Managing Equity Portfolios Michael A. Ervolini, 2023-05-09 A groundbreaking framework for improving portfolio performance that goes beyond traditional analytics, offering new ways to understand investment skills, process, and behaviors. Portfolio management is a tough business. Each day, managers face the challenges of an ever-changing and unforgiving market, where strategies and processes that worked yesterday may not work today, or tomorrow. The usual advice for improving portfolio performance—refining your strategy, staying within your style, doing better research, trading more efficiently—is important, but doesn't seem to affect outcomes sufficiently. This book, by an experienced advisor to institutional money managers, goes beyond conventional thinking to offer a new analytic framework that enables investors to improve their performance confidently, deliberately, and simply, by applying the principles of behavioral finance. W. Edwards Deming observed that you can't improve what you don't measure. Active portfolio management lacks methods for measuring key inputs to management success like skills, process, and behavioral tendencies. Michael Ervolini offers a conceptually straightforward and well-tested framework that does just that, with evidence of how it helps managers enhance self-awareness and become better investors. In a series of

short, accessible chapters, Ervolini investigates a range of topics from psychology and neuroscience, describing their relevance to the challenges of portfolio management. Finally, Ervolini offers seven ideas for improving. These range from maintaining an investment diary to performing rudimentary calculations that quantify basic skills; each idea, or "project," helps managers gain a deeper understanding of their strengths and shortcomings and how to use this knowledge to improve investment performance.

Portfolio Representations Jem Tugwell, 2012-01-16 This book provides a practical and sophisticated insight into each financial asset type, and how the different risks and exposures they involve should be most accurately combined and represented in a portfolio. The financial issues facing the world since the late 2000s have provided the asset management community with a brutal reminder of the importance of having genuine knowledge of portfolio structures and the risks embedded within them. More so than ever, fund managers need a clear and consistent way of separating value from exposure in their portfolios, allowing a complete 'look-through' to the real risks contained in derivatives and pooled/structured products. Equally, as fund managers are driven to find risk-adjusted rather than just raw returns, it is imperative that risk measures and the understanding derived from them are applied to the entirety of a portfolio, as opposed to just particular asset classes or sections. This book, written by hugely experienced investment expert Jem Tugwell, provides a practical and comprehensive solution. Written

in plain English and carefully structured to be easy to use, this is the definitive guide to accurately and quickly representing value in financial portfolios of every complexity. Taking the reader through each asset type in turn, with detailed workings and explanations, it is the most lucid and helpful professional guide yet written on the subject - and something no one working in this area can afford to be without.

Portfolios in the Writing Classroom Kathleen Blake Yancey, 1992 This collection of 10 essays argues that portfolios in the writing classroom are worth exploring and that such exploration opens up new opportunities: new ways to learn to write, to think about teaching writing, to understand students, teachers, and curricula, and to describe and report on what is found. The collection makes this argument by sharing the stories of teachers in various situations: teachers alone, teachers as team members, and teachers concerned with administration as well as learning. Three key points are made: that portfolios should be designed locally by teachers and students; that they require periodic review; and that through such reviews more can be learned about writing and its teaching. The articles and authors are as follows: (1) Introduction: Writing Portfolios--Changes and Challenges (Catharine Lucas); (2) Teacher's Stories: Notes toward a Portfolio Pedagogy (Kathleen Blake Yancey); (3) Increasing Student Autonomy through Portfolios (Sue Ellen Gold): (4) Portfolio Practice in the Middle School: One Teacher's Story (James E. Newkirk); (5) Portfolios: Process for Students and Teachers

(Catherine D'Aoust); (6) Looking into Portfolios (Sandra Murphy and Mary Ann Smith); (7) Portfolio Reflections in Middle and Secondary School Classrooms (Roberta Camp); (8) Writing Portfolios in Secondary Schools (David Kneeshaw); (9) Portfolio Practice and Assessment for Collegiate Basic Writers (Irwin Weiser); and (10) Portfolios in the Writing Classroom: A Final Reflection (Kathleen Blake Yancey). A 39-item annotated bibliography of resources on portfolios for teaching and assessment concludes the volume. (SR)

The phenomenon involves firms from all kinds of media--newspapers, magazines, television, radio, cinema--and is found in enterprises ranging from small, local firms to large, globalized companies. This volume is the result of a coordinated effort of scholars in the United States and Europe to explore the characteristics, processes, challenges, and implications of media product portfolios. The process and issues of portfolio strategy, development, and management are complex and wide ranging. The book explores the development of media product portfolios from an interdisciplinary perspective, providing

The book explores why and how firms develop portfolios, how company strategy and organizational development relate to portfolios, the role of leaders in developing portfolio activities, economic and economic geography issues in portfolios, production issues, challenges in managing multiple products and operations, issues of marketing and branding issues in portfolios, personnel implications, and the unique challenges in the internationalization of media portfolio operations.
