Nuclear Power Technology: Reactor technology Walter Marshall,1983

Friction Stir Welding and Processing VII Rajiv Mishra,Murray Mahoney,Yutaka Sato,Yuri Hovanski,Ravi Verma,2016-12-01 This collection focuses on all aspects of science and technology related to friction stir welding and processing.

Defence Beyond Design Sitakanta Mishra,2017-04-21 This book scrutinises the realm of safety-security involving 'nuclear power' within the context of India's tryst with nuclear energy. Relying on open source information, it examines the efficacy of the safety-security arrangement in and around India's nuclear installations, keeping in mind the international best practices. As India has embarked on a civil nuclear expansion programme, the public concern for safety and security of nuclear facilities and material is obvious, especially in the backdrop of terrorist incidents and the Fukushima disaster. This poses a serious challenge to garnering greater domestic support for new nuclear projects with international collaborations. Here an attempt is made to examine the issues involving social acceptance of nuclear energy, safe disposal of nuclear waste, regulatory practices, and likely challenges ahead for India, to propose a new nuclear safety-security paradigm by looking beyond the usual 'defence by design' or 'defence in-depth' practice. The Foreign Office, Commerce and British Foreign Policy in the Twentieth Century John Fisher,Effie G. H. Pedaliu,Richard Smith,2017-02-16 This book addresses the interface of the British Foreign Office, foreign policy and commerce in the twentieth century. Two related questions are considered: what did the Foreign Office do to support British commerce, and how did commerce influence British foreign policy? The editors of this work collect a range of case studies that explore the attitude of the Foreign Office towards commerce and trade promotion, against the backdrop of a century of relative economic decline, while also considering the role of British

diplomats in creating markets and supporting UK firms. This highly researched and detailed examination is designed for readers aiming to comprehend the role that commerce played in Britain's foreign relations, in a century when trade and commerce have become an inseparable element in foreign and security policies.

Britain in Global Politics Volume 2 J. Young, E. Pedaliu, M. Kandiah, 2013-09-27 This collection of essays focuses Britain's role in global affairs since the Second World War. The essays cover a broad field, from relations with Japan and China, through European and African developments, to defence planning in Whitehall.

Independence and Deterrence Lorna Arnold, Margaret Gowing, 1974-06-01 Independence and Deterrence, commissioned by the United Kingdom Atomic Energy Authority, continues the story of Britain's atomic project begun in Britain and Atomic Energy 1939-1945, and covers the years from 1945 to the first British bomb test at the end of 1952. Volume 1 studies policy making at the highest levels - the strategic, political and international considerations, the administrative and constitutional machinery. It shows how and why Britain decided to make atomic bombs and follows traumatic negotiations for Anglo-American atomic collaboration and their effect on Britain's relations with Europe and the Commonwealth. There is important material on Anglo-Canadian affairs. The book sheds new light on Britain's rights to consultation on any American use of atomic bombs. Volume 2 studies the execution of the project. It analyses the cost of the project in money and manpower, the problems of health and safety, secrecy and security, the relationship between government and private industry. Above all it gives a 'nuts and bolts' description of the work of the scientists and engineers in carrying out - with great success - a complex technological project operating on the furthest frontiers of knowledge, which culminated in making and testing the Mark I weapon. There is an illuminating chapter on the origins of Britain's nuclear power programme and her choice of reactor. These chapters emphasise not only economic, managerial and technological aspects, but also the great influence of personalities. This is the first peacetime official history to be authorised for publication. It has been written with free access to official documents and very little has been modified or omitted on public interest grounds. Most of the material is completely new. Ronald Clark wrote of Britain and Atomic Energy, '[Mrs Gowing] has been able to let cats out of bags by the litterful'. This is even more true of Independence and Deterrence.
