Electronic Shorthand Michelle Campbell-Scott,2019-02-28 If you can never find a pen but always have an electronic device, Electronic Shorthand might be for you! If you need to take notes for study, business, hobbies, or memory problems, Electronic Shorthand could be the answer to your problems. It's a quick and easy-to-learn method of taking notes on an electronic device - a smartphone, tablet, or computer. Unlike traditional shorthand, it doesn't involve learning a whole new language, it's similar to 'texting' but with a few simple rules. It will enable you to take extensive notes, quickly and easily, and have them available anywhere in the cloud - without having to transcribe them or type them up afterwards. This is ideal for students and anyone who studies online or off. It's also great for reporters - you don't need to invest years into learning Pitman or Gregg or Teeline, and you won't need to worry about storing your notebooks or bits of paper. Business people love this method for taking down client briefs, networking/conference notes, and for organizing their lives. Electronic Shorthand could save you hassle, stress, and confusion.

Zoom-Type Renee R Ellison,2004-02-03 Teach yourself how to type in 5 days instead of wasting all year on it. Zoom-Type is a revolutionary breakthrough in teaching touch-typing FAST by using the right brain. 100s of quick snapshots and a musical finger march get you seeing, saying, and tapping the correct keys with the correct fingers in just 5 days (each session lasts 5 minutes). For ages 4 to 94. Totally portable-no computer necessary. This is the only right-brain typing course on the market. You'll be speed-typing while students trying other programs are still just getting started. Most computer-based programs designed to teach typing are still in the dark ages, pedagogically. The brain learns best by pictures. This typing course is unique in 3 ways: (1) Spaced repetition-five-minute lessons, several times a day! Away with hour-long drudgery! Rapid-fire quick imprints of the autonomic nervous system gets the job done. (2) Right brain-uses the picture side of the brain, not just the left side as other typing methods do. With Zoom-Type, you subconsciously learn where the letters LIVE, not just what they ARE. (3) Splintered skills-you learn each skill separately, in small increments, and then when you put them together all the brain has to do is jump the synapses between the already acquired mini-skills. The brain is tricked into thinking the whole task is super EASY. THIS VERSION IS ONLY THE PAPERBACK BOOK. IT IS POSSIBLE TO LEARN THIS PROGRAM WITH ONLY THIS BOOK, BUT USING THE AUDIO FILES IS HIGHLY RECOMMENDED. Contact Homeschool How-Tos at HOMESCHOOLHOWTOS.COM to order those MP-3 files for immediate download via WeTransfer.com after you received this book.
