An Industry Analysis of the MBA Market and the Competitive Positioning of the GSBPP. ,2007 The purpose of this Master of Business Administration (MBA) project is to perform an industry analysis of the MBA market utilizing the principles of industry analysis noted in Michael Porter's Five Forces Analysis model. The intent of this project is to create an awareness of how these competitive forces: shape the MBA market, define the relationships between stakeholders within the market, and affect the overall attractiveness of the MBA market. The goal is to provide GSBPP policy makers a tool to assist in the understanding of the industry environment and the development of a sustainable competitive position for the GSBPP. The authors believe the GSBPP can benefit greatly from this knowledge. The starting point of this project was to perform a comprehensive search and analysis of secondary resources for data concerning the nature of competition, incentives of buyers (students and employers/recruiters) and sellers (faculty), and threat of substitutes within the MBA market. It is noted that the nature of competition is a critical force affecting the MBA market, as an MBA program's reputation drives almost all aspects of its strategy. Full understanding of these market forces should help enable the GSBPP to aptly compete in this market.

International Strategy David Collis,2014-10-06 THE COMPREHENSIVE GUIDE TO MANAGING AND LEADING COMPANIES THAT COMPETE INTERNATIONALLY Drawing on the course material developed at the Harvard Business School and Yale School of Management by David Collis, International Strategy provides theoretical insight and pragmatic tools that address the decisions facing senior managers

in multinational corporations. International Strategy explores the critical differences between domestic and international competition: the heterogeneity of markets in which companies are involved; the volatility of economic conditions that firms face; and the increased scale of activities fostered by global participation. The text examines how these phenomena create tensions and tradeoffs for executives concerning which product to offer around the world, which countries to compete in, where to locate various activities, and how to organize the firm worldwide. Making those choices in an integrated fashion, it is explained, requires pursuit of a coherent strategy that builds an international advantage. Filled with illustrative examples from a wide range of international companies, International Strategy, offers an accessible guide to help managers navigate the myriad decisions they must make in order to create value from their foreign operations and outperform competitors in an increasingly integrated world.

The Myth of Capitalism Jonathan Tepper, 2023-04-25 The Myth of Capitalism tells the story of how America has gone from an open, competitive marketplace to an economy where a few very powerful companies dominate key industries that affect our daily lives. Digital monopolies like Google, Facebook and Amazon act as gatekeepers to the digital world. Amazon is capturing almost all online shopping dollars. We have the illusion of choice, but for most critical decisions, we have only one or two companies, when it comes to high speed Internet, health insurance, medical care, mortgage title insurance, social networks, Internet searches, or even consumer goods like toothpaste. Every day, the average American transfers a little of their pay check to monopolists and oligopolists. The solution is vigorous anti-trust enforcement to return America to a period where competition created higher economic growth, more jobs, higher wages and a level playing field for all. The Myth of Capitalism is the story of industrial concentration, but it matters to everyone, because the stakes could not be higher. It tackles the big questions of: why is the US becoming a more unequal society, why is economic growth anemic despite trillions of dollars of federal debt and money printing, why the number of start-ups has declined, and why are workers losing out.

Competitive Advantage Michael E. Porter, 2008-06-30 Now beyond its eleventh printing and translated into twelve languages, Michael Porter's *The Competitive Advantage of Nations* has changed completely our conception of how prosperity is created and sustained in the modern global economy. Porter's groundbreaking study of international competitiveness has shaped national policy in countries around the world. It has also transformed thinking and action in states, cities, companies, and even entire regions such as Central America. Based on research in ten leading trading nations, *The Competitive Advantage of Nations* offers the first theory of competitiveness based on the causes of the productivity with which companies compete. Porter shows how traditional comparative advantages such as natural resources and pools of labor have been superseded as sources of prosperity, and how broad macroeconomic accounts of competitiveness are insufficient. The book introduces Porter's "diamond," a whole new way to understand the competitive position of a nation (or other locations) in global competition that is now an integral part of international business thinking. Porter's concept of "clusters," or groups of interconnected firms, suppliers, related industries, and institutions that arise in particular locations, has become a new way for companies and governments to think about economies, assess the competitive advantage of locations, and set public policy. Even before publication of the book, Porter's theory had guided national reassessments in New Zealand and elsewhere. His ideas and personal involvement have shaped strategy in countries as diverse as the Netherlands, Portugal, Taiwan, Costa Rica, and India, and regions such as Massachusetts, California, and the Basque country. Hundreds of cluster initiatives have flourished throughout the world. In an era of intensifying global competition, this pathbreaking book on the new wealth of nations has become the standard by which all future work must be measured.
