**Getting MAD: Nuclear Mutual Assured Destruction, Its Origins and Practice**, 2004 Nearly 40 years after the concept of finite deterrence was popularized by the Johnson administration, nuclear Mutual Assured Destruction (MAD) thinking appears to be in decline. The United States has rejected the notion that threatening population centers with nuclear attacks is a legitimate way to assure deterrence. Most recently, it withdrew from the Anti-Ballistic Missile Treaty, an agreement based on MAD. American opposition to MAD also is reflected in the Bush administration's desire to develop smaller, more accurate nuclear weapons that would reduce the number of innocent civilians killed in a nuclear strike. Still, MAD is influential in a number of ways. First, other countries, like China, have not abandoned the idea that holding their adversaries' cities at risk is necessary to assure their own strategic security. Nor have U.S. and allied security officials and experts fully abandoned the idea. At a minimum, acquiring nuclear weapons is still viewed as being sensible to face off a hostile neighbor that might strike one's own cities. Thus, our diplomats have been warning China that Japan would be under tremendous pressure to go nuclear if North Korea persisted in acquiring a few crude weapons of its own. Similarly, Israeli officials have long argued, without criticism, that they would not be second in acquiring nuclear weapons in the Middle East. Indeed, given that Israelis surrounded by enemies that would not hesitate to destroy its population if they could, Washington finds Israel's retention of a significant nuclear capability totally understandable.

**Planning and Organizing the Postwar Air Force 1943 - 1947** Herman S.

Wolk,2002-07-01 In this excellent work of narrative and analysis, Herman Wolk of the Office of Air Force History untangles the complex history that led to the birth of the United States Air Force after World War II. After surveying the struggle for independence to 1941, and planning during World War II for a postwar air force, Mr. Wolk details the evens that resulted in the formation of a separate Air Force in September 1947. Significantly, the new Air Force at its birth already possessed a long history and a rich heritage; some forty years as part of the Army, service in two world wars, and a fully developed understanding of its usefulness in war. The new Air Force already possessed leaders who knew that how the service was constructed and how it was led and administered would affect how air power could be used, and whether it could contribute fully to the nation's security.

Contemporary Anarchist Studies Randall Amster,Abraham DeLeon,Luis Fernandez,Anthony J. Nocella, II,Deric Shannon,2009-02-10 This volume of collected essays by some of the most prominent academics studying anarchism bridges the gap between anarchist activism on the streets and anarchist theory in the academy. **Defending Air Bases in an Age of Insurgency** Shannon Caudill,Air University Press,2014-08 This anthology discusses the converging operational issues of air base defense and counterinsurgency. It explores the diverse challenges associated with defending air assets and joint personnel in a counterinsurgency environment. The authors are primarily Air Force officers from security forces, intelligence, and the office of special investigations,

but works are included from a US Air Force pilot and a Canadian air force officer. The authors examine lessons from Vietnam, Iraq, Afghanistan, and other conflicts as they relate to securing air bases and sustaining air operations in a high-threat counterinsurgency environment. The essays review the capabilities, doctrine, tactics, and training needed in base defense operations and recommend ways in which to build a strong, synchronized ground defense partnership with joint and combined forces. The authors offer recommendations on the development of combat leaders with the depth of knowledge, tactical and operational skill sets, and counterinsurgency mind set necessary to be effective in the modern asymmetric battlefield.

**Preparing and Training for the Full Spectrum of Military Challenges** David Eugene Johnson, 2009 The difficult and continually evolving operations in Iraq and Afghanistan show the complexities of what is now termed irregular warfare and highlight the need for new approaches to the security challenges with which the United States is now contending and will likely confront in the future. The research reported in this monograph focused on answering a rather straightforward, but thus far largely unanswered, question: What can the U.S. military learn from other militaries about how better to prepare for full-spectrum operations and deployments? To this end, RAND was asked by the OSD for Personnel and Readiness to examine the militaries of China, France, the UK, India, and Israel.--P. xiii.

*US Nation-Building in Afghanistan (Open Access)* Conor Keane, 2016-03-31 Why has the US so dramatically failed in Afghanistan since 2001? Dominant explanations have ignored the bureaucratic divisions and personality conflicts inside the US state. This book rectifies this weakness in commentary on Afghanistan by exploring the significant role of these divisions in the US's difficulties in the country that meant the battle was virtually lost before it even began. The main objective of the book is to deepen readers understanding of the impact of bureaucratic politics on nation-building in Afghanistan, focusing primarily on the Bush Administration. It rejects the 'rational actor' model, according to which the US functions as a coherent, monolithic agent. Instead, internal divisions within the foreign policy bureaucracy are explored, to build up a picture of the internal tensions and contradictions that bedevilled US nation-building efforts. The book also contributes to the vexed issue of whether or not the US should engage in nation-building at all, and if so under what conditions.

**The Foundations of US Air Doctrine** Barry D. Watts, 2001-10-01 This study analyzes airpower doctrine from the viewpoint of Clausewitzian friction. The result of the analysis is the conclusion that American airpower doctrine has changed very little since the 1930s and that it is fundamentally flawed. Lieutenant Colonel Barry D. Watts has been teaching and writing about military theory since he joined the Air Force Academy faculty in 1974. During the Vietnam War he saw combat with the 8th Tactical Fighter Wing at Ubon, Thailand, completing 100 missions over North Vietnam in June 1968. Subsequently, Lieutenant Colonel Watts flew F-4s from Yokota AB, Japan, and Kadena AB, Okinawa. More recently, he has served as a military assistant to the Director of Net Assessment, Office of the Secretary of Defense, and with the Air Staff's Project CHECKMATE.

*Joint Publication (Jp) 5-0, Joint Planning 16 June 2017* United States

Government US Army, 2018-02-20 Joint Publication (JP) 5-0, Joint Planning 16 June 2017 This edition of Joint Publication (JP) 5-0, Joint Planning, reflects current doctrine for conducting joint, interagency, and multinational planning activities across the range of military operations. This keystone publication is part of the core of joint doctrine and establishes the planning framework for our forces' ability to fight and win as a joint team. As our military continues to serve and protect our Nation in the complex environment of global competition and conflict, we must continually refine our doctrine and update our planning practices based upon those experiences and lessons learned. Our understanding of operations across the spectrum of conflict and the information needed by senior leaders to make strategic and operational-level decisions, developed during the planning process has evolved. This update to JP 5-0 ensures all our operations benefit from the application of our doctrinal planning processes. Likewise, the practice of Adaptive Planning and Execution has continued to evolve since the last publication of JP 5-0. This publication provides necessary updates to that process, as our combatant commands have continued to develop the ability to provide military options for contingencies. Therefore, we seek to develop tools that allow for more rapid development, review, and refinement of plans at the accelerated pace the world requires today. Given that the operational environment is not simple or static, adaptation and flexibility are necessary in planning and execution. This edition of JP 5-0 seeks to provide joint force commanders and their component commanders with processes that allow for that flexibility and the ability to plan and develop plans for an uncertain and challenging environment. Our Armed Forces serve to support our national leadership in attaining national objectives. I encourage leaders to ensure their organizations understand and use joint doctrine and this Joint Publication in particular as you continue to assist our Nation in advancing its enduring interests.
