30 Seconds that Can Change Your Life Roger A. Kaufman, 2006 It takes only a single, 30-second decision to change your work or personal life for the better. Getting to that point is what is more complex, and getting there depends on the decisions you make and the context you use to make those decisions.

Understanding and Governing Sustainable Tourism Mobility Scott A. Cohen, James E.S. Higham, Gossling Stefan, Paul Peeters, 2014-03-26 Despite a growing contribution to climate change, tourist

and traveller behaviour is currently not acknowledged as an important sector within the development of climate policy. Whilst tourists may be increasingly aware of potential impacts on climate change there is evidence that most are unwilling to modify their actual behaviours. Influencing individual behaviour in tourism and informing effective governance is therefore an essential part of climate change mitigation. This significant volume is the first to explore the psychological and social factors that may contribute to and inhibit sustainable change in the context of tourist and traveller behaviour. It draws on a range of disciplines to offer a critical review of the psychological understandings and behavioural aspects of climate change and tourism mobilities, in addition to governance and policies based upon psychological, behavioural and social mechanisms. It therefore provides a more informed understanding of how technology, infrastructure and cost distribution can be developed in order to reach stronger mitigation goals whilst ensuring that resistance from consumers for socio-psychological reasons are minimized. Written by leading academics from a range of disciplinary backgrounds and regions this ground breaking volume is essential reading for all those interested in the effective governance of tourism's contribution to climate change now and in the future.

Fundamental Theories of Mega Infrastructure Construction Management Zhaohan Sheng, 2017-10-20
Fundamental Theories of Mega Infrastructure Construction Management: Theoretical Considerations from

Chinese Practices is a collection of decades of research and applications of managing megaprojects using theories of complex systems and management sciences. It presents basic (classical) theory of megaproject management and is a showcase of more than 30 years of research of complex system and management sciences on the theory of megaproject management resulting from the integrating of theory and practice of megaprojects. The theory and models have undergone rigorous systematic testing during the management and implementation of megaprojects in China. Megaprojects are huge undertakings, often in infrastructure (bridges, tunnels, airports, etc.) that involve huge levels of investment, often take years to complete, and typically run into delays, cost overruns, and any number of unforeseen problems. Over the last few decades, no one country has undertaken more of these projects than China, and this book presents the fundamental theories underlying the practice of Mega Infrastructure Construction Management as practiced in China. Individual chapters provide a basic definition of Mega Infrastructure Construction and it's management; an overview of the theories behind it; the Formation Path; basic concepts; fundamental principles; scientific problems; the Method System of Meta-synthesis; specialized methods in research; and intelligent management of Mega Infrastructure Construction. Although the theoretical construction management problems in this book are derived from construction practices in China, they can be applied universally and extended for great fundamental significance.

Global Tourist Behavior Erdener Kaynak, Muzaffer Uysal, 2012-11-12 Global Tourist Behavior contains travel and marketing research that explores the integral global nature of tourism. The globalization of tourism has resulted in more culturally diverse travelers with different preferences, motivations,

expectations, and needs, while at the same time worldwide movements toward democracy have made some locations more accessible than ever before. New diversity in global tourist behavior and the reciprocal interaction between travelers and destinations will pose new challenges and create new opportunities for tourism professionals. *Global Tourist Behavior* helps readers meet these challenges by providing unique and invaluable new research on global travel behavior as an integral component of travel and tourism marketing research. It features original, empirical research by tourism scholars representing a variety of locations worldwide, including North America, the Caribbean, Eastern Europe, Germany, Indonesia, Korea, the Netherlands, the United Kingdom, and Zambia. The geographically diverse chapters in *Global Tourist Behavior* present research on: marketing places to tourists tourists'knowledge of culture issues in cross-cultural tourism tourism channels and distribution systems international tourism and marketing expert systems in tourism marketing management the impact of mega events health tourism. Tourism promoters, decisionmakers, and students will find the information on international travelers'preferences, expectations, motivations, images, attitudes, and choices of tour packages extremely helpful. The book can also be used as a guide for attracting international tourist business and developing appropriate marketing and management strategies for specific destinations.

Event Portfolio Planning and Management Vassilios Ziakas, 2013-10-23 Cities and regions around the world increasingly capitalize on a series of events aimed at optimizing their reach and outcomes. How then can a series of different events be developed and harnessed? What are the conditions and the means by which synergies and collaboration among different events and their stakeholders can be fostered? This book for the first time explores how managers and host communities can synergize sport, cultural and other planned events in a portfolio in order to attain, magnify and sustain their outcomes. The incorporation of different events into a portfolio requires an integrative way of viewing the different community purposes that they serve in unison. This book elaborates on this holistic approach by developing an integrative theoretical framework for conceptualizing event portfolios, and examining their challenges and prospects as well as potential as tools for sustainable development. It therefore presents the foundations of event portfolio

planning, the patterns of inter-organizational relationships within collaborative events networks that foster the conditions for community capacity-building and the requirements for the design and development of event portfolios. Topics are considered from varying perspectives and examples of emerging event portfolios from a range of geographical regions are integrated throughout. Uniquely providing a holistic framework for planning and managing a series of events this is essential reading for all those interested in Events Policy, Planning and Management.

