The Excavation of the Prehistoric Burial Tumulus at Lofkend, Albania Lorenc Bejko,Sarah P. Morris,John K. Papadopoulos,Lynne A. Schepartz,2015-12-31 The burial tumulus of Lofkend lies in one of the richest archaeological areas of Albania (ancient Illyria), home to a number of burial tumuli spanning the Bronze and Iron Ages of later prehistory. Some were robbed long ago, others were reused for modern burials; few were excavated under scientific conditions. Modern understanding of the pre- and protohistory of Illyria has largely been shaped by the contents of such burial mounds. What inspired the systematic exploration of Lofkend by UCLA was more than the promise of an unplundered necropolis; it was also a chance to revisit the significance of this tumulus and its fellows for the emergence of urbanism and complexity in ancient Illyria. In addition to artifacts, the recovery of surviving plant remains, bones, and other organic material contribute insights into the environmental and ecological history of the region.

Prehistoric America Jean-François-Albert du Pouget marquis de Nadaillac,2005 With the settling of the New World, word spread throughout Europe of the native inhabitants, their artifacts, communities, and cultural. Prehistoric America by Marquis de Nadaillac is a prime example of a classic work of the period that addressed the antiquity of humans in the New World, drawing upon the full range of scientific data compiled on the inhabitants and their cultures. The proximity of human remains with those of extinct animals was still a very recent finding, even in the Old World. Nadaillac's early attempts at cross-cultural comparison and theoretical explanations make this wor.

Archaeology of Prehistoric Native America Guy E. Gibbon,2022-01-26 First published in 1998. Did prehistoric humans walk to North America from Siberia? Who were the inhabitants of the spectacular Anasazi cliff dwellings in the Southwest and why did they disappear? Native Americans used acorns as a major food source, but how did they get rid of the tannic acid which is toxic to humans? How does radiocarbon dating work and how accurate is it? Written for the informed lay person, college-level student, and professional, Archaeology of Prehistoric Native America: An Encyclopedia is an important resource for the study of the earliest North Americans; including facts, theories, descriptions, and speculations on the ancient nomads and hunter-gathers that populated continental North America.

A History of Platform Mound Ceremonialism Megan C. Kassabaum,2021-05-04 This book presents a temporally and geographically broad yet detailed history of an important form of Native American architecture, the platform mound. While the variation in these earthen monuments across the eastern United States has sparked much debate among archaeologists, this landmark study reveals unexpected continuities in moundbuilding over many thousands of years. In A History of Platform Mound Ceremonialism, Megan Kassabaum synthesizes an exceptionally wide dataset of 149 platform mound sites from the earliest iterations of the structure 7,500 years ago to its latest manifestations. Kassabaum discusses Archaic period sites from Florida and the Lower Mississippi Valley, as well as Woodland period sites across the Midwest and Southeast, to revisit traditional perspectives on later, more well-known Mississippian-era mounds. Kassabaum's chronological approach corrects major flaws in the ways these constructions have been interpreted in the past. This comprehensive history exposes nonlinear shifts in mound function, use, and meaning across space and time and suggests a dynamic view of the vitality and creativity of their builders. Ending with a discussion of Native American beliefs about and uses of earthen mounds today, Kassabaum reminds us that this history will continue to be written for many generations to come. Columbia Chronologies of Asian History and Culture John S. Bowman,2000-09-05 Containing more information on Asian culture than any other English-language reference work, Columbia Chronologies of Asian History and Culture is the first of its kind: a set of more than thirty chronologies for all the countries of Asia—East, South, Southeast, and Central—from the Paleolithic era through 1998. Each entry is clearly dated and, unlike most chronologies found in standard history texts, the entries are complete and detailed enough to provide virtually a sequential history of the vast and rich span of Asian cultures. The contributing writers and editors have ensured the book's usefulness to general readers by identifying individuals and groups, locating places and regions, explaining events and movements, and defining unfamiliar words and concepts. The thirty-two chronologies on individual countries, in conjunction with a detailed index, allow readers to find specific information quickly and efficiently, whether they seek the date for the invention of the iron plow or gunpowder, the fall of the Han Dynasty in China, or Ho Chi Minh's declarations of Vietnamese independence. This invaluable reference culminates with three appendices: National/Independence Days, Scientific-Technological Achievements in Asia, and Asia: A Chronological Overview, which provides an accessible summary of key events and developments in various fields of activity throughout the continent. The Columbia Chronologies of Asian History and Culture features: three discrete chronologies on (1) Politics/History, (2) Art/Culture/Religion, and (3) Science/Economics/Everyday Life for each of Asia's three major cultures—China, India, and Japan—as well as a combined chronology for each of the other nations; detailed entries of thousands of historical events as well as important milestones in religion, philosophy, literature, and the arts; entries on technological developments and natural events (famines, floods, etc.) affecting the lives of ordinary people; and authoritative and accessibly written entries by a team of Asian scholars from Columbia, Harvard, and other major research universities. Beyond its detailed accounting of Asia's political history, Columbia Chronologies of Asian History and Culture also gives full recognition to religious, intellectual, artistic, and general cultural achievements, as well as to scientific, technological, industrial, agricultural, and economic developments. Concise yet complete, it will stand as an indispensable reference work in the field of Asian studies.

