The I-search Paper Ken Macrorie,1988 This revised and retitled edition of Searching Writing includes two additional I-Search papers, one by a teacher, and a new chapter entitled The Larger Context, which shows how the I Search concept can work throughout the whole curriculum in school and college. As with the first edition, The I-Search Paper is more than just a textbook; it's a new form of instructional help -- a context book -- that shows students what authority is in matters of learning and invites them to join the author and teacher in the educational movement called Writing to Learn. To put this book in the hands of all the students in the course is not only to help them carry out an I-Search but to introduce them in a delightful way to the resources and tools of intellectual inquiry -- but one that never forgets the emotional or physical side of human activity. This is a rare textbook that treats students as partners in learning. It shows what it is to take charge of one's own learning and suggests that this move is one that productive people keep making throughout their lives.

PoC or GTFO Manul Laphroaig,2017-10-31 This highly anticipated print collection gathers articles published in the much-loved International Journal of Proof-of-Concept or Get The Fuck Out. PoC||GTFO follows in the tradition of Phrack and Uninformed by publishing on the subjects of offensive security research, reverse engineering, and file format internals. Until now, the journal has only been available online or printed and distributed for free at hacker conferences worldwide. Consistent with the journal's quirky, biblical style, this book comes with all the trimmings: a leatherette cover, ribbon bookmark, bible paper, and gilt-edged pages. The book features more than 80 technical essays from numerous famous hackers, authors of classics like Reliable Code Execution on a Tamagotchi, ELFs are Dorky, Elves are Cool, Burning a Phone, Forget Not the Humble Timing Attack, and A Sermon on Hacker Privilege. Twenty-four full-color pages by Ange Albertini illustrate many of the clever tricks described in the text.

<u>Picture-Book Professors</u> Melissa M. Terras,2018-10-04 How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children. Professors are overwhelmingly white and male, tending to be elderly scientists who fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. The Element is also available, with additional material, as Open Access.

The autonomous life? Nazima Kadir,2016-06-07 This electronic version has been made available under a Creative Commons (BY-NC-SA) open access license. The Autonomous Life? is an ethnography of the squatters' movement in Amsterdam written by an anthropologist who lived and worked in a squatters' community for over three years. During that time she resided as a squatter in four different houses, worked on two successful anti-gentrification campaigns, was evicted from two houses and jailed

once. With this unique perspective, Kadir systematically examines the contradiction between what people say and what they practice in a highly ideological radicalleftcommunity. The squatters' movement defines itself primarily as anti-hierarchical and anti-authoritarian, and yet is perpetually plagued by the contradiction between this public disavowal and the maintenance of hierarchy and authority within the movement. This study analyses how this contradiction is then reproduced in different micro-social interactions, examining the methods by which people negotiate minute details of their daily lives as squatter activists in the face of a fun house mirror of ideological expectations reflecting values from within the squatter community, that, in turn, often refract mainstream, middle-class norms. Using a unique critical perspective informed by gender and subaltern studies, this study contributes to social movements literature through a meticulous analysis of the production of power and hierarchy in a social movement subculture.

Using and programming the Epson HX-20 portable computer E. Balkan,2012-12-06 Why this book? Other than the fact that I like writing about computers more than just about anything else, this book fills several real needs. No matter how many manuals a computer manufacturer puts out to accompany a syste- and some of Epson America's are very good - not everything can be covered. This book fills in the gaps. This book is unbiased, having been written independently of Epson. So, I won't be telling you to drop everything and run out to buy an HX-20. The HX- 20 is good for some uses, not so good for some others. This book is a guide to out of the machine and/or pointing you towards a different getting the most machine that might better suit your needs. At the start of this project I had to decide who was my target audience: novices, experts, or those in between? Because HX-20 owners and prospective owners don't fall into neat categories, I tried to 'cover all the bases'. Or at least as many as possible. As with any attempt to do everything, I didn't always succeed. But I did succeed in providing at least something for everyone. For those who haven't yet bought a portable - or are unsure if buying an HX-20 was the right move - there are descriptions of 20 other portables on the market. For those who have used other computers before, there's information on how Epson BASIC differs from other BASICs, with tips on converting programs.
