Ancient Lives Brian M. Fagan,Nadia Durrani,2020-11-09 Focusing on sites of key significance and the world's first civilizations, *Ancient Lives* is an accessible and engaging textbook which introduces complete beginners to the fascinating worlds of archaeology and prehistory. Drawing on their impressive combined experience of the field and the classroom, the authors use a jargon-free narrative style to enliven the major developments of more than 3 million years of human culture. First introducing the basic principles, methods, and theoretical approaches of archaeology, the book then provides a summary of world prehistory from a global perspective. This latest edition provides an up-to-date account of human evolution and the origins of modern humans. It explores the reality of life in the prehistoric world. Later chapters describe the development of agriculture and animal domestication, and the emergence of cities, states, and preindustrial civilizations in widely separated parts of the world. Our knowledge of these is changing thanks to revolutionary developments in LIDAR (light detection and ranging) technology and other remote-sensing devices. With this new edition updated to reflect the latest discoveries and research in the discipline, *Ancient Lives* continues to be a comprehensive and essential introduction to archaeology. It will be ideal for students looking for an accessible guide to the subject.

From Source to Sea: A Meander Down the Dordogne Valley Valerie Thompson,2019-01-25 FROM SOURCE TO SEA is the result of Valerie's decision to drive, with a friend, the length of the Dordogne River in fits and starts, taking photos and notes with the idea of writing a book. This fascinating journey covers most aspects of the river's fascinating history, from Early Man to the present day and touches on legends, geology, towns, villages, farming, nature, religious establishments, castles and what is on, in and by the river. Illustrations, mostly her own pen and ink drawings, and sketch maps enliven the text, which never dwells too long on any one topic, but skips briskly to the next, occasionally quoting some experiences of others who have written about the Dordogne's numerous char

Morris,Martin Biddle,2023-12-28 This is a detailed study of the archaeology of Roman Winchester–Venta Belgarum, a major town in the south of the province of Britannia– and its development from the regional (civitas) capital of the Iron Age people, the Belgae, who inhabited much of what is now central and southern Hampshire.

The Backbone of History Richard H. Steckel,Jerome C. Rose,2002-08-26 Publisher Description

The Excavation of the Prehistoric Burial Tumulus at Lofkend, Albania Lorenc Bejko,Sarah P. Morris,John K. Papadopoulos,Lynne A. Schepartz,2015-12-31 The burial tumulus of Lofkend lies in one of the richest archaeological areas of Albania (ancient Illyria), home to a number of burial tumuli spanning the Bronze and Iron Ages of later prehistory. Some were robbed long ago, others were reused for modern burials; few were excavated under scientific conditions. Modern understanding of the pre- and protohistory of Illyria has largely been shaped by the contents of such burial mounds. What inspired the systematic exploration of Lofkend by UCLA was more than the promise of an unplundered necropolis; it was also a chance to revisit the significance of this tumulus and its fellows for the emergence of urbanism and complexity in ancient Illyria. In addition to artifacts, the recovery of surviving plant remains, bones, and other organic material contribute insights into the environmental and ecological history of the region.

Archaeology of Prehistoric Native America Guy E. Gibbon,2022-01-26 First published in 1998. Did prehistoric humans walk to North America from Siberia? Who were the inhabitants of the spectacular Anasazi cliff dwellings in the Southwest and why did they disappear? Native Americans used acorns as a major food source, but how did they get rid of the tannic acid which is toxic to humans? How does radiocarbon dating work and how accurate is it? Written for the informed lay person, college-level student, and professional, *Archaeology of Prehistoric Native America: An Encyclopedia* is an important resource for the study of the earliest North Americans; including facts, theories, descriptions, and speculations on the ancient nomads and hunter-gathers that populated continental North America.

The proximity of human remains with those of extinct animals was still a very recent finding, even in the Old World. Nadaillac's early attempts at cross-cultural comparison and theoretical explanations make this work.

Prehistoric Exchange Systems in North America Timothy G. Baugh,Jonathon E. Ericson,2013-03-14 In this unique volume, archaeologists examine the changing economic structure of trade in North America over a period of 6,000 years. Organized by geographical and chronological divisions, each chapter focuses on trade in one of nine regions from the Archaic through the late prehistoric period. Each contribution explores neighboring areas to illustrate the complexity of North American exchange. By charting the economic structure of these regions, archaeologists, economic anthropologists, and economic geographers gain greater insight into the dynamics of North American trade and exchange on a continental wide basis.
