likely to be exposed to sterilization methods, be it in medical device or packaging development, food packaging or other applications. Presents essential data and practical guidance for engineers and scientists working with plastics in applications that require sterile packaging and equipment Updated edition removes obsolete data, updates manufacturers, verifies data accuracy, and adds new plastics materials for comparison Provides essential information and guidance for FDA submissions required for new medical devices

Handbook of Plastic Films Elsayed M. Abdel-Bary,2003 Plastic films are high-performance materials which play an essential part in modern life. The plastics films industry uses state-of-the-art manufacturing processes and is continuously seeking out new technologies to improve its performance. The understanding of the nature of plastic films, their production techniques, applications and their characterisation is essential for producing new types of plastic films. This handbook has been written to discuss the production and main uses of plastic films. Plastic films are high-performance materials which play an essential part in modern life.
