Alain Badiou

Democracy and Education John Dewey, 1916 John Dewey's *Democracy and Education* addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational and contemplative studies in education and for the necessity of universal education for the advancement of self and society. First published in 1916, *Democracy and Education* is regarded as the seminal work on public education by one of the most important scholars of the century.

Sethian Gnosticism and the Platonic Tradition John Douglas Turner, 2001

Plato's Republic Alain Badiou, 2013-04-25 *Plato's Republic* is one of the most well-known and widely discussed texts in the history of philosophy, but how might we get to the heart of this work today, 2500 years after it was originally composed? Alain Badiou invents a new genre in order to breathe fresh life into Plato's text and restore its universality. Rather than producing yet another critical commentary, he has retranslated the work from the original Greek and, by making various changes, adapted it for our times. In this innovative reimagining of a classic text, Badiou has removed all references specific to ancient Greek society, from the endless exchanges about the moral courage of poets to those political considerations that were only of interest to the aristocratic elite. On the other hand, Badiou has expanded the range of cultural references: here philosophy is firing on all cylinders, and Socrates and his companions are joined by Beckett, Pessoa, Freud and Hegel. They demonstrate the enduring nature of true philosophy, always ready to move with the times. Moreover, Badiou the dramatist has made the Socratic dialogue a true oratorical contest: in his version of the *Republic*, the interlocutors have more in mind than merely agreeing with the Master. They stand up to him, put him on the spot and thereby show thought in motion. Through this work of writing, scholarship and philosophy, we are able, for the first time, to read a version of Plato's text which is alive, stimulating and directly relevant to our world today.

The Craft of Research, 2nd edition Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2008-04-15 Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it.

The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources. New information on the visual representation of data. Expanded bibliography with many electronic sources.

The Topkapi Scroll Gülru Necipoğlu, 1996-03-01 Since precious few architectural drawings and no theoretical treatises on architecture remain from the premodern Islamic world, the Timurid pattern scroll in the collection of the Topkapi Palace Museum Library is an exceedingly rich and valuable source of information. In the course of her in-depth analysis of this scroll dating from the late fifteenth or early sixteenth century, Gülru Necipoğlu throws new light on the conceptualization, recording, and transmission of architectural design in the Islamic world between the tenth and sixteenth centuries. Her text has particularly far-reaching implications for recent discussions on vision, subjectivity, and the semiotics of abstract representation. She also compares the Islamic understanding of geometry with that found in medieval Western art, making this book particularly valuable for all historians and critics of architecture. The scroll, with its 114 individual geometric patterns for wall surfaces and vaulting, is reproduced entirely in color in this elegant, large-format volume. An extensive catalogue includes illustrations showing the underlying geometries (in the form of incised "dead" drawings) from which the individual patterns are generated. An essay by Mohammad al-Asad discusses the geometry of the muqarnas and demonstrates by means of CAD drawings how one of the scroll's patterns could be used to design a three-dimensional vault.

All that is Solid Melts Into Air Marshall Berman, 1983 The experience of modernization -- the dizzying social changes that swept millions of people into the capitalist world -- and modernism in art, literature and architecture are brilliantly integrated in this account.

The Portable Nietzsche Friedrich Nietzsche, 1977-01-27 The works of Friedrich Nietzsche have fascinated readers around the world ever since the publication of his first book more than a hundred years ago. As Walter Kaufmann, one of the world's leading authorities on Nietzsche, notes in his introduction, "Few writers in any age were so full of ideas," and few writers have been so consistently misinterpreted. The Portable Nietzsche includes Kaufmann's definitive translations of the complete and unabridged texts of Nietzsche's four major works: *Twilight of the Idols*, *The Antichrist*, *Nietzsche Contra Wagner* and *Thus Spoke Zarathustra*. In addition, Kaufmann brings together selections from his other books, notes, and letters, to give a full picture of Nietzsche's development, versatility, and inexhaustibility. "In this volume, one may very conveniently have a rich review of one of the most sensitive, passionate, and misunderstood writers in Western, or any, literature." -Newsweek

The Gospel of Thomas and Plato Ivan Miroshnikov, 2018-06-12 In *The Gospel of Thomas and Plato*, Ivan Miroshnikov offers the first systematic discussion of the Platonist impact on the Gospel of Thomas, arguing that Platonism is indispensable to making sense of those sayings that have long remained exegetical cruxes.

Invention in Rhetoric and Composition Janice M. Lauer, 2004 *Invention in Rhetoric and Composition* examines issues that have surrounded historical and contemporary theories and pedagogies of rhetorical invention, citing a wide array of positions on these issues in both primary rhetorical texts and secondary interpretations. It presents theoretical disagreements over the nature, purpose, and epistemology of invention and pedagogical debates over such issues as the relative importance of art, talent, imitation, and practice in teaching discourse. After a discussion of treatments of invention from the Sophists to the nineteenth century, *Invention in Rhetoric and Composition* introduces a range of early twentieth-century multidisciplinary theories and calls for invention's awakening in the field of English studies. It then showcases inventional theories and pedagogies that have emerged in the field of Rhetoric and Composition over the last four decades, including the ensuing research, critiques, and implementations of this inventional work. As a reference guide, the text offers a glossary of terms, an annotated bibliography of selected texts, and an extensive bibliography. Janice M. Lauer is Professor of English, Emerita at Purdue University, where she was the Reece McGee Distinguished Professor of English. In 1998, she received the College Composition and Communication Conference's Exemplar Award. Her publications include *Four Worlds of Writing: Inquiry and Action in Context*, *Composition Research: Empirical Designs*, and *New Perspectives on Rhetorical Invention*, as well as essays on rhetorical invention, disciplinarity, writing as inquiry, composition pedagogy, historical rhetoric, and empirical research.

