Popcorn Cleans Up Muhammad Fayed, 2005-10 Fear and greed play into life in both negative and positive ways. They are also the reason for this book. I have written about the fear and greed I faced in trying to bring my discovery to light. What follows is an account of events that resulted in the decision to write this book. When I made my surprising discovery that popcorn can remove trace contaminants from water and air, I was overwhelmed. I was discreet when speaking with my trusted colleagues, who were senior professors and administrators at my home university. We all thought it would be a good idea to arrange a meeting with the president of the school. In the fall of 1996, we saw this discovery as an opportunity for the university to develop a research program to explore new frontiers on popcorn's ability to clean water and air. Meanwhile, the college could raise funds to support research work based on my discovery. For many reasons, not least of which popcorn is perhaps the most famous American snack, my colleagues and I thought the discovery would generate interest from environmental and industrial communities, as well as from the public. The invention turned out to be a novel discovery. After years of research work and help from individuals and small companies, I had enough data to apply for United States and Canadian patents. During these years, I contacted a few popcorn-processing companies in the USA and Canada to interest them in this discovery. The outcome was one of enthusiastic reinforcement. These companies conducted tests that validated this genuine discovery. At a meeting with senior officers from one of these companies, I was asked how is it that we who are in the popcorn business did not make this discovery, and you did? My answer was simply, I was inspired. As time went by I was granted two US patents based on my breakthrough, in addition to a few patent pending applications. Over the last number of years I have come to feel that the David and Goliath story was becoming my own. This struggle is one shared by many independent individual inventors with limited financial resources when their inventions are disclosed to big corporations. Once revealed the great danger becomes infringement, which requires large financial resources and a great amount of time to fight. The big corporations know it, and can afford the resources required to endure litigation. My family and I discussed the merits of continuing negotiations with interested companies, or making my discovery public. My joy of publishing this book are thrice. First, by placing this knowledge in the public domain I hope to preempt any malicious corporate efforts to develop this work. Second, I hope to generate interest by those who would work with me to develop and exploit this breakthrough for the good of our environment. Finally, I wish for my readers to remember the potential health and environmental benefits of popcorn even when it is enjoyed in its popular form as America's favorite snack. It is my personal hope that this book will encourage environmental and health conscious researchers to look deeper into new frontiers and wonders of the great American snack, Popcorn.

Popped Culture Andrew F. Smith,2021-11-24 The history, legends, and cookery of America's favorite snack food Whether in movie theaters or sports arenas, at fairs or theme parks, around campfires or family hearths, Americans consume more popcorn by volume than any other snack. To the world, popcorn seems as American as baseball and apple pie. Within American food lore, popcorn holds a special place, for it was purportedly shared by Native Americans at the first Thanksgiving. In *Popped Culture*, Andrew F. Smith tests such legends against archaeological, agricultural, culinary, and social findings. While debunking many myths, he discovers a flavorful story of the curious kernel's introduction and ever-increasing consumption in North America. Unlike other culinary fads of the nineteenth century, popcorn has never lost favor with the American public. Smith gauges the reasons for its unflagging popularity: the invention of wire over the fire poppers, commercial promotion by shrewd producers, the fascination of children with the kernel's magical pop, and affordability. To explain popcorn's twentieth-century success, he examines its fortuitous association with new technology—radio, movies, television, microwaves—and recounts the brand-name triumphs of American manufacturers and packagers. His familiarity with the history of the snack allows him to form expectations about popcorn's future in the United States and abroad. Smith concludes his account with more than 160 surprising historical recipes for popcorn cookery, including the intriguing use of the snack in custard, hash, ice cream, omelets, and soup.

Handbook on Maize (Corn) Processing and Manufacture of Maize Products (Oil, Starch, Corn Steep Liquor, Syrup, Cornmeal, Popcorn, Flakes, Gluten, Husk, Anhydrous Dextrose, High Maltose Syrup, Maltodextrin Powder, Monohydrate Dextrose, Sorbitol, Ethanol, Cattle Feed with Manufacturing Processes, Equipment Details and Plant Layout) P. K.

Chattopadhyay,2022-03-22 In India, maize is becoming third most significant crop. Its significance stems from the fact that it is utilised not only for human food and animal feed, but also for corn starch manufacturing, corn oil production, and the generation of baby corns. Additionally, maize stover, the leaves and stalk of the maize plant, is used for forage, biofuel production, and chemical production. Corn is also processed into a multitude of food and industrial products including:- Ø Corn Starch is a yellow powder made from finely ground, dried corn, while cornstarch is a fine, white powder made from the starchy part of a corn kernel. Ø High fructose corn syrup (HFCS) is a sweetener derived from corn syrup, which is processed from corn. Ø Corn oil contains some healthy components like vitamin E and phytosterols, but overall it's not considered a healthy fat. Ø Corn ethanol is produced from corn biomass and is the main source of ethanol fuel, mandated to be blended with gasoline in the Renewable Fuel Standard. Ø Some strains of corn (*Zea mays*) are cultivated specifically as popping corns. Ø Dextrose Anhydrous can be used as sweetener in baked goods, candies, gums, dairy products like some ice-creams and frozen yogurts, canned foods, cured meats etc. Ø Maltose is a sugar that

tastes less sweet than table sugar. It contains no fructose and is used as a substitute for high-fructose corn syrup. Ø Maltodextrin is a white powder made from corn. To make it, first the starches are cooked, and then acids or enzymes such as heat-stable bacterial alpha-amylase are added to break it down further. Ø Dextrose is the name of a simple sugar made from corn that's chemically identical to glucose, or blood sugar. Ø Sorbitol, or glucitol as it is sometimes called, is a slow-metabolizing sugar alcohol derived from fruits, corn and seaweed. The global maize market is expected to grow at a CAGR of 3.8%. The factors that affect the demand for starch mainly include population growth and industrial development of a country; specifically the food and beverage, textiles, paper and printing, pharmaceuticals and other health and beauty products, and adhesives. The demand for high-fructose corn syrup (HFCS) sweeteners across the country is majorly due to its wide usage in the confectionery, bakery, and beverage industries, especially soft drink manufacturing. Rising health awareness among consumers has resulted into increasing preference for corn oil due to its health benefits. More ethanol production means more demand for corn. According to the most recent statistics released by the U.S. Department of Agriculture, 35%, or 5.25 billion bushels, of the projected 15.062 billion bushels of corn harvested will be processed into ethanol. The book covers a wide range of topics connected to Maize Products, as well as their manufacturing processes. It also includes contact information for machinery suppliers, as well as images of equipments. A complete guide on Maize (Corn) Processing and Manufacture of Maize Products manufacture and entrepreneurship. This book serves as a one-stop shop for everything you need to know about the Maize manufacturing industry, which is ripe with opportunity for manufacturers, merchants, and entrepreneurs. This is the only book that covers Maize (Corn) Processing and Manufacture of Maize Products in depth. From concept through equipment procurement, it is a veritable feast of how-to information.
