Numeral Classifiers in Chinese XuPing Li, 2013-08-29

This book studies the syntax and semantics of numeral classifiers in Mandarin and other Chinese languages. It explores how Chinese classifiers are semantically interpreted in syntactic contexts and how semantic functions of classifiers are realized at the syntactic level. The book is a contribution to formal Chinese linguistics, and to the understanding of grammatical properties of

nominal phrases in Chinese and East Asian languages.

Insurgency and Social Disorder in Guizhou Robert Darrah Jenks, 1994-01-01 Textbooks and general histories of modern China agree that the so-called Miao rebellion constituted one of the major rebellions of the nineteenth century. It lasted for twenty years, caused devastation of such severity that its effects were still obvious to travelers in Guizhou province decades later, and, by one account, resulted in the deaths of more than four million people. In an impressive presentation of material drawn from local histories, private writings, and official documents, Jenks argues that the Qing government sought to lay the blame for the turmoil squarely on an ethnic minority it regarded as obstreperous and inferior. As well as altering perceptions of the rebellion, *Insurgency and Social Disorder in Guizhou* enhances our understanding of the causes of the rebellion and its place in the crises that beset

mid-nineteenth-century China. It contributes to the sociology of rebellion and peasant movements and is a valuable supplement to current anthropological work on Chinese minorities. Its treatment of Qing attitudes toward the Miao has implications for minority policies in the Peoples Republic of China today.

Traditional Chinese Medicines Xinjian Yan, Guirong Xie, Jiaju Zhou, G. W. A. Milne, 2018-10-03 This title was first published in 2003. In laboratories around the world the active principles in traditional herbal medicines are being isolated and characterized. A systematic effort at the Chinese Academy of Sciences is underway to identify the structure-activity relationships that result from the link between chemistry and medicine that is permitted by this data. This book, which provides the only systematic English-language description of the chemical structures and pharmacological effects of compounds active in traditional Chinese medicines (TCMs), is now in its second edition. The new edition provides English-language monographs on over 9000 chemicals isolated from nearly 4000 natural sources used in Chinese medicine and features the addition of in-depth bioactivity data for many of the compounds. Effects and indications of the medicines are included. Extensive indexing permits cross-referencing among English, Chinese and Latin names for natural medicinal sources, effects and indications, and the chemical components of the medicines. The second edition of *Traditional Chinese Medicines* includes 2300 new compounds, 2400 additional plant sources, more CAS Registry Numbers, and more pharmacological data. The structure of the book has been extensively reorganised to make cross referencing the data much simpler. This new edition is therefore a substantial improvement on the first edition of this important reference on the structural

chemistry of traditional Chinese medicines.

A Handbook for Analyzing Chinese Characters ,2008
With the fast growth of Chinese economy, the number of people learning Chinese language is increasing rapidly throughout the world. *A Handbook for Analyzing Chinese Characters* is intended to help those studying Chinese as a second language. It includes 5073 most frequently used Chinese characters in reading and writing. To help learners identify the most important to the least important characters, the 5073 characters are grouped into five different usage levels. Besides, they are formed with pictographic characters, self-indicative characters, compound ideographic characters and radical phonetic characters according to their structures. Each character is described with the property of the character and clarified by an illustrative sentence. Zhifang Ren is a professor of English at China Medical University. He has previously written a book titled *A Handbook of Analyzing English Vocabulary* published in China. This is his second literary endeavor involving ten years of painstaking research and compilation.

Emotion and Cause Sophia Yat Mei Lee, 2018-11-23

This work argues that cause events, being the most tangible component of emotion, provide a rich dimension of how emotions should be classified. While it is often claimed that emotional concepts cannot be defined, this work views emotion as a response triggered by actual or perceived events, specifically focusing on the interaction between

five primary emotions (Happiness, Sadness, Fear, Anger, and Surprise) and cause events. Cause events are examined in terms of two dimensions, namely transitivity and epistemicity. By incorporating the semantic and syntactic information of emotion cause events, this representation of emotion not only provides deep linguistic criteria of emotion cause events, but also offers an event-based approach to emotion classification. A text-driven, rule-based system for detecting the causes of emotion is then developed to establish the validity of the proposed linguistic model for emotion detection and classification. The system shows promising results.