Ancient Lives Brian M. Fagan,Nadia Durrani,2020-11-09 Focusing on sites of key significance and the world's first civilizations, Ancient Lives is an accessible and engaging textbook which introduces complete beginners to the fascinating worlds of archaeology and prehistory. Drawing on their impressive combined experience of the field and the classroom, the authors use a jargon-free narrative style to enliven the major developments of more than 3 million years of human culture. First introducing the basic principles, methods, and theoretical approaches of archaeology, the book then provides a summary of world prehistory from a global perspective. This latest edition provides an up-to-date account of human evolution and the origins of modern humans. It explores the reality

of life in the prehistoric world. Later chapters describe the development of agriculture and animal domestication, and the emergence of cities, states, and preindustrial civilizations in widely separated parts of the world. Our knowledge of these is changing thanks to revolutionary developments in LIDAR (light detection and ranging) technology and other remote-sensing devices. With this new edition updated to reflect the latest discoveries and research in the discipline, *Ancient Lives* continues to be a comprehensive and essential introduction to archaeology. It will be ideal for students looking for an accessible guide to the subject.

Archaeological Gazetteer of Afghanistan Warwick Ball,2019-07-11 Since its publication in 1982, the *Archaeological Gazetteer of Afghanistan* has become the main reference work for the archaeology of Afghanistan, and the standard sites and monuments record for the region; archaeological sites are now referred to under their Gazetteer catalogue number as routine in academic literature, and the volume has become a key text for developing research in the area. This revised and updated edition has been significantly expanded to incorporate new field-work and discoveries, as well as older field-work more recently published, and presents new cases of synthesis and unpublished material from private archives. New discoveries include the Rabatak inscription detailing the genealogy of the Kushan kings, a huge archive of Bactrian documents, Aramaic documents from Balkh on the last days of the Persian empire, a new Greek inscription from Kandahar, two tons of coins from Mir Zakah, a Sasanian relief of Shapur at Rag-i Bibi, a Buddhist monastic 'city' at Kharwar, new discoveries of Buddhist art at Mes Aynak and Tepe Narenj, and a newly revealed city at the Minaret of Jam. With over 1500 catalogue entries, supplemented with concordance material, site plans, drawings, and detailed maps prepared from satellite imagery, the *Archaeological Gazetteer of Afghanistan: Revised Edition* is the most comprehensive reference work on the archaeology and monuments of the region ever undertaken. Cataloguing all recorded sites and monuments from the earliest times to the Timurid period, this volume will be an invaluable contribution to the renewed interest in Afghanistan's cultural heritage and an essential resource for students and researchers.

Prehistoric Europe James Geikie,1881

Cahokia and the Hinterlands Thomas E. Emerson,R. Barry Lewis,1991 Covering topics as diverse as economic modeling, craft specialization, settlement patterns, agricultural and subsistence systems, and the development of social ranking, *Cahokia and the Hinterlands* explores cultural interactions among Cahokians and the inhabitants of other population centers, including Orens Dorf and the Dickson Mounds in Illinois and Aztalan in Wisconsin, as well as sites in Minnesota, Iowa, and at the confluence of the Mississippi and Ohio rivers. Proposing sophisticated and innovative models for the growth, development, and decline of Mississippian culture at Cahokia and elsewhere, this volume also provides insight into the rise of chiefdoms and stratified societies and the development of trade throughout the world.

Prehistoric Exchange Systems in North America Timothy G. Baugh,Jonathon E. Ericson,2013-03-14 In this unique volume, archaeologists examine the changing economic structure of trade in North America over a period of 6,000 years. Organized by geographical and chronological divisions, each chapter focuses on trade in one of nine regions from the Archaic through the late prehistoric period. Each contribution explores neighboring areas to illustrate the complexity of North American exchange. By charting the economic structure of these regions, archaeologists, economic anthropologists, and economic geographers gain greater insight into the dynamics of North American trade and exchange on a continental wide basis.

Molluscs in Archaeology Michael J. Allen,2017-06-30 The subject of 'Molluscs in Archaeology' has not been dealt with collectively for several decades. This new volume in Oxbow's Studying Scientific Archaeology series addresses many aspects of mollusks in archaeology. It will give the reader an overview of the whole topic; methods of analysis and approaches to interpretation. It aims to be a broad based text book giving readers an insight of how to apply analysis to different present and past landscapes and how to interpret those landscapes. It includes Marine, Freshwater and land snails studies, and examines topics such as diet, economy, climate, environmental and land-use, isotopes and mollusks as artifacts. It aims to provide archaeologists and students with the first port of call giving them a) methods and principles, and b) the potential information mollusks can provide. It concentrates on analysis and interpretation most archaeologists and students can undertake and understand, and to 'review' the 'heavier' science in terms of potential, application and interpretational value.
