Media as Politics in South Asia Sahana Udupa, Stephen D. McDowell, 2017-07-14 The dramatic expansion of the media and communications sector since the 1990s has brought South Asia on the global scene as a major center for media production and consumption. This book is the first overview of media expansion and its political ramifications in South Asia during these years of economic reforms. From the puzzling liberalization of media under military dictatorship in Pakistan to the brutal killings of journalists in Sri Lanka, and the growing influence of social media in riots and political protests in India, Nepal and Bangladesh, the chapters analyse some of the most important developments in the media fields of contemporary South Asia. Attentive to colonial histories as well as connections within and beyond South Asia in the age of globalization, the chapters combine theoretically grounded studies with original empirical research to unravel the dynamics of media as politics. The chapters are organized around the three frames of participation, control and friction. They bring to the fore the double edged nature of publicity and containment inherent in media, thereby advancing postcolonial perspectives on the massive media transformation underway in South Asia and the global South more broadly. For the first time bringing together the cultural, regulatory and social aspects of media expansion in a single perspective, this interdisciplinary book fills the need for overview and analytical studies on South Asian media.

Introduction to International Disaster Management Damon P. Coppola, 2010-12-31 Disaster management is a vibrant and growing field, driven by government spending in the wake of terrorist attacks and environmental debacles, as well as private-sector hiring of risk managers and emergency planners. An ever-increasing number of practicing professionals needs a reference that can provide a solid foundation in ALL major phases of supervision – mitigation, preparedness, response, communications, and recovery. As climate change leads to further costly catastrophes and as countries around the world continue to struggle with terrorism, the demand for solutions will only grow. This revised edition of Coppola's revered resource meets said demand head-on with more focused, current, thoughtfully analyzed, and effective approaches to disaster relief. Expanded coverage of global approaches to disaster management with enhanced data and research on disasters around the world, including Cyclone Nargis, the H1N1 pandemic, and the tsunami in American Samoa More material on risk management, mitigation, myths that affect behavior during crises, and post-disaster evaluation of the response Up-to-date information on the role of aid organizations and international financial institutions like the World Bank in disaster response, as well as commentary on the latest research in disaster management and policy studies

The Routledge Companion to Radio and Podcast Studies Mia Lindgren, Jason Loviglio, 2022-06-15 This comprehensive companion is a much-needed reference source for the expanding field of radio, audio, and podcast study, taking readers through a diverse range of essays examining the core questions and key debates surrounding radio practices, technologies, industries, policies, resources, histories, and relationships with audiences. Drawing together original essays from well-established and emerging scholars to conceptualize this multidisciplinary field, this book's global perspective acknowledges radio's enduring affinity with the local, historical relationship to the national, and its unpredictably transnational reach. In its capacious understanding of what constitutes radio, this collection also recognizes the latent time-and-space shifting possibilities of radio broadcasting, and of the myriad ways for audio to come to us 'live.' Chapters on terrestrial radio mingle with studies of podcasts and streaming audio, emphasizing continuities and innovations in form and content, delivery and reception, production cultures and aesthetics, reminding us that neither 'radio' nor 'podcasting' should be approached as static objects of analysis but rather as mutually constituting cultural forms. This cutting-edge and vibrant companion provides a rich resource for scholars and students of history, art theory, industry studies, journalism, media and communication, cultural studies, feminist analysis, and postcolonial studies. Chapter 42 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

Jihad in Saudi Arabia Thomas Hegghammer, 2010-04-01 Saudi Arabia, homeland of Osama bin Laden and many 9/11 hijackers, is widely considered to be the heartland of radical Islamism. For decades, the conservative and oil-rich kingdom contributed recruits, ideologues and money to jihadi groups worldwide. Yet Islamism within Saudi Arabia itself remains poorly understood. Why has Saudi Arabia produced so many militants? Has the Saudi government supported violent groups? How strong is al-Qaida's foothold in the kingdom and does it threaten the regime? Why did Bin Laden not launch a campaign there until 2003? This 2010 book presents the first ever history of Saudi jihadism based on extensive fieldwork in the kingdom and primary sources in Arabic. It offers a powerful explanation for the rise of Islamist militancy in Saudi Arabia and sheds crucial new light on the history of the global jihadist movement.

Media in New Turkey Bilge Yesil, 2016-06-30 In Media in New Turkey, Bilge Yesil unlocks the complexities surrounding and penetrating today's Turkish media. Yesil focuses on a convergence of global and domestic forces that range from the 1980 military coup to globalization's inroads and the recent resurgence of political Islam. Her analysis foregrounds how these and other forces become intertwined, and she uses Turkey's media to unpack the ever-more-complex relationships. Yesil confronts essential questions regarding: the role of the state and military in building the structures that shaped Turkey's media system; media adaptations to ever-shifting contours of political and economic power; how the far-flung economic interests of media conglomerates leave them vulnerable to state pressure; and the ways Turkey's politicized judiciary criminalizes certain speech. Drawing on local knowledge and a wealth of Turkish sources, Yesil provides an engrossing look at the fault lines carved by authoritarianism, tradition, neoliberal reform, and globalization within Turkey's increasingly far-reaching media.

