Impacts and strategic outcomes from non-mega sport events for local communities

Marijke Taks, Laurence Chalip, B. Christine Green, 2017-10-02 Do small- and medium-sized sporting events affect the overall wellbeing of people living in the host community? If so, how do they affect local life? This book specifically addresses the strategic choices that host communities make when hosting non-mega sporting events, and looks at the outcomes of those choices. The contributions to this study assess a variety of tangible and intangible effects, including the economic and social impacts, and the effect on tourism and participation in sport. It contains analysis of a variety of events, including spectator and participant events, single-sport and multi-sport events, and one-day and multi-day events, all hosted in different types of cities and communities around the globe. Overall, this book identifies and extends our understanding of the nature, management, and implications of non-mega sporting events. The impacts and strategic outcomes highlighted here have practical value for sport event management and strategy, and advance our understanding of the economic and social consequences of hosting an event. This book was originally published as a special issue of European Sport Management Quarterly.

Applied Informatics for Industry 4.0 Nazmul Siddique, Mohammad Shamsul

Arefin, Julie Wall, M Shamim Kaiser, 2023-02-17 Applied Informatics for Industry 4.0 combines the technologies of computer science and information science to assist in the management and processing of data to provide different types of services. Due to the adaptation of 4.0 IR-related technologies, applied informatics is playing a vital role in different sectors such as healthcare, complex system design and privacy-related issues.

This book focuses on cutting edge research from the fields of informatics and complex industrial systems, and will cover topics including health informatics, bioinformatics, brain informatics, genomics and proteomics, data and network security and more. The text will appeal to beginners and advanced researchers in the fields of computer science, information sciences, electrical and electronic engineering and robotics.

The Routledge Handbook of Mega-Sporting Events and Human Rights William Rook, Daniela Heerdt, 2023-10-04 The Routledge Handbook of Mega-Sporting Events and Human Rights is the first book to explore in depth the topic of mega-sporting events (MSEs) and human rights, offering accounts of adverse human rights impacts linked to MSEs while considering the potential for promoting human rights in and through the framework of these events. Drawing on the contributions of an international group of leading researchers, practitioners and advocates, the book introduces key concepts in human rights and considers how they relate to ethical, social, managerial and governance issues in contemporary MSEs, from inclusion and welfare to corruption and sustainability. It examines the role of key stakeholders in the delivery of MSEs, including organising committees, sport governing bodies, governments, athletes, sponsors and broadcasters, as well as the role of activists and advocates, and presents historical and contemporary case studies of human rights as an active issue in MSEs. The book provides new perspectives on human rights as a lens for understanding modern sport and as a guiding principle for responsible sport that protects the interests of individuals and communities, as well as offering guidance on best practice. It is essential reading for all advanced students, researchers, practitioners, policymakers and stakeholders with an interest in organisation

and delivery of MSEs, as well as general sport management, sport policy, sport governance, the ethics of sport, event management, political science, development studies, ethical business or the significance of sport in wider society.

Understanding and Governing Sustainable Tourism Mobility Scott A. Cohen, James E.S. Higham, Gossling Stefan, Paul Peeters, 2014-03-26 Despite a growing contribution to climate change, tourist and traveller behaviour is currently not acknowledged as an important sector within the development of climate policy. Whilst tourists may be increasingly aware of potential impacts on climate change there is evidence that most are unwilling to modify their actual behaviours. Influencing individual behaviour in tourism and informing effective governance is therefore an essential part of climate change mitigation. This significant volume is the first to explore the psychological and social factors that may contribute to and inhibit sustainable change in the context of tourist and traveller behaviour. It draws on a range of disciplines to offer a critical review of the psychological understandings and behavioural aspects of climate change and tourism mobilities, in addition to governance and policies based upon psychological, behavioural and social mechanisms. It therefore provides a more informed understanding of how technology, infrastructure and cost distribution can be developed in order to reach stronger mitigation goals whilst ensuring that resistance from consumers for socio-psychological reasons are minimized. Written by leading academics from a range of disciplinary backgrounds and regions this ground breaking volume is essential reading for all those interested in the effective governance of tourism's contribution to climate change now and in the future.

Applying Leadership and Management in Planning Janice Morphet, 2015-05-06

Addressing issues of planning management and professional development, this book discusses the ways that management theories, tools, and techniques can be applied to planning practice. Drawing on case studies and a wealth of professional experience, Janice Morphet examines recent criticism of the planning system and gives much-needed attention to the connections between management and planning. Beneficial for planners at all stages of their career, this book is ideal for courses with a key focus on strategic planning and infrastructure investment as part of the planning process.

