Highway Statistics 2007 United States. Federal Highway Administration,2007 The Highway Statistics Series consists of annual reports containing analyzed statistical data on motor fuel; motor vehicles; driver licensing; highway-user taxation; State and local government highway finance; highway mileage, and Federal aid for highways. This data is presented in tabular format as well as selected charts and has been published each year since 1945. Every ten years since 1945, a Summary of Highway Statistics has been published. These publications include a general summary of information on highways, their use, and financing. Much of the same data as shown in the annual series are provided in yearly trend format to the current year. All highway data are submitted by the States. Each State is analyzed for consistency against its own past years of data and also against other State and Federal data.