The Columbia Anthology of Modern Chinese

Drama Xiaomei Chen, 2014-03-25 This condensed anthology reproduces close to a dozen plays from Xiaomei Chen's well-received original collection, *The Columbia Anthology of Modern Chinese Drama*, along with her critical introduction to the historical, cultural, and aesthetic evolution of twentieth-century Chinese spoken drama. Comprising representative works from the Republican era to postsocialist China, the book encapsulates the revolutionary rethinking of Chinese theater and performance that began in the late Qing dynasty and vividly portrays the uncertainty and anxiety brought on by modernism, socialism, political conflict, and war. Chosen works from 1919 to 1990 also highlight the formation of national and gender identities during a period of tremendous social, cultural, and political change in China and the genesis of contemporary attitudes toward the West. PRC theater tracks the rise of communism, juxtaposing ideals of Chinese socialism against the sacrifices made for a new society. Post-Mao drama addresses the nation's socialist legacy, its attempt to

reexamine its cultural roots, and postsocialist reflections on critical issues such as nation, class, gender, and collective memories. An essential, portable guide for easy reference and classroom use, this abridgment provides a concise yet well-rounded survey of China's theatricality and representation of political life. The original work not only established a canon of modern Chinese drama in the West but also made it available for the first time in English in a single volume.

Essays on the Language, Literature, and Religion of Nepal and Tibet B. Hodgson, 2023-02-16 Reprint of the original, first published in 1874.

The Archaeology of China Li Liu, Xingcan Chen, 2012-04-30 Past, present and future The archaeological materials recovered from the Anyang excavations ... in the period between 1928 and 1937 ... have laid a new foundation for the study of ancient China (Li, C. 1977: ix). When inscribed oracle bones and enormous material remains were found through scientific excavation in Anyang in 1928, the historicity of the Shang dynasty was confirmed beyond dispute for the first time (Li, C. 1977: ix-xi). This excavation thus marked the beginning of a modern Chinese archaeology endowed with great potential to reveal much of China's ancient history.. Half a century later, Chinese archaeology had made many unprecedented discoveries which surprised the world, leading Glyn Daniel to believe that a new awareness of the importance of China will be a key development in archaeology in the decades ahead (Daniel 1981: 211). This enthusiasm was soon shared by the Chinese archaeologists when Su Bingqi announced that the Golden Age of Chinese archaeology is arriving (Su, B. 1994: 139--140). In recent decades, archaeology has continuously prospered, becoming one of the most rapidly developing fields in

social science in China--

The Age of Irreverence Christopher Rea,2015-09-08

The Age of Irreverence tells the story of why China's entry into the modern age was not just traumatic, but uproarious. As the Qing dynasty slumped toward extinction, prominent writers compiled jokes into collections they called "histories of laughter." In the first years of the Republic, novelists, essayists and illustrators alike used humorous allegories to make veiled critiques of the new government. But, again and again, political and cultural discussion erupted into invective, as critics gleefully jeered and derided rivals in public. Farceurs drew followings in the popular press, promoting a culture of practical joking and buffoonery. Eventually, these various expressions of hilarity proved so offensive to high-brow writers that they launched a concerted campaign to transform the tone of public discourse, hoping to displace the old forms of mirth with a new one they called youmo (humor). Christopher Rea argues that this period—from the 1890s to the 1930s—transformed how Chinese people thought and talked about what is funny. Focusing on five cultural expressions of laughter—jokes, play, mockery, farce, and humor—he reveals the textures of comedy that were a part of everyday life during modern China's first "Age of irreverence." This new history of laughter not only offers an unprecedented and up-close look at a neglected facet of Chinese cultural modernity, but also reveals its lasting legacy in the Chinese language of the comic today and its implications for our understanding of humor as a part of human culture.

Getting others to do things Simeon Floyd,Giovanni Rossi,N. J. Enfield, Getting others to do things is a central

part of social interaction in any human society. Language is our main tool for this purpose. In this book, we show that sequences of interaction in which one person's behaviour solicits or occasions another's assistance or collaboration share common structural properties that provide a basis for the systematic comparison of this domain across languages. The goal of this comparison is to uncover similarities and differences in how language and other conduct are used in carrying out social action around the world, including different kinds of requests, orders, suggestions, and other actions brought together under the rubric of recruitment.