Space-Time Integration in Geography and GIScience Mei-Po Kwan, Douglas

Richardson, Donggen Wang, Chenghu Zhou, 2014-09-18 Space-time analysis is a rapidly growing research frontier in geography, GIS, and GIScience. Advances in integrated GPS/GIS technologies, the availability of large datasets (over time and space), and increased capacity to manage, integrate, model and visualize complex data in (near) real time, offer the GIS and geography communities extraordinary opportunities to begin to integrate sophisticated space-time analysis and models in the study of complex environmental and social systems, from climate change to infectious disease transmission. This volume specifically focuses on research frontiers, comparative research, and research and application interactions in this field in the US and China, arguably the two most dynamic loci for this work today. The contributions to this book, by top researchers in China and the US, productively highlight the differences and similarities in approaches and directions for space-time analysis in the two countries. In light of the recent rapid progress in GIScience research on space-time integration in both countries, the book's

focus on research frontiers in these two countries will attract great interest in both countries and in other parts of the world as well as among related disciplines. In addition, the book also explores the impact of collaborative research and publications underway in this area between the US and China and will provide an overview of these collaborative efforts and programs. This book will not only be of interest to university-based GIS researchers and students, but also to those interested in this new area of research and applications like researchers and developers in business, internet mapping and GIS and location based services (LBS).

International Handbook on Mega-Projects Hugo Priemus, Bert van Wee, 2013-11-29 Providing crucial background information for those who want to understand decision-making processes on large transport infrastructure projects, this fascinating Handbook will prove an important source of information for academics, researchers and students

Active Sport Tourism Heather J. Gibson, Matthew Lamont, Millicent Kennelly, Richard J. Buning, 2020-05-21 This volume serves to expand theory-driven understandings of active sport tourism by showcasing five empirical studies examining a variety of active sport tourism contexts. These include table tennis at the World Veteran's Championships, ultramarathon, running/cycling/triathlon, skiing/snowboarding, and a range of issues such as active ageing and travel-related carbon footprints. The volume also seeks to explore possibilities for future directions in active sport tourism and act as a catalyst for ongoing scholarly inquiry. Travelling to take part in active sporting pursuits is growing in popularity around the world. Active sport tourism encompasses travel to participate in a myriad sports, as well as in competitive participatory sport events. Much of the recent

growth in active sport tourism is associated with travel to compete in participatory sport events, notably the big city international marathon events; amateur running, triathlon, and cycling events; Masters Games; and team sport tournaments. While the broader sport tourism research literature has tended to focus on spectator-oriented sports events, particularly the mega events such as the Olympic Games, it is only recently that a concerted research agenda in active sport tourism has emerged, making this volume innovative and relevant. This book was originally published as a special issue of the Journal of Sport & Tourism.

IPL Viewership Dr Shalini Sharma, 2022-02-07 The success of the Indian Premier League in a country where cricket and Bollywood cover a major pie of the entertainment landscape was a forgone conclusion. But what keeps the viewers hooked up to this festival of stars, cricket, sportsmanship, cheerleaders, sponsor and brands is a million-dollar question. This book is an attempt to find answers to the same. Understanding viewers motivation and enthusiasm to keep the league relevant and successful, factors that play a major role in increasing the viewership and help sustain the interest make it an interesting read.

Transactions from the ... Annual Spring Conference and Resource Mart Association for Quality and Participation. Spring Conference and Resource Mart, 1993

Research Methodology in Bioscience and Biotechnology Kian Mau Goh, 2023-07-28 This monograph offers a comprehensive guide to good research practices and mindsets, covering a wide range of topics across 8 chapters. Readers will find numerous themes and strategies that can help them develop their research skills and achieve their objectives,

from effective proposal writing to stress management and upskilling. This book explains the purpose, process, tips, and mistakes of writing proposals, theses, articles, and reviews in clear and straightforward language, allowing readers to develop good research plans. By applying the advice and insights offered in this book, students and researchers can improve the quality of their work, cultivate research integrity, and develop good publication plans, write well, and reduce rejection rates. Research outputs will be more likely to be of high quality if students and researchers are encouraged to cultivate these pieces of advice. The focus of the book is not solely on the outcomes of research. Rather, it also delves into mindset, habits, adaptability, time management, stress management, recent tools for upskilling, planning, and execution. Throughout the book, the author seeks to instill a growth mindset in the readers, encouraging them to develop positive research habits and behaviors. KPIs, particularly publications, shall not be used as a reason to erode research integrity and ethnicity; therefore, plagiarism, self-citation, falsifying data, exaggerating findings, authorship in publications, the use of AI tools, CRedit, and COPE are discussed. This book contains interviews with high-profile researchers, top management at institutions, policy advisers, etc., whose opinions and advice the readers will find valuable. Overall, this all-in-one guide is an essential resource for postgraduate students, post-doctoral fellows, and academics who are struggling to find a survival strategy in the rapidly changing research environment. The book assists readers in developing right mindset, planning their research and publications, and in achieving their predetermined objectives.

