Instant Christopher Bonanos,2012-08-10 Pictures in a minute! In the 1950s, '60s, and '70s, Polaroid was the hottest technology company on Earth. They were an innovation machine that cranked out one irresistible product after another. It was even the company after which Steve Jobs is said to have modeled Apple, and the comparison is true. Jobs's hero, Edwin Land, Polaroid's visionary founder, turned his 1937 garage startup into a billion-dollar pop-culture phenomenon. *Instant: The Story of Polaroid*, a richly illustrated, behind-the-scenes look at the company, tells the tale of Land's extraordinary and beloved invention. From the introduction of Polaroid's first instant camera in 1948 to its meteoric rise and dramatic collapse into bankruptcy in the 2000s, *Instant* is both a cautionary tale about tech companies that lose their edge and a remarkable story of American ingenuity. Written in a breezy, accessible tone by New York magazine senior editor Chris Bonanos, this first book-length history of Polaroid also features colorful illustrations from Polaroid's history, including the company's iconic branding and marketing efforts.

Polaroid Alan R. Earls,Nasrin Rohani,2005 Edwin Land and Polaroid, the company he created in the 1930s, have spawned many bold scientific innovations over the years. Most of them led quickly to unique commercial products. Best known for revolutionary instant photography systems, Land and Polaroid also achieved miracles in light-polarizing technology that is embedded in many of today's consumer products. During World War II, Polaroid manufactured and created a large array of products for the U.S. military; later, Land's top-secret cold war initiatives led to crucial intelligence breakthroughs. *Polaroid* features images of signature innovations, scientists, and photographers who pioneered the use of Polaroid film.

Perfect Digital Photography Jay Dickman,Jay Kinghorn,2005-11-04 Written by photography experts--including a Pulitzer-Prize winning National Geographic photographer--this full-color book is a must-have for amateur photographers serious about improving both the quality of their photographs and their proficiency in the digital darkroom. The book is the perfect combination of a technical treatise on digital imaging and an artistic exploration of light, composition, and form, allowing you to glean the essential techniques needed for digital photography without losing sight of the artistic and aesthetic aspects of the craft. Using an easy-to-follow approach, the authors explain the image conceptualization process through shooting, editing, and image correction to finished print. In addition, top photographers from a variety of disciplines offer real-world advice on how they use digital photography to create compelling images for high-profile magazine articles, advertising campaigns, and fine art prints.

The Art of RAW Conversion Uwe Steinmueller,Jürgen Gulbins,2006 The authors (both experts in digital photography, file processing, printing, and color management) describe the conversion tools used to enhance RAW files and maximize photo quality. All techniques covered are based on practical experience and explained with step-by-step instructions.

Fundamentals of Business (black and White) Stephen J. Skripak,2016-07-29 (Black & White version) *Fundamentals of Business* was created for Virginia Tech's MGT 1104 Foundations of Business through a collaboration between the Pamplin College of Business and Virginia Tech Libraries. Light and Film ,1981 The topics in this edition are the basic ones a photographer must face before taking a picture. Once mastered, they provide him with a firmer grasp on the materials of his profession, his craft or his art.

The Athenian Decadrachm Wolfgang Fischer-Bossert,2022-03 The first monograph in over 35 years in any language to study the coinage of classical Athens. It collects for the first time the evidence for the largest denomination ever produced by the Athenian state, the ten-drachma piece,

and situates the coinage within its social, political and economic background. This book represents a huge advance on the previous study of the material, Chester Starr's Athenian coinage, 480-449 B.C. (Oxford, 1970). Fischer-Bossert has collected more than three times as many specimens as were known to Starr, and has provided a full account of the known forgeries drawn from the photo-files of major dealers, scholars and museums. A die-study of forty genuine Athenian decadrachms in public and private collections is provided, together with a catalogue of more than ninety modern forgeries. Almost all are illustrated. This will be an indispensable work for all interested in the coinage and history of 5th-century Athens. In addition, its judicious discussion of the history of the forgery of these remarkable coins will make this volume a handbook for all serious collectors of ancient Greek coinage.

Using Information Technology Brian K. Williams, Stacey C. Sawyer, Sarah E. Hutchinson, 1999

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Natural Magic John Baptista Porta,2014-03-29 This Is A New Release Of The Original 1658 Edition.

My First Recession Geert Lovink,2003 My First Recession starts when the party is over. This study maps the transition of critical Internet culture from the mid-to-late 1990s Internet craze to the dotcom crash, the subsequent meltdown of global financial markets, and 9/11. In his discussion of the dotcom boom-and-bust cycle, Geert Lovink lays out the challenges faced by critical Internet culture today. In a series of case studies, Lovink meticulously describes the ambivalent attitude that artists and activists take as they veer back and forth between euphoria and skepticism. As a part of this process, Lovink examines the internal dynamics of virtual communities through an analysis of the use of moderation and collaborative filtering on mailing lists and weblogs. He also confronts the practical and theoretical problems that appear as artists join the growing number of new-media education programs. Delving into the unexplored gold mines of list archives and weblogs, Lovink reveals a world that is largely unknown to both the general public and the Internet visionaries.

Cabin, Quarter, Plantation Clifton Ellis,Rebecca Ginsburg,2010 This important work brings together the best writing in the field, including classic pieces on slave landscapes by W.E.B. DuBois and Dell Upton, alongside new essays on such topics as the building methods that Africans brought to the American South and information about slave family units and spiritual practices that can be gathered from archaeological remains. Through deep analysis of the built environment the authors invite us to reconsider antebellum buildings, landscapes, cabins, yards, and garden plots, and what these sites can teach us about the real conditions of enslavement. The starting point in any study of slavery and the built environment, this anthology makes an essential contribution to the cultural history of the United States. --Résumé de l'éditeur.
