The Anatomy of a Spy Michael Smith, 2020-01-21 For fans of both real spy dramas and fictional ones—both Ben Macintyre and John le Carré—the story of why spies spy. Why do people put their lives at risk to collect intelligence? How do intelligence services ensure that the agents they recruit do their bidding and don't betray them? What makes the perfect spy? Drawing on interviews with active and former British, American, Russian, European, and Asian intelligence officers and agents, Michael Smith creates a layered portrait of why spies spy, what motivates them, and what makes them effective. Love, sex, money, patriotism, risk, adventure, revenge, compulsion, doing the right thing—focusing on the motivations, *The Anatomy of a Spy* presents a wealth of spy stories, some previously unknown and some famous, from the very human angle of the agents themselves. The accounts of actual spying extend from ancient history to the present, and from running agents inside the Islamic State and al-Qaeda to the recent Russian active measures campaigns and operations to influence votes in the UK, European Union, and United States, penetrating as far as Trump Tower if not the White House.

**Conflict Law** William H. Boothby, 2014-07-08 Topics as diverse as the evolving spectrum of conflict, innovations in weaponry, automated and autonomous attack, the depersonalisation of warfare, detention operations, the influence of modern media and the application of human rights law to the conduct of hostilities are examined in this book to see to what extent existing legal norms are challenged. The book takes each topic in turn, explains relevant provisions of contemporary law and analyses exactly where the legal problem lies. The analysis then develops the theme, examining for example the implications of current rules as to deception operations for certain applications of

cyber warfare. The text is written in an accessible style, and demonstrates the continuing relevance of established rules and the importance of compliance with them. Useful for academics, military, governments, ministries of defence, ministries of foreign affairs, libraries, diplomats, think tanks, policy units, NGOs, and all others with an interest in law of armed conflict issues such as journalists and students.

*Echelon Defense* Ryan D. Martinson, 2018 This monograph examines China's approach to using sea power to defend and advance its maritime claims in the East China Sea and South China Sea. This approach, which Chinese strategists sometimes called echelon defense, involves the use of non-military instruments of sea power--especially maritime law enforcement forces--to vie with other states for control over disputed maritime space. These non-military forces operate on the first line (or echelon) of China's expanding frontier. Behind them, on the second line, China employs naval forces to deter foreign leaders from using force, thereby compelling them to compete on China's own terms. The echelon defense approach allows China to gradually achieve its objectives without risking a conflict or giving other great powers such as the United States sufficient grounds to intervene. Since 2006, when this approach was pioneered, it has enabled China to expand its influence and control in maritime East Asia. But it has also harmed China's relations with its neighbors and other great powers. **On Twenty-Five Years of Social Epistemology** James H. Collier, 2016-03-16 This edited

collection charts the development of, and prospects for, conceiving knowledge as a social phenomenon. The origin, aims and growth of the journal *Social Epistemology*, founded in 1987, serves to anchor each of the book's contributions. Each contribution offers a unique, but related, insight on current issues affecting the organization and production of knowledge. In addition, each contribution proposes necessary questions, practices and frameworks relevant to the rapidly changing landscape of our conceptions of knowledge. The book examines the commercialization of science, the neoliberal university, the status and conduct of philosophy, the cultures of computer software and social networking, the practical, political and anthropological applications of social epistemology, and how we come to define what human beings are and what activities human beings can, and should, sustain. A diverse group of noted, international scholars lends necessary, original and challenging perspectives on our collective approach to knowledge. This book was originally published as a special issue of *Social Epistemology*.

*The Tourist* Olen Steinhauer, 2009-03-03 In *The Tourist*, Olen Steinhauer—twice nominated for the Edgar Award—tackles an intricate story of betrayal and manipulation, loyalty and risk, in an utterly compelling novel that is both thoroughly modern and yet also reminiscent of the espionage genre's most touted luminaries. "Here's the best spy novel I've ever read that wasn't written by John

le Carré.” —Stephen King, Entertainment Weekly In Olen Steinhauer's explosive New York Times bestseller, Milo Weaver has tried to leave his old life of secrets and lies behind by giving up his job as a tourist for the CIA—an undercover agent with no home, no identity—and working a desk at the CIA's New York headquarters. But staying retired from the field becomes impossible when the arrest of a long-sought-after assassin sets off an investigation into one of Milo's oldest colleagues and friends. With new layers of intrigue being exposed in his old cases, he has no choice but to go back undercover and find out who's been pulling the strings once and for all. \*BONUS CONTENT: This edition of *The Tourist* includes a new introduction from the author and a discussion guide

*Neuroprotective Therapy for Stroke and Ischemic Disease* Paul A. Lapchak, John H. Zhang, 2017-01-12 A critical and comprehensive look at current state-of-the-art scientific and translational research being conducted internationally, in academia and industry, to address new ways to provide effective treatment to victims of ischemic and hemorrhagic stroke and other ischemic diseases. Currently stroke can be successfully treated through the administration of a thrombolytic, but the therapeutic window is short and many patients are not able to receive treatment. Only about 30% of patients are cured by available treatments. In 5 sections, the proposed volume will explore historical and novel neuroprotection mechanisms and targets, new and combination therapies, as well as clinical trial design for some of the recent bench-side research.

*The Synthesis of the Elements* Giora Shaviv, 2012-04-13 This book describes the origins and evolution of the chemical elements we and the cosmos are made of. The story starts with the discovery of the common elements on Earth and their subsequent discovery in space. How do we learn the composition of the distant stars? How did progress in quantum theory, nuclear physics, spectroscopy, stellar structure and evolution, together with observations of stars, converge to

provide an incredibly detailed picture of the universe? How does research in the micro-world explain the macro-world? How does progress in one affect the other, or lack of knowledge in one inhibit progress in the other? In short, Shaviv describes how we discovered the various pieces of the jigsaw that form our present picture of the universe; and how we sometimes put these in the wrong place before finding in the right one. En route we meet some fascinating personalities and learn about heated controversies. Shaviv shows how science lurched from one dogma to the next, time and again shattering much of what had been considered solid knowledge, until eventually a stable understanding arose. Beginning with generally accepted science, the book ends in today's terra incognita of nuclear physics, astrophysics and cosmology. A monumental work that will fascinate scientists, philosophers, historians and lay readers alike.

**African Conflicts and Informal Power** Mats Utas, 2012-09-13 In the aftermath of an armed conflict in Africa, the international community both produces and demands from local partners a variety of blueprints for reconstructing state and society. The aim is to re-formalize the state after what is viewed as a period of fragmentation. In reality, African economies and politics are very much informal in character, with informal actors, including so-called Big Men, often using their positions in the formal structure as a means to reach their own goals. Through a variety of in-depth case studies, including the DRC, Sierra Leone and Liberia, this comprehensive volume shows how important informal political and economic networks are in many of the continent's conflict areas. Moreover, it demonstrates that without a proper understanding of the impact of these networks, attempts to formalize African states, particularly those emerging from wars, will be in vain.

Soon he is thrust into a web of intrigue and violence beyond his control back into the CIA, and lured into a top-secret espionage project in telepathic ability funded by American intelligence. Gripping drama in which nothing is quite what it seems.—Seattle Times As the project's first success, Ben uses his extraordinary powers in the perilous search for Vladimir Orlov, the exiled former chairman of the KGB—and the only man who might unlock the secret of Sinclair's death and the whereabouts of a multibillion-dollar fortune in gold spirited out of Russia in the last days of the Soviet Union.