The Oxford Handbook of Megaproject Management Bent Flyvbjerg, 2017 This

handbook provides state-of-the-art scholarship in the emerging field of megaproject management. The 25 chapters cover all aspects of megaproject management, from front-end planning to actual project delivery, including how to deal with stakeholders, risk, finance, complexity, innovation, governance, ethics, project breakdowns, and scale itself.

Public Finance, 30th Edition H L Bhatia, Public Finance continues in its stride in presenting the latest information on Indian budget. Over two generations, it has virtually become an encyclopedia on all financial matters of the Government of India, serving as a textbook for students, teachers and the general public and a reference volume for researchers and others. It is equally useful for competitive examinations conducted by various professional and employment- providing bodies. It covers the UGC CBCS syllabus and the syllabi of many Indian universities for honours, postgraduate and professional courses. The book follows a logical and systematic approach. Thus, it is divided into two parts. Part I provides an analytical and comprehensive discussion of both the basics and frontiers of the theory of public finance. Part II covers the set-up, issues and working of Indian fiscal field mounted upon the theoretical underpinnings and international practices and experience. The illustrations are drawn mainly from the Indian scene, with a cross - reference to international experience. The book uses all the modern-day tools of pedagogy like Learning Objectives, Key Terms, Summary, Review Questions and Exercises.

Foundations of Instructional and Performance Technology Seung Youn Chyung, 2008 Whether you're studying or practicing in the fields of instructional technology and human performance technology, you need a foundation of knowledge to advance your career. Foundations of Instructional and Performance Technology will provide you with an

overview of principles and practices that is clear and easy-to-understand. This new resource does not offer an exhaustive list of topics. Rather the author selected topics with those fairly new to the field in mind and synthesized a wealth of information from many different sources into one concise text. The book starts with a focus on instructional technology, then shifts to human performance technology. With this book, you'll have the opportunity to learn about ideas of original thinkers like Edward Thorndike, B. F. Skinner, Benjamin Samuel Bloom and more. You'll also have access to extensive references and user-friendly charts and graphs all designed to help you develop, validate and enhance your practice.

Decision-making on Mega-projects Hugo Priemus, Bent Flyvbjerg, Bert van Wee, 2008-01-01 It will be useful for those experienced and senior professionals who are charged with authorizing and controlling projects. Recommended. P.F. Rad, Choice Building on the seminal work of Bent Flyvbjerg, this book is a collection of expert contributions that will prove essential to anyone wanting to understand why mega-projects go wrong and how they can be made to work better. Professor Sir Peter Hall, University College London, UK This book offers a refreshing and fascinating look at mega-projects from the perspective of public evaluation and planning. With the changing role of the public sector in planning and implementing large-scale projects and a subsequent strong emergence of private public modes of operation, mega-projects have become a problematic phenomenon. This volume is a major source of information and reference. It provides the reader with unique insights and caveats in mega-projects planning. Peter Nijkamp, VU University Amsterdam, The Netherlands This book enlarges the

understanding of decision-making on mega-projects and suggest recommendations for a more effective, efficient and democratic approach. Authors from different scientific disciplines address various aspects of the decision-making process, such as management characteristics and cost benefit analysis, planning and innovation and competition and institutions. The subject matter is highly diverse, but certain questions remain at the forefront. For example, how do we deal with protracted preparation processes, how do we tackle risks and uncertainties, and how can we best divide the risks and responsibilities among the private and public players throughout the different phases of the project? Presenting a state-of-the-art overview, based on experiences and visions of authors from Europe and North America, this unique book will be of interest to practitioners of large-scale project management, politicians, public officials and private organisations involved in mega-project decision-making. It will also appeal to researchers, consultants and students dealing with substantial engineering projects, complex systems, project management and transport infrastructure.

