*Cataloging beyond the Notes: Annotating Bibliographic Records for Music Effectively in RDA* Ralph Hartsock, Peter H. Lisius, 2022-06 In *Cataloging beyond the Notes: Annotating Bibliographic Records for Music Effectively in RDA*, authors Ralph Hartsock and Peter Lisius present examples illustrating the effective use of notes in the description of music, and this is especially important with RDA. Since RDA has increased granularity in the description of music, whether in score, recording, video, or data formats, the expert direction offered in *Cataloging beyond the Notes* makes it a key reference for music cataloging. Bibliographic records are presented using MARC21. An essential resource for practicing music catalogers, *Cataloging beyond the Notes* begins with a comprehensive introduction, including instructions on how to use the book, and presents examples of the granular data that

informs users about specific details. In addition, the examples are augmented by the authors' commentary, so that the result is expert guidance in a single, highly accessible publication. More than that, navigation to and from the newer RDA format is facilitated by an appendix keyed to specific RDA details. Frequently used and related terms are also covered in a glossary specific to this volume. Taken as a whole, *Cataloging beyond the Notes* belongs in every music library and on each cataloger's desk.

*Music Learning with Massive Open Online Courses (MOOCs)* L. Steels, 2015-11-24

Massive Open Online Courses, known as MOOCs, have arisen as the logical consequence of marrying long-distance education with the web and social media. MOOCs were confidently predicted by advanced thinkers decades ago. They are undoubtedly here to stay, and provide a valuable resource for learners and teachers alike. This book focuses on music as a domain of knowledge, and has three objectives: to introduce the phenomenon of MOOCs; to present ongoing research into making MOOCs more effective and better adapted to the needs of teachers and learners; and finally to present the first steps towards 'social MOOCs', which support the creation of learning communities in which interactions between learners go beyond correcting each other's assignments. Social MOOCs try to mimic settings for humanistic learning, such as workshops, small choirs, or groups participating in a Hackathon, in which students aided by somebody acting as a tutor learn by solving problems and helping each other. The papers in this book all discuss steps towards social MOOCs; their foundational pedagogy, platforms to create learning communities, methods for assessment and social feedback and concrete experiments. These papers are organized into five sections: background; the role of feedback; platforms for learning communities;

experiences with social MOOCs; and looking backwards and looking forward. Technology is not a panacea for the enormous challenges facing today's educators and learners, but this book will be of interest to all those striving to find more effective and humane learning opportunities for a larger group of students.

**James Bond Will Return** Claire Hines, Terence McSweeney, Stuart Joy, 2024-01-09 For over six decades, James Bond has been a fixture of global culture, universally recognizable by the films' combination of action set pieces, sex, political intrigue, and outrageous gadgetry. But as the British Empire entered the final stages of collapse, as the Cold War wound down and the "War on Terror" began, and as the visions of masculinity and femininity the series presented began to strike many viewers as outdated, the Bond formula has adapted to the changing times. Spanning the franchise's entire history, from Sean Connery's iconic swagger to Daniel Craig's rougher, more visceral interpretation of the superspy, *James Bond Will Return* offers both academic readers and fans a comprehensive view of the series's transformations against the backdrop of real-world geopolitical intrigue and sweeping social changes. Leading scholars consider each of the twenty-five films in the series, showing how and why Bond has changed and what elements of the formula have stood the test of time. Each chapter examines a single film from a distinct position, giving readers a full picture of the variety and breadth of the longest-running series in cinema history. Close formal readings; production histories; tracings of the political, social, and historical influences; analyses of the series' use of then-new

filmmaking technologies; reflections on the star personas that have been built around the character—these and many more approaches combine to produce a wide-ranging view of the James Bond film franchise. Essential reading for Bond scholars and aficionados alike, *James Bond Will Return* brings out the many surprising complexities of an iconic character.

The Audiovisual Cataloging Current Sandra K. Roe, 2013-10-18 Examine crucial issues for audiovisual cataloging-from a variety of perspectives! This vital book addresses both current and historic issues related to audiovisual materials and cataloging. It covers the current cataloging rules for sound recordings (popular music and nonmusic recordings), videorecordings (including DVDs), electronic resources (whether accessed locally or remotely), three-dimensional objects and realia, and kits. Three historical articles chronicle the history of audiovisual catalog in general, the history of cataloging computer files, and the history of The Thesaurus for Graphic Materials. A section on audiovisual materials and

subject access issues includes a chapter which proposes form/genre terms for moving-image materials and a special library's creation and use of a new thesaurus and its availability to assist online catalog users. Finally, four contributions examine audiovisual materials and cataloging from the perspectives of different library types: school, public, academic, and special. The Audiovisual Cataloging Current provides case studies that show: how the National Library of Medicine produces, collects, and catalogs non-print materials the differences between the Moving Image Genre-Form Guide and Library of Congress Subject Headings, with recommendations for improving LCSH as a tool and an exhaustive list of LCSH terms how libraries and organized cataloging groups developed the Chapter 9 descriptive cataloging rules in AACR2 how the Westchester Library System created a user-friendly online catalog for audiovisual materials how the Illinois Fire Service Library improved firefighters' subject access to nonprint fire emergency materials how the National Library of Medicine promotes audiovisual formats and much more!
