CLASH! Sandra Vavra, Sharon L. Spencer, 2011-09-01 This book offers ideas that secondary teachers, university content faculty, and teacher educators can use to challenge traditional literacy practices and demonstrate creative, innovative ways of incorporating new literacies into the classroom, all within a strong theoretical framework. Teachers are trying to catch up to the new challenges of the twenty-first century. It is a superheroic feat that must be achieved if education is to stay relevant and viable. There is a lot of zip, bam, whap, and wow in the fast-paced, social networking, technological world, but not so much in the often laboriously slow-paced educational world. Where is the balance? How do teachers and students learn together, since one group has seasoned wisdom with limited technological know-how and the other uses all the cool new tools, but not in the service of learning? These are some important issues to consider in finding the balance in an unstable, fast-moving, ever-changing world. This book is practical and useful to literacy teachers, teacher educators, and university faculty by bringing together the expertise of composition/rhetoric researchers and writers, literacy specialists, technology specialists, and teachers who are on the cutting edge of new literacies.

Practice Building 2.0 for Mental Health Professionals: Strategies for Success in the Electronic Age Tracy Todd, 2009-10-26 How to use technology to effectively market your private practice. Building and maintaining a private practice today requires initiative, creativity, and a willingness to adapt new tools, technologies, and techniques to your business. As a therapist, and a small business owner of a private practice, you face the challenges of fluctuating market trends, infrastructure inefficiencies, seismic changes in demographic populations, complex reimbursement systems, and technological advances which alter practice patterns. Your “therapist side” may be reluctant to think of yourself as a businessperson; however, if you are to keep offering your valuable services, you owe it to yourself and your clients to build the most effective and efficient practice possible. To do so, you need to take advantage of the latest technology. Tracy Todd presents a number of technologies that will help you build, maintain, and expand your practice. He clearly

walks you through the (surprisingly easy) process of creating your own Web site, highlighting the usefulness of features such as online scheduling and payment systems. He also provides overviews of podcasting, videocasting, blogs, and electronic file management, pointing out the benefits of each, and how you can go about applying these tools to your practice. The result is a book that will help you streamline your administrative duties, while expanding your clinical reach—thus helping your practice thrive.