Genre in a Changing World Charles Bazerman, Adair Bonini, 2009-09-16 Genre studies and genre approaches to literacy instruction continue to develop in many regions and from a widening variety of approaches. Genre has provided a key to understanding the varying literacy cultures of regions, disciplines, professions, and educational settings. *GENRE IN A CHANGING WORLD* provides a wide-ranging sampler of the remarkable variety of current work. The twenty-four chapters in this volume, reflecting the work of scholars in Europe, Australasia, and North and South America, were selected from the over 400 presentations at SIGET IV (the Fourth International Symposium on Genre Studies) held on the campus of UNISUL in Tubarão, Santa Catarina, Brazil in August 2007—the largest gathering on genre to that date. The chapters also represent a wide variety of approaches, including rhetoric, Systemic Functional Linguistics, media and critical cultural studies, sociology, phenomenology, enunciation theory, the Geneva school of educational sequences, cognitive psychology, relevance theory, sociocultural psychology, activity theory, Gestalt psychology, and schema theory. Sections are devoted to theoretical issues, studies of genres in the professions, studies of genre and media, teaching and learning genre, and writing across the curriculum. Signs and Symbols Adrian Frutiger, 1998 Discusses the elements of a sign, and looks at pictograms, alphabets, calligraphy, monograms, text type, numerical signs, symbols, and trademarks.

Cosmic Order and Divine Power Johan C. Thom, 2014-09-18 The treatise *De mundo* offers a cosmology in the Peripatetic tradition which subordinates what happens in the cosmos to the might of an omnipotent god. Thus the work is paradigmatic for the philosophical and religious concepts of the early imperial age, which offer points of contact with nascent Christianity.

The Scientific Revolution Steven Shapin, 2018-11-05 This scholarly and accessible study presents “a provocative new reading” of the late sixteenth- and seventeenth-century advances in scientific inquiry (Kirkus Reviews). In *The Scientific Revolution*, historian Steven Shapin challenges the very idea that any such a “revolution” ever took place. Rejecting the narrative that a new and unifying paradigm suddenly took hold, he demonstrates how the conduct of science emerged from a wide array of early modern philosophical agendas, political commitments, and religious beliefs. In this analysis, early modern science is shown not as a set of disembodied ideas, but as historically situated ways of knowing and doing. Shapin shows that every principle identified as the modernizing essence of science—whether it’s experimentalism, mathematical methodology, or a mechanical conception of nature—was in fact contested by sixteenth- and seventeenth-century practitioners with equal claims to modernity. Shapin argues that this contested legacy is nevertheless rightly understood as the origin of modern science, its problems as well as its acknowledged achievements. This updated edition includes a new bibliographic essay featuring the latest scholarship. “An excellent book.” —Anthony Gottlieb, *New York Times Book Review*

Ekphrasis Murray Krieger, 2019-12-01 Originally published in 1992. What, in apparently pictorial poetry, do words represent? Conversely, how can words in a poem be picturable? Murray Krieger develops a systematic theoretical statement out of answers to such questions. *Ekphrasis* is his account of the continuing debates over meaning in language from Plato to the present. Krieger sees the modernist position as the logical outcome of these debates but argues that more recent theories radically question the political and aesthetic assumptions of the modernists and the two-thousand-year tradition they claim to culminate. Krieger focuses on ekphrasis—the literary representation of visual art, real or imaginary—a form at least as old as its

most famous example, the shield of Achilles verbally invented in the Iliad. He argues that the ekphrastic principle has remained enduringly problematic in that it reflects the resistant paradoxes of representation in words. As he examines the conflict between the spatial and temporal, between vision-centered and word-centered metaphors, Krieger reveals how literary theory has been shaped by the attempts and the deceptive failures of language to do the job of the natural sign.

Shakespeare: Invention of the Human Harold Bloom, 1999-09-01 The indispensable critic on the indispensable writer. -Geoffrey O'Brien, New York Review of Books A landmark achievement as expansive, erudite, and passionate as its renowned author, this book is the culmination of a lifetime of reading, writing about, and teaching Shakespeare. Preeminent literary critic and ultimate authority on the western literary tradition, Harold Bloom leads us through a comprehensive reading of every one of the dramatist's plays, brilliantly illuminating each work with unrivaled warmth, wit and insight. At the same time, Bloom presents one of the boldest theses of Shakespearean scholarships: that Shakespeare not only invented the English language, but also created human nature as we know it today.
