Mark Synnott

Melting Away Camille Seaman, 2014-12-02 For ten years Camille Seaman has documented the rapidly changing landscapes of Earth's polar regions. As an expedition photographer aboard small ships in the Arctic and Antarctic, she has chronicled the accelerating effects of global warming on the jagged face of nearly fifty thousand icebergs. Seaman's unique perspective of the landscape is entwined with her Native American upbringing: she sees no two icebergs as alike; each responds to its environment uniquely, almost as if they were living beings. Through Seaman's lens, each towering chunk of ice—breathtakingly beautiful in layers of smoky gray and turquoise blue—takes on a distinct personality, giving her work the feel of majestic portraiture. *Melting Away* collects seventy-five of Seaman's most captivating photographs, lifeaffirming images that reveal not only what we have already lost, but more importantly what we still have that is worth fighting to save.

Ice in the Ocean Peter Wadhams, 2000-10-31 *ICE in the Ocean* examines sea ice and icebergs and their role in the global climate system. It is comprehensive textbook suitable for students, pure and applied researchers, and anyone interested in the polar oceans; the distribution of sea ice; the mechanisms of growth, development and decay; the thermodynamics and dynamics of sea ice; sea ice deformation and ridge-building; the role of marginal ice zones; the characteristics of icebergs; and the part played by sea ice in the climate system and in the transport of pollutants. An extensive reference list and recommendations for further reading and numerous illustrations, and add to the usefulness of the text.

The Third Pole Mark Synnott, 2021-04-13 ***NPR Books We Love selection*** “If you’re only going to read one Everest book this decade, make it *The Third Pole*. . . . A riveting adventure.”—Outside Shivering, exhausted, gasping for oxygen, beyond doubt . . . A hundred-year mystery lured veteran climber Mark Synnott into an unlikely expedition up Mount Everest during the spring 2019 season that came to be known as “the Year Everest Broke.” What he found was a gripping human story of impassioned characters from around the globe and a mountain that will consume your soul—and your life—if you let it. The mystery? On June 8, 1924, George Mallory and Sandy Irvine set out to stand on the roof of the world, where no one had stood before. They were last seen eight hundred feet shy of Everest’s summit still “going strong” for the top. Could they have succeeded decades before Sir Edmund Hillary and Tenzing Norgay? Irvine is believed to have carried a Kodak camera with him to record their attempt, but it, along with his body, had never been found. Did the frozen film in that camera have a photograph of Mallory and Irvine on the summit before they disappeared into the clouds, never to be seen again? Kodak says the film might still be viable. . . . Mark Synnott made his own ascent up the infamous North Face along with his friend Renan Ozturk, a filmmaker using drones higher than any had previously flown. Readers witness first-hand how Synnott’s quest led him from oxygen-deprivation training to archives and museums in England, to Kathmandu, the Tibetan high plateau, and up the North Face into a massive storm. The infamous traffic jams of climbers at the very summit immediately resulted in tragic deaths. Sherpas revolted. Chinese officials turned on Synnott’s team. An Indian woman miraculously crawled her way to frostbitten survival. Synnott himself went off the safety rope—one slip and no one would have been able to save him—committed to solving the mystery. Eleven climbers died on Everest that season, all of them mesmerized by an irresistible magic. *The Third Pole* is a rapidly accelerating ride to the limitless joy and horror of human obsession.

Deception Point Dan Brown, 2019-07-30 From the #1 New York Times bestselling author of *The Da Vinci Code*, *Angels & Demons*, and *Inferno* and the “master of smart thrills” (People) comes a “rocket-fast thriller” (Vince Flynn) about an astonishing NASA discovery that unravels a deadly conspiracy that leads all the way to the White House. When a NASA satellite spots evidence of an astoundingly rare object buried deep in the Arctic ice, the floundering space agency proclaims a much-needed victory—one that could have profound implications for US space policy and the impending presidential election. With his re-election hanging in the balance, the President sends White House Intelligence analyst Rachel Sexton to the Milne Ice Shelf to verify the authenticity of the find. Accompanied by a team of experts, including the charismatic academic Michael Tolland, Rachel uncovers the unthinkable: evidence of scientific trickery. Before she can contact the President, she and Michael are attacked by a deadly team of assassins controlled by a mysterious power broker who will stop at nothing to hide the truth. Fleeing for their lives in an environment as desolate as it is lethal, their only hope for survival is to find out who is behind this masterful ploy. The truth, they will learn, is the most shocking deception of all in this “taut, fast-paced, barn-burner of a book” (St. Petersburg Times).

Eyes as Big as Plates Karoline Hjorth, Riitta Ikonen, 2017 *Eyes as Big as Plates* is an ongoing collaborative photography and sculpture project by Norwegian-Finnish artist duo Karoline Hjorth and Riitta Ikonen (both born 1980). Initially a play on characters from Nordic folklore, the series has evolved into a search for the human connection to nature. Hjorth & Ikonen work together throughout the process with their complementary skills (Karoline is the photographer in the duo, while Riitta works mainly with the creation of the wearable sculptures). Since 2011 the duo has collaborated with retired farmers, fishermen, zoologists, plumbers, opera singers, housewives, artists and academics. Each character inhabits the landscape in a wearable sculpture made from natural materials. The book features portraits, field notes, essays and behind-the-scenes stories from many of the project's 60 shoots. With international press coverage in the Huffington Post, the BBC, TIME LightBox, Life and elsewhere, plus a highly successful Kickstarter campaign attracting a large American audience, the series has developed into a project with universal appeal.

Global Warming Bharat Raj Singh, 2015-04-22 Global warming has become perhaps the most complicated issue facing world leaders. It is becoming clear that humans have caused most of the past century's warming by releasing heat-trapping gases as we power our modern lives mainly by the burning of fossil fuels and forests. Whatever the uncertainties of climate models are, mankind has to strive very fast toward reduction in the huge amount of greenhouse gases emitted into the atmosphere in order to preserve natural resources and living organisms by introducing new advances on alternative fuels and other related technologies. This book presents the state-of-the-science fundamentals on the origin of Global Warming. The aim of the book is to create awareness among the energy engineers, academicians, researchers, industry personnel and society as a whole to help to stop the impact of climate change. In this book, chapters received from various authors are placed in three sub- sections - Causes of Global Warming, Impacts / Threats / Consequences of Global Warming and Remedies to the Global Warming.
