Multiskilling for Television Production Peter Ward,Alan Bermingham,Chris Wherry,2000-05-22 Written by television trainers who run their own courses on Multiskilling, this book offers a comprehensive introduction to the broad range of skills and technical knowledge required in this industry. It details all the essential information you need to know, acting as an on-the-job reference source for everyday use. For many broadcasting technicians, one of the biggest challenges in recent years has been the transition from a career working in a solo core skill such as camerawork or audio, to acquiring the experience and expertise of a range of production jobs. Many people are expected to work in a number of crafts and to equip themselves with a much wider range of television techniques than had been customary in the past. Multiskilling has become an integral part of television culture, requiring that new entrants are competent in several specialist production skills. Multiskilling for Television Production concentrates on the techniques associated with news and magazine programme production, where most technical operators are usually employed, but most techniques are shared across the whole spectrum of television and film making. Anyone baffled by the range and scope of skills to be mastered will find this book invaluable.

Dialogue Editing for Motion Pictures John Purcell,2012-11-12 Dialogue editing is a crucial yet invisible part of filmmaking. Do it right, and no one notices. Do it wrong, and your film or video sounds messy, distracting, and unrealistic. This is a book for people who need to edit production sound for film, TV, or video but were never taught how to do it. It goes step by step through the process and covers all the workflows you are likely to encounter. Efficient working practices are emphasized throughout, so you learn to save time and avoid needless repetition. Many dialogue editors are hobbled by a lack of understanding of the non-sound aspects of filmmaking. Unlike editors who cut effects, backgrounds or Foley, a dialogue editor's work is directly affected by what has gone on before. How a film was shot, recorded and edited will dramatically influence the dialogue editing process. Much of this book, then, deals with things which at first glance don't appear to be dialogue. You will find overviews of film picture and sound postproduction--film, tape, NTSC, PAL, 24p, and HD. There are summaries of film picture editing, OMF manipulation, and ADR management.