Pakistan's Counterterrorism Challenge Moeed Yusuf, 2014-02-18 Pakistan, which since 9/11 has come to be seen as one of the world's most dangerous places and has been referred to as the epicenter of international terrorism, faces an acute counterterrorism (CT) challenge. The book focuses on violence being perpetrated against the Pakistani state by Islamist groups and how Pakistan can address these challenges, concentrating not only on military aspects but on the often-ignored political, legal, law enforcement, financial, and technological facets of the challenge. Edited by Moeed Yusuf of the US Institute of Peace, and featuring the contributions and insights of Pakistani policy practitioners and scholars as well as international specialists with deep expertise in

the region, the volume explores the current debate surrounding Pakistan's ability and incentives to crack down on Islamist terrorism and provides an in-depth examination of the multiple facets of this existential threat confronting the Pakistani state and people. The book pays special attention to the non-traditional functions of force that are central to Pakistan's ability to subdue militancy but which have not received the deserved attention from the Pakistani state nor from western experts. In particular, this path-breaking volume, the first to explore these various facets holistically, focuses on the weakness of political institutions, the role of policing, criminal justice systems, choking financing for militancy, and regulating the use of media and technology by militants. Military force alone, also examined in this volume, will not solve Pakistan's Islamist challenge. With original insights and attention to detail, the authors provide a roadmap for Western and Pakistani policymakers alike to address the weaknesses in Pakistan's CT strategy.

News Agencies from Pigeon to Internet K. M. Shrivastava, 2007 Deals with a very important business in global communication of news -- the news agencies. The first news agencies started their business when the fastest technology was a combination of telegraph and carrier pigeon. They have survived several technological developments since then and have used these technologies for further diversification of services and revenues. The Internet, some thought, will make the news agencies extinct like dinosaurs. But, well run news agencies found a new opportunity in this threat. Though there have been some corporate biographies of news agencies, there has not been any comprehensive analytical work in the past 25 years on this business. This book is an attempt to fill this void in the global literature on journalism, media studies, international communication and business management studies. Besides, the students of these academic disciplines, diplomats, policymakers, and all types of communication professionals will find this book useful. It will also be a good read for lay persons who unconsciously consume the products of news agencies through all types of media -- from newspapers to mobile phones.

The Myth of Media Globalization Kai Hafez, 2007-03-26 The ongoing interconnection of the world through modern mass media is generally considered to be one of the major developments underpinning globalization. This important book considers anew the globalization phenomenon in the media sphere. Rather than heralding globalization or warning of its dangers, as in many other books, Kai Hafez analyses the degree to which media globalization is really taking place. Do we have enough evidence to show that there is a linear and accelerated move towards transnationalization in the media? All too often the empirical data presented seems rather more anecdotal than representative. Many transborder media phenomena are overestimated and taken out of the context of locally and nationally oriented mainstream media processes all over the world. The inherent danger is that a central paradigm of the social sciences, rather than bearing scholarly substance, will turn out to be a myth and even a sometimes dangerously ideological tool. Based on a theoretical debate of media globalization, the work discusses most major fields of media development, including foreign reporting, satellite TV, film, internet, foreign broadcasting, media and migration, media policy and media economy. As an important new contribution to timely debates, *The Myth of Media Globalization* will be essential and provocative reading for students and scholars alike.

Marine Corps Tank Battles in the Middle East Oscar E. Gilbert, 2015-02-09 In the aftermath of Vietnam a new generation of Marines was determined to wage a smarter kind of war. The tank, the very symbol of power and violence, would play a key role in a new concept of mobile warfare, not seen since the dashes of World War II. The emphasis would be not on brutal battles of attrition, but on paralyzing the enemy by rapid maneuver and overwhelming but judicious use of firepower. Yet in two wars with Iraq, the tankers, as well as the crews of the new Light Armored Vehicles, quickly found themselves in a familiar role--battering through some of the strongest defenses in the world by frontal assault, fighting their way through towns and cities. In America's longest continual conflict, armored Marines became entangled in further guerilla war, this time amid the broiling deserts, ancient cities, and rich farmlands of Iraq, and in the high, bleak wastes of Afghanistan. It was a familiar kind of war against a fanatical foe who brutalized civilians, planted sophisticated roadside bombs, and seized control of entire cities. It has been a maddening war of clearing roads, escorting convoys, endless sweep operations to locate and destroy insurgent strongholds, protecting voting sites for free elections, and recapturing and rebuilding urban centers. It's been a war in which the tanks repeatedly provided the outnumbered infantry with precise and decisive firepower. The tankers even added a new trick to their repertoire--long-range surveillance. Our fights against Iraq in 1991 and in the post-9/11 years have seen further wars that demanded that unique combination of courage, tenacity, professionalism, and versatility that makes a Marine no better friend, and no worse enemy. This book fully describes how our Marine Corps tankers have risen to the occasion.

Crowded Orbits James Clay Moltz, 2014-04-29 Space has become increasingly crowded since the end of the Cold War, with new countries, companies, and even private citizens operating satellites and becoming spacefarers. This book offers general readers a valuable primer on space policy from an international perspective. It examines the competing themes of space competition and cooperation while providing readers with an understanding of the basics of space technology, diplomacy, commerce, science, and military applications. The recent expansion of human space activity poses new challenges to existing treaties and other governance tools for space, increasing the likelihood of conflict over a diminishing pool of beneficial locations and resources close to Earth. Drawing on more than twenty years of experience in international space policy debates, James Clay Moltz examines possible avenues for cooperation among the growing pool of space actors, considering their shared interests in space traffic management, orbital debris control, division of the radio frequency spectrum, and the prevention of military conflict. Moltz concludes with policy recommendations for enhanced international collaboration in space situational awareness, scientific exploration, and restraining harmful military activities.