Planning Olympic Legacies Eva Kassens-Noor, 2012-06-25 When a city wins the right to hold the Olympics, one of the oft cited advantages to the region is the catalytic effect upon the urban and transport projects of the host cities. However, with unparalleled access to documents and records, Eva Kassens-Noor questions and challenges this fundamental assertion of host cities who claim to have used the Olympic Games as a way to move forward their urban agendas. In fact, transport dreams to stage the perfect games of the International Olympic Committee and the governments of the host cities have led to urban realities that significantly differ from the development path the city had set out to

accomplish before winning the Olympic bid. Ultimately it is precisely the IOC's influence – and the city's foresight and sophistication (or lack thereof) in coping with it – that determines whether years after the Games there are legacies benefitting the former hosts. The text is supported by revealing interviews from lead host city planners and key documents, which highlight striking discrepancies between media broadcasts and the internal communications between the IOC and host city governments. It focuses on the inside story of the urban and transport change process undergone by four cities (Barcelona, Atlanta, Sydney, and Athens) that staged the Olympics and forecasts London and Rio de Janeiro's urban trajectories. The final chapter advises cities on how to leverage the Olympic opportunity to advance their long-run urban strategic plans and interests while fulfilling the International Olympic Committee's fundamental requirements. This is a uniquely positioned look at why Olympic cities have – or do not have – the transport and urban legacies they had wished for. The book will be of interest to planners, government agencies and those involved in organizing future Games.

Planning and Design for Sustainable Urban Mobility Un-Habitat, 2013-10-30

Urban transport systems worldwide are faced by a multitude of challenges. Among the most visible of these are the traffic gridlocks experienced on city roads and highways all over the world. The prescribed solution to transport problems in most cities has thus been to build more infrastructures for cars, with a limited number of cities improving public transport systems in a sustainable manner. However, a number of challenges faced by urban transport systems – such as greenhouse gas emissions, noise and air pollution and road traffic accidents – do not necessarily get solved by the construction of new

infrastructure. Planning and Design for Sustainable Urban Mobility argues that the development of sustainable urban transport systems requires a conceptual leap. The purpose of 'transportation' and 'mobility' is to gain access to destinations, activities, services and goods. Thus, access is the ultimate objective of transportation. As a result, urban planning and design should focus on how to bring people and places together, by creating cities that focus on accessibility, rather than simply increasing the length of urban transport infrastructure or increasing the movement of people or goods. Urban form and the functionality of the city are therefore a major focus of this report, which highlights the importance of integrated land-use and transport planning. This new report of the United Nations Human Settlements Programme (UN-Habitat), the world's leading authority on urban issues, provides some thought-provoking insights and policy recommendations on how to plan and design sustainable urban mobility systems. The Global Report on Human Settlements is the most authoritative and up-to-date global assessment of human settlements conditions and trends. Preceding issues of the report have addressed such topics as Cities in a Globalizing World, The Challenge of Slums, Financing Urban Shelter, Enhancing Urban Safety and Security, Planning Sustainable Cities and Cities and Climate Change.

Handbook of Megacities and Megacity-Regions Danielle Labbé, André Sorensen, 2020-09-25 Exploring the importance of megacities and megacity-regions as one of the defining features of the 21st century, this Handbook provides a clear and comprehensive overview of current thinking and debates from leading scholars in the field. Highlighting major current challenges and dimensions of megaurbanization,

chapters form a thematic focus on governance, planning, history, and environmental and social issues, supported by case studies from every continent.

Managing Smart Cities Anna Visvizi, Orlando Troisi, 2022-02-01 This book adopts the managerial perspective to the study of smart cities. As such, this book is a necessary addition to the existing body of literature on smart cities. The chapters included in this book prove the case that transformation of cities to smart cities is a function of effective and efficient management practices implemented at diverse levels of smart cities. While advances in information and communication technology (ICT) are crucial, it is the ability to apply ICT consciously and efficiently that drives the transformation of cities to smart cities in a manner conducive to cities' sustainability and resilience. The book covers three sets of interconnected topics: Management and decision-making for urban design and infrastructure development Management and decision-making in context of smart cities development Ways of promoting and ensuring participation, representation and co-creation in smart cities These three groups of topics offer a great opportunity to acquire a clear, direct, and practice-driven knowledge and understanding of how effective management allows ICT-enhanced tools and applications to change smart cities, possibly making them smarter.

Behavioural Science and Housing Decision Making Helen Bao, 2020-02-25 This book takes a behavioural approach to examine six important housing questions: tenure decision, gentrification, place attachment, housing bubbles, housing wealth, and residential satisfaction. Using experimental and field data, the book demonstrates the effects of six behavioural biases and heuristics (i.e., anchoring and reference dependence, loss

aversion, mental accounting, endowment effect, herd behaviours, and social comparison) on these housing decisions. The first part of the book introduces the questions and provides a behavioural science toolbox before the second part adopts a real-world case study approach. Real data sets and suggested answers are provided, and the cases come from the UK, USA, and China. Background information is given in each case to facilitate the understanding of the case data and question, as well as the discussions on the results. This book is ideal supplementary reading on a variety of courses such as housing studies, economics, real estate, research methods, and for students and academics who are interested in the application of behavioural science in housing decisions.
