Academic & Scientific Poster Presentation Nicholas Rowe, 2017-09-04 This book offers the first comprehensive guide to poster presentation at academic, scientific and professional conferences. Each chapter explores different factors that impact upon how posters function, and how they fit within today's conference practices, as well as provides guidance on how to address compilation and presentation issues with the poster medium. Drawing from fields of education, psychology, advertising and other areas, the book offers examples of how theories may be applied to practice in terms of both traditional paper and electronic poster formats. Importantly, the book offers a critical examination of how academic and scientific posters are able to achieve their potential for knowledge dissemination, networking and knowledge transfer. The many new and challenging findings provide an evidence-based approach to help both novice and experienced presenters compile effective poster presentations, and to see how poster presentations can best be used to share knowledge, facilitate networking, and promote dialogue. Additionally, educators, employers, and conference organizers may use this book to re-evaluate how conferences meet the needs of today's globally connected peer groups, and the benefit they provide at individual and group levels.

Evaluation Beyond Exams in Nursing Education Robin Donohoe Dennison, DNP, APRN, CCNS, CEN, CNE, Anita Dempsey, PhD, APRN, PMHCNS-BC, John Rosselli, MS, RN, FNP-BC, CNE, 2014-07-29 Helps educators to design assignments and rigorous rubrics that truly measure student learning objectives The ability of students to pass an examination does not necessarily reflect or guarantee their ability to apply knowledge in practice, nor are traditional exams a sufficient means to evaluate all learning objectives. Written for both new and seasoned nurse educators, this book is unique in its provision of rigorous rubrics that fully take into account learning objectives and the teaching-learning process, and promote objective grading. It examines a variety of time-tested, alternative evaluation methods, discusses how to design them, and includes best practices for using them. The book provides an overview of how evaluation and rubrics play an integral part within the larger nursing education teaching-learning process. It helps educators clearly define learning objectives and desired outcomes, and how to evaluate them. The book describes how to formulate a variety of teaching strategies, design effective assignments, and examine in detail specific evaluation methods including best practices for their use and exemplar analytic scoring rubrics. Also available are detailed, modifiable grading rubric templates for each assignment presented. Evaluation methods covered include

papers, presentations, participation, discussion boards, concept maps, case studies, reflective journals, and portfolios. The book will assist both new and seasoned nurse educators in their quest to graduate competent, safe nurses at all levels of nursing education. Key Features: Provides rigorous, modifiable rubrics for learning objective grading Includes time-tested alternative evaluation methods Describes best practices for designing a variety of teaching-learning evaluation tools Includes guidelines for writing clear assignment descriptions Discusses papers, presentations, concept maps, case studies, portfolios, and more

A Practical Guide to Scientific Writing in Chemistry Andrew Terhemem Tyowua, 2023-03-31 Successful completion of postgraduate studies, especially PhD, and career advancement in academia strongly depend on the ability to publish scientific papers or books and attract research grants. However, many chemical scientists find preparing scientific papers and research grant and book proposals difficult; partly because of insufficient training in writing and partly because there are few practical books to enable them to learn the art. This step-by-step practical guide is intended mainly for postgraduate students and early career researchers in chemical science and the libraries that serve them but will also be useful to other scientists. Key Features: Improves the reader's chances of getting their manuscript published in chemistry journals. Increases the likelihood of winning research grants in chemistry. Takes a "lead by the hand" approach. Contains chapters on the preparation of graphical abstracts and research highlights. Uses sketches and other illustration styles to aid mental visualization of concepts. Contains practical examples taken from published papers and successful research grant proposals.

Making Effective Presentations at Professional Conferences Mary Renck Jalongo, Crystal Machado, 2015-12-12 This work prepares teachers, college students, and higher education faculty to conduct various types of presentations, including workshops and teacher inservice trainings; poster sessions; panel discussions; roundtables; research forums; and technology-supported presentations. Making effective presentations to fellow professionals at conferences is an important contribution for educators at all levels, from basic through higher education. The book takes the approach of a "paper mentor" that guides the reader through the use of templates, specific examples, and a wide range of on-line resources.

The Better Mousetrap Simon Pont,2012-11-03 Advertising can be great. Great advertising, that is. Brands live or die on the power of their advertising and the advertiser's role is to build better mousetraps. But why do we love certain brands and passionately or indifferently reject the rest? What do our brands say about us? And why do we feel so compelled to use digital brands to say even more? Advertising has always been the hard sell and subtle hustle that piques our interest and gets us thinking I WANT that, but in a world that now moves with binary speed, the Brand Game is taking ever-new and remarkable turns in its pursuit of better and faster mice. A provocative and insightful look at the chase, The Better Mousetrap lifts the lid on the brand and advertising strategies of leading companies who, in a world redefined by digital media, are setting the best traps for these ever quicker mice.

Better Posters Zen Faulkes,2021-05-24 Better posters mean better research. Distilling over a decade of experience from the popular Better Posters blog, Zen Faulkes will help you create a clear and informative conference poster that delivers maximum impact. Academics have used posters to share research for more than five decades, and tens of thousands of posters are presented at conferences every year. Despite the popularity of the format, no in-depth guide has been available on how to create and deliver compelling conference posters. From over-long titles, tiny text and swarms of logos, to bad font choices, chaotic colour schemes and blurry images – it's easy to leave viewers confused about your poster's message. The solution is Better

Posters: a comprehensive guide to everything you need to know – from writing a title and submitting an abstract, to designing the poster and finally presenting it in the poster session. Your conference poster will be one of your first research outputs, and the poster session is your first introduction to a professional community. Making a great poster develops the skills to create publications, reports, outreach and teaching materials throughout your career. This book also has material for conference organizers on how to make a better poster session for their attendees.
