**The Portable Conrad** Joseph Conrad, 2007-11-27 A collection of Conrad's most enduring work, edited by Pulitzer Prize finalist Michael Gorra A great novelist of the sea, a poet of the tropics, a critic of empire and analyst of globalization, a harbinger of the modern spy novel, an unparalleled observer of the moments in which people are stripped of their illusions-Joseph Conrad is one of the greatest writers of the twentieth century. This revised edition of The Portable Conrad features the best known and most enduring of Conrad's works, including The Secret Agent, Heart of Darkness, and The Nigger of the Narcissus, as well as shorter tales like Amy Forster and The Secret Sharer, a selection of letters, and his observations on the sinking of the Titanic. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

**Portable Postsocialisms** Paloma Duong, 2024-01-02 A study of Cuban culture and media in the twenty-first century as both a global phenomenon and a local reality, at a time when the declared death of socialism coexists in tension with emerging anticapitalist movements worldwide. Why does Cuban socialism endure as an object of international political desire, while images of capitalist markets consume Cuba's national imagination? This bold new study argues that Cuba's changing media cultures are key to our understanding of the global postsocialist condition and its competing political imaginaries. Portable Postsocialisms calls on a vast multimedia archive to offer a groundbreaking cultural interpretation of Cuban postsocialism. Paloma Duong examines songs, artworks, advertisements, memes, literature, jokes, and networks that refuse exceptionalist and exoticizing visions of Cuba. Expanding postsocialist critical theory to read this complex mediascape, Duong argues that a materialist critique of Cuba's revolutionary legacy must account for Cubans' everyday demands for agency and self-representation. This long overdue reassessment of Cuba's place in Latin American and post-Marxist studies shows Cuban postsocialism to be an urgent and indispensable referent for core debates on the politics of participatory cultures in new media studies. Portable Postsocialisms performs the crucial task of redefining how we envision imaginaries of social change in Latin America and the Caribbean.

Information Ecology Thomas H. Davenport,1997-06-26 According to virtually every business writer, we are in the midst of a new information age, one that will revolutionize how workers work, how companies compete, perhaps even how thinkers think. And it is certainly true that Information Technology has become a giant industry. In America, more than 50% of all capital spending goes into IT, accounting for more than a third of the growth of the entire American economy in the last four years. Over the last decade, IT spending in the U.S. is estimated at 3 trillion dollars. And yet, by almost all accounts, IT hasn't worked all that well. Why is it that so many of the companies that have invested in these costly new technologies never saw the returns they had hoped for? And why do workers, even CEOs, find it so hard to adjust to new IT systems? In Information Ecology, Thomas Davenport proposes a revolutionary new way to look at information management, one that takes into account the total information environment within an organization. Arguing that the information that comes from computer systems may be considerably less valuable to managers than information that flows in from a variety of other sources, the author describes an approach that encompasses the company's entire information environment, the management of which he

calls information ecology. Only when organizations are able to combine and integrate these diverse sources of information, and to take them to a higher level where information becomes knowledge, will they realize the full power of their information ecology. Thus, the author puts people, not technology, at the center of the information world. Information and knowledge are human creations, he points out, and we will never excel at managing them until we give people a primary role. Citing examples drawn from his own extensive research and consulting including such major firms as A.T. & T., American Express, Ford, General Electric, Hallmark, Hoffman La Roche, IBM, Polaroid, Pacific Bell, and Toshiba Davenport illuminates the critical components of information ecology, and at every step along the way, he provides a quick assessment survey for managers to see how their organization measures up. He discusses the importance of developing an overall strategy for information use; explores the infighting, jealousy over resources, and political battles that can frustrate information sharing; underscores the importance of looking at how people really use information (how they search for it, modify it, share it, hoard it, and even ignore it) and the kinds of information they want; describes the ideal information staff, who not only store and retrieve information, but also prune, provide context, enhance style, and choose the right presentation medium (in an age of work overload, vital information must be presented compellingly so the appropriate people recognize and use it); examines how information management should be done on a day to day basis; and presents several alternatives to the machine engineering approach to structuring and modeling information. Davenport makes explicit what many managers already know in their gut: that useful information flow depends on people, not equipment. In Information Ecology he paves the way for all managers to build a more competitive, creative, practical information environment for their companies.
