Hazardous Waste and Solid David H.F. Liu,Bela G. Liptak,1999-12-16 Hazardous Waste and Solid Waste covers the life of municipal solid waste, bulky (C&D) waste and hazardous waste. It provides in-depth coverage on all aspects of waste characterization, treatment, disposal, and recovery. The book identifies the sources of solid waste, provides general information of the quantities of waste generated and discarded, and examines the potential effects of solid waste on daily life and the environment. It also defines hazardous waste, and provides the criteria environmental engineers must use to determine if material is indeed a waste. The editors give attention to the unique problems of risk assessment, including the Hazard Ranking System and the National Priority List, and transport of hazardous materials. It addresses radioactivity individually, with sections devoted to the principles and sources of radioactivity, safety standards, detection, analysis, recovery, low-level radioactive waste, and high-level radioactive waste. The guide explores municipal waste reduction, material recovery and refuse-derived fuel within a catalog of options for solid waste. Hazardous and Solid Waste is an excellent fundamental resource for those involved in any aspect of waste management. Béla G. Lipták speaks on Post-Oil Energy Technology on the AT&T Tech Channel.

Information Visualization Robert Spence,2014-11-03 Information visualization is the act of gaining insight into data, and is carried out by virtually everyone. It is usually facilitated by turning data – often a collection of numbers – into images that allow much easier comprehension. Everyone benefits from information visualization, whether internet shopping, investigating fraud or indulging an interest in art. So no assumptions are made about specialist background knowledge in, for example, computer science, mathematics, programming or human cognition. Indeed, the book is directed at two main audiences. One comprises first year students of any discipline. The other comprises graduates – again of any discipline – who are taking a one- or two-year course of training to be visual and interaction designers. By focusing on the activity of design the pedagogical approach adopted by the book is based on the view that the best way to learn about the subject is to do it, to be creative: not to prepare for the ubiquitous examination paper. The content of the book, and the associated exercises, are typically used to support five creative design exercises, the final one being a group project mirroring the activity of a consultancy undertaking a design (not an implementation) for a client. Engagement with the material of this book can have a variety of outcomes. The composer of a school newsletter and the applicant for a multi-million investment should both be able to convey their message more effectively, and the curator of an exhibition will have new presentational techniques on their palette. For those students training to be visual/interaction designers the exercises have led to original and stimulating outcomes.

The International Criminal Court Olympia Bekou,2017-11-28 The creation of the International Criminal Court (ICC) in 1998 represented an important step in the international effort to repress genocide, war crimes and crimes against humanity. As there has been enormous scholarly discussion of the ICC, it is difficult and time-consuming to obtain the best writing on the subject. This volume collects the foremost analyses of each part of the ICC to form a convenient reference tool for all those wishing to understand perhaps the most important legal development of the past two decades.

Ongoing Research on Microgreens Vito Michele Paradiso,Massimiliano Renna,2021-01-27 Microgreens garner immense potential for improving the nutrition of the human diet, considering their high content of healthy compounds. On the other hand, they are becoming known not only for their nutritional value but also for their interesting organoleptic traits and commercial potential. In this Special Issue we aim to publish high-quality research papers covering the state-of-the-art, recent progress and perspectives related to production, post-harvest, characterization, and the potential of microgreens. A broad range of aspects such as cultivation, post-harvest techniques and packaging, analytical methods, nutritional value, bioaccessibility and prospects are covered. Four Kinds of Rain Robert Ward,2012-05-01 Broke, recently divorced, and a total deadbeat, Bob Wells has spent his life as a psychiatrist only doing good in the world. When one of his patients with clear paranoid delusions starts to lose a grip, Bob has no choice but to intervene. Emile Bardan is haunted by demons, and he believes that someone is trying to steal his most prized possession, the legendary Mask of Utu. Bob thinks it's all part of Emile's imagination until he discovers that Emile is telling the truth and that the mask is worth millions. It's Bob who may actually be the one losing his grip. He's tired of helping people for nothing, tired

of being treated like dirt—and while he may have met the girl of his dreams, he doesn’t want to lose her because he can’t take care of her. There is only one thing to do: Bob is going to steal the mask himself: But doing so may mean making the biggest mistake of all—as he proceeds down a path into a dark abyss from which there is no return.

Coronary Magnetic Resonance Angiography Andre J. Duerinckx,2006-05-05 In recent years, there has been increasing interest in the clinical applications of coronary angiography techniques. Coronary MRA can be instrumental in the evaluation of congenital coronary artery anomalies, however, the complexity of advanced MR pulse sequences and strategies may be overwhelming to many. Coronary MR Angiography demystifies the art of coronary MRA by providing a text in plain language with clearly illustrated imaging steps and protocols. Designed to bridge the gap between radiology and cardiology, it is written for physicians and scientists planning to incorporate this technique into their research or practice.