How Big Things Get Done Bent Flyvbjerg,Dan Gardner,2023-02-07 The secrets to successfully

planning and delivering ambitious, complex projects on any scale—from home renovation to space exploration—by the world's leading expert on megaprojects. Nothing is more inspiring than a big vision that becomes a triumphant, new reality. Think of how the Empire State Building went from a sketch to the jewel of New York's skyline in twenty-one months, or how Apple's iPod went from a project with a single employee to a product launch in eleven months. These are wonderful stories. But most of the time big visions turn into nightmares. Remember Boston's "Big Dig"? Almost every sizeable city in the world has such a fiasco in its backyard. In fact, no less than 92% of megaprojects come in over budget or over schedule, or both. The cost of California's high-speed rail project soared from \$33 billion to \$100 billion—and won't even go where promised. More modest endeavors, whether launching a small business, organizing a conference, or just finishing a work project on time, also commonly fail. Why? Understanding what distinguishes the triumphs from the failures has been the life's work of Oxford professor Bent Flyvbjerg, dubbed "the world's leading megaproject expert." In *How Big Things Get Done*, he identifies the errors in judgment and decision-making that lead projects, both big and small, to fail, and the research-based principles that will make you succeed with yours. For example: Understand your odds. If you don't know them, you won't win. Plan slow, act fast. Getting to the action quick feels right. But it's wrong. Think right to left. Start with your goal, then identify the steps to get there. Find your Lego. Big is best built from small. Be a team maker. You won't succeed without an us. Master the unknown unknowns. Most think they can't, so they fail. Flyvbjerg shows how you can. Know that your biggest risk is you. Full of vivid examples ranging from the building of the Sydney Opera House, to the making of the latest Pixar

blockbusters, to a home renovation in Brooklyn gone awry, *How Big Things Get Done* reveals how to get any ambitious project done—on time and on budget.

IPL Viewership Dr Shalini Sharma,2022-02-07 The success of the Indian Premier League in a country where cricket and Bollywood cover a major pie of the entertainment landscape was a forgone conclusion. But what keeps the viewers hooked up to this festival of stars, cricket, sportsmanship, cheerleaders, sponsor and brands is a million-dollar question. This book is an attempt to find answers to the same. Understanding viewers motivation and enthusiasm to keep the league relevant and successful, factors that play a major role in increasing the viewership and help sustain the interest make it an interesting read.

Handbook on Transport and Urban Planning in the Developed World Michiel C.J. Bliemer,Corinne Mulley,Claudine J. Moutou,2016-02-26 This Handbook provides comprehensive coverage of all of the major factors that underpin our understanding of urban and transport planning in the developed world. Combining urban and transport planning in one volume, the chapters present the state of the art as well as new research and directions for the future. The contributions from leading international academics at the forefront of their fields consider transport and urban planning from a number of different perspectives including historical, policy and strategy dimensions, appraisal and financing of options, planning and design

of urban areas and the management of transport and urban systems. Examples and practical guides from the developed world are included along with a detailed discussion of the emerging issues. The Handbook provides an essential reference to all of the key points on the topic as well as signalling areas of concern and future research paths. Academics, researchers, students, policymakers and practitioners will find it a constant source of information and guidance.

Urban and Regional Planning and Development Rajiv R. Thakur, Ashok K. Dutt, Sudhir K. Thakur, George M. Pomeroy, 2020-02-10 This book discusses urban planning and regional development practices in the twentieth century, and ways in which they are currently being transformed. It addresses questions such as: What are the factors affecting planning dynamics at local, regional, national and global scales? With the push to adopt a market paradigm in land development and infrastructure, the relationship between resource management, sustainable development and the role of governance has been transformed. Centralized planning is giving way to privatization, not only in the traditional regions but also in newly emerging regions of Asia, Africa and Latin America. Further, attempts are being made to bring planning related decision-making closer to the people who are most affected by it. Presenting a collection of studies from scholars around the world and highlighting recent advances in the field, the book is a valuable reference guide for those engaged in urban transformations, whether as graduate students, researchers, practitioners or policymakers.

Complexity and Sustainability in Megaprojects Edoardo Favari, Franca Cantoni, 2023-05-31 This book showcases the discussion about megaprojects carried out at the MeRIT (Megaproject Research

Interdisciplinary Team) workshop 2022: the crisis, discontinuity, rising prices, and supply chains disruption force radical reflection for those involved in megaprojects. It raises a modern-day challenge, the creation of value for stakeholders. Indeed, the aim of the volume is to encourage readers to think more broadly, articulately and less stringently than the mainstream claims. There is a need to design, implement, and manage megaprojects by abandoning the old paradigm that leveraged solely on time and cost. We need to move beyond that by going to explore the value generated, the positive impact on people, communities and territories. Economic, social and environmental sustainability takes on a new and broader articulation: issues of the circular economy applied to megaprojects are addressed and ample space is ensured for the inclusion of social needs in current practices.

U.S. Government Research Reports ,1963

Applying leadership and management in planning Morphet, Janice, 2015-05-06 Planning is central to economic, social and environmental life but its practice is frequently criticised by all who engage in it. Seen as too restrictive by those who promote development and too weak by those opposing it, planners who advise on proposals cannot sit on the fence. Is it the planning system that is problematic or is it the planners who work within it? This valuable book examines these issues at the continuing professional development level and discusses the ways in which management theories, tools and techniques can be applied to planning practice and used by all who engage in it. Written by an experienced author and widely respected academic, the book includes case studies and question and answer sections, and will be valuable through both initial and continuous professional education, helping candidates prepare for examinations and

subsequent management.
