Star Theatre William Firebrace,2017-12-30 Most of us can recall a childhood visit to a planetarium: the sense of anticipation as the room darkens. The stars begin to appear as the voice of an astronomer is heard. In the planetarium, where the audience is transported to distant galaxies, the wondrous complexity of the cosmos combines with entertainment to become a theater of the night. Star Theatre explores the history of the planetarium's mix of science and spectacle. William Firebrace reveals how in the planetarium, the solar system and universe is demonstrated on an ever-expanding scale. He traces the origins of the building through history, from its antecedents to its invention in Germany in the 1920s, developments in the USSR and the United States, to its expansion across the globe at the time of the space race, and finally to the evolution of the contemporary planetarium in a time of startling astronomical and cosmological discoveries. This concise and well-illustrated history will appeal to astronomy lovers and those interested in architecture, theater, and cinema.

Kul'tura Kosmosa Andrew Thomas,2011 This thesis argues that there is a popular culture of space exploration characteristic of a wider Russia; its roots lie in pagan times and it grew through Orthodox Christianity and Soviet Communism to the twenty-first century, where it is actively promoted by Russia and neighbouring nations. The key influences stem from Nikolai Fedorov, Kontsantin Tsiolkovsky, Friedrich Tsander and Yuri Gagarin. The narrative of the twentieth-century Soviet space programme is considered from this perspective and the cultural importance of Tsiolkovsky to this programme is acknowledged. This is an alternative perspective to the commonly-held Western view of the Space Race. The manipulation of imagery and ritual of space exploration by Russia and other neighbouring nations is examined, and the effect on the collective remembering in modern Russia of key events in Russian space exploration is tested.

Space, Time, and Aliens Steven J. Dick,2020-05-11 In this comprehensive and interdisciplinary volume, former NASA Chief Historian Steven Dick reflects on the exploration of space, astrobiology and its implications, cosmic evolution, astronomical institutions, discovering and classifying the cosmos, and the philosophy of astronomy. The unifying theme of the book is the connection between cosmos and culture, or what Carl Sagan many years ago called the “cosmic connection.” As both an astronomer and historian of science, Dr. Dick has been both a witness to and a participant in many of the astronomical events of the last half century. This collection of papers presents his reflections over the last forty years in a way accessible to historians, philosophers, and scientists alike. From the search for alien life to ongoing space exploration efforts, readers will find this volume full of engaging topics relevant to science, society, and our collective future on planet Earth and beyond.
