Trino: The Definitive Guide Matt Fuller, Manfred Moser, Martin Traverso, 2021-04-14 Perform fast interactive analytics against different data sources using the Trino high-performance distributed SQL query engine. With this practical guide, you'll learn how to conduct analytics on data where it lives, whether it's Hive, Cassandra, a relational database, or a proprietary data store. Analysts, software engineers, and production engineers will learn how to manage, use, and even develop with Trino. Initially developed by Facebook, open source Trino is now used by Netflix, Airbnb, LinkedIn, Twitter, Uber, and many other companies. Matt Fuller, Manfred Moser, and Martin Traverso show you how a single Trino query can combine data from multiple sources to allow for analytics across your entire organization. Get started: Explore Trino's use cases and learn about tools that will help you connect to Trino and query data Go deeper: Learn Trino's internal workings, including how to connect to and query data sources with support for SQL statements, operators, functions, and more Put Trino in production: Secure Trino, monitor workloads, tune queries, and connect more applications; learn how other organizations apply Trino

Right Away & All at Once Greg Brenneman, 2016-02-09 An expert in business turnaround shares his inspiring approach to problem-solving: "A fascinating read" (Mitt Romney). Visionary leader Greg Brenneman believes that true business success and personal fulfillment are two sides of the same coin. The techniques that will grow your business will also help you achieve a rich, purposeful, and integrated life. Here, Brenneman takes what he's learned from turning around or tuning up many businesses—including Continental Airlines and Burger King—and distills it into a simple, clear, five-step roadmap that anyone can follow. He teaches you how to: *prepare a succinct Go Forward plan *build a fortress balance sheet *grow your sales and profits *choose all-star servant leaders *empower your team For more than thirty years, Brenneman has seen these steps foster dramatic results in a variety of business environments. But he also came to realize that he could apply these same principles to improve his life and build a lasting moral legacy. He found he could make better decisions by carefully taking the most important facets of his life—faith, family, friendship, fitness, and finance—into consideration. Brenneman's inspiring examples, from both his business and his life, demonstrate the astounding effects these steps can have when you apply them—right away and all at once.

Triticale: Today and Tomorrow Henrique Guedes-Pinto, Norman Darvey, Valdemar P. Carnide, 2012-12-06 Triticale's days as a scientific curiosity are definitely over. Its wide acceptance as a feed, grain or forage crop, or for baking and malting, plus its high yields under marginal or stress conditions have made it an economically important crop in countries such as Poland, Germany, Australia, Portugal, Brazil, Morocco and China. This publication contains selected, reviewed, and up-to-date papers presented at the Third International Triticale Symposium held in Lisbon, Portugal, by the International Triticale Association and EUCARPIA. Among the broad spectrum of subjects addressed in these presentations are cytogenetics, biotechnology, genetic resources, breeding, agronomic practices and diseases. Also included are triticale's food, feed and forage uses, as well as its marketing processes. In a world of increasing population and decreasing agricultural resources, triticale offers a genuine solution for increasing land utilization and grain production.

Public Transport Planning with Smart Card Data Fumitaka Kurauchi, Jan-Dirk Schmöcker, 2017-02-17 Collecting fares through smart cards is becoming standard in most advanced public transport networks of major cities around the world. Travellers value their convenience and operators the reduced money handling fees. Electronic tickets also make it easier to integrate fare systems, to create complex time and space differentiated fare systems, and to provide incentives to specific target groups. A less-utilised benefit is the data collected through smart cards. Records, even if anonymous, provide for a much better understanding of passengers' travel behaviour as current literature shows. This information can also be used for better service planning. Public Transport Planning with Smart Card Data handles three major topics: how passenger behaviour can be estimated using smart card data, how smart card data can be combined with other trip databases, and how the public transport service level can be better evaluated if smart card data is available. The book discusses theory as well as applications from cities around the world and will be of interest to researchers and practitioners alike who are interested in the state-of-the-art as well as future perspectives that smart card data will bring.

The Japanese Electronics Industry Wataru Nakayama, William Boulton, Michael Pecht, 2019-01-15 The explosive growth of the Japanese electronics industry continues to be driven by a combination of market forces and the unique characteristics of the Japanese social organization and people. As an industrial phenomenon, the Japanese electronics industry receives considerable attention from researchers in various fields. However, most of their studies focus on either historical analyses intent on discovering the secret of the industry's enormous success, or on the issue of America's competitiveness in the face of challenges from Japanese technology. Moreover, none of these studies can be free of the bias that stems from each researcher's own upbringing and environment. The authors of The Japanese Electronics Industry have pooled their diverse experience and talents to create a

balanced, objective study of this complex subject. They illuminate the history and characteristics of the industry, show the current state of the industry, and explore the research, development, and education vital to the future of the industry.

The Death of the Grown-Up Diana West,2008-09-16 Diana West sees a US filled with middle-age guys playing air guitar and thinks No wonder we can't stop Islamic terrorism. She sees Moms Who Mosh and wonders Is there a single adult left anywhere? But, the grown-ups are all gone. The disease that killed them was incubated in the sixties to a rock-and-roll score, took hold in the seventies with the help of multiculturalism and left us with a nation of eternal adolescents who can't decide between good and bad, a generation who can't say no. From the inability to nix a sixteen year-old's request for Marilyn Manson concert tickets to offering adolescents parentally-funded motel rooms on prom night to rationalizing murderous acts of Islamic suicide bombers with platitudes of cultural equivalence, West sees us on a slippery slope that's lead to a time when America has forgotten its place in the world. In *The Death of the Grown-Up* Diana West serves up a provocative critique of our dangerously indecisive world leavened with humor and shot through with insight.
