Precision in Dental Esthetics Domenico Massironi,Romeo Pascetta,Giuseppe Romeo,2007-01-01 Achieving a satisfactory esthetic and functional prosthetic outcome cannot be left to chance, but must proceed through a long sequence of clinical steps, determined by the initial treatment, the provisional prostheses, the preparation of the abutment teeth, the proper gingival retraction, a precise impression, and finally, cementation. The first in a two-volume series on precision in dental esthetics, this beautifully illustrated, highly practical book guides the dental practitioner through each of these steps in the treatment of various common clinical situations.
