The Woman War Correspondent, the U.S. Military, and the Press Carolyn M. Edy,2016-12-13

Honorable Mention recipient for the American Journalism Historians Association Book of the Year Award, this book outlines the rich history of more than 250 women who worked as war correspondents up through World War II, while demonstrating the ways in which the press and the military both promoted and prevented their access to war. Despite the continued presence of individual female war correspondents in news accounts, if not always in war zones, it was not until 1944 that the military recognized these individuals as a group and began formally considering sex as a factor for recruiting and accrediting war correspondents. This group identity created obstacles for women who had previously worked alongside men as "war correspondents," while creating opportunities for many women whom the military recruited to cover woman's angle news as "women war correspondents." This book also reveals the ways the military and the press, as well as women themselves, constructed the concepts of "woman war correspondent" and "war correspondent" and how these concepts helped and hindered the work of all war correspondents even as they challenged and ultimately expanded the public's understanding of war and of women.

The Martian Andy Weir,2014-02-11 Nominated as one of America's best-loved novels by PBS's The Great American Read Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive—and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old human error are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills—and a relentless, dogged refusal to quit—he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?
