*Healing and Preventing Autism* Jenny McCarthy, Jerry Kartzinell, 2009-03-31 The must-have New York Times bestseller that tells you what to do now for a child with autism, ADD, ADHD, OCD, and other disorders For any child with challenges, early intervention is essential and parents need a plan that they can implement right away. Jenny McCarthy, one of the country's leading autism advocates, has teamed up with top autism specialist Jerry Kartzinell, M.D., to offer a prescriptive guide to the healing therapies and treatments that have turned the lives of so many children around. While autism cases have grown a whopping 6000 percent since the 1970s, the medical community is still waking up to the epidemic and parents need tools to begin healing their children and educating their doctors, instead of waiting six months to a year to get an appointment with a specialist. In this book, parents will learn about the following: •The biomedical diet and supplement protocol •Where to find alternative therapies and how to implement them •A list of tests any doctor can perform •Studies to show your doctor that will help make the case that they need to support your efforts •Advice for preventing autism during pregnancy and the early years by looking at family history of allergies, depression, and autoimmune disorders as well as Mom's chemical exposure Whether your child has autism, ADD, ADHD, OCD, or an autism spectrum disorder, *Healing and Preventing Autism* is the authoritative reference book with the tools to heal your child.

**Pharmaceutical Strategies to Prevent, Treat, and Recover: Advances and Challenges in Ischemic Stroke and Hemorrhagic Stroke** Yuwen Li, Gang-Min Hur, Tiejun Zhang, 2024-03-01 Stroke is one of the leading causes of death and disability worldwide. Among them, ischemic stroke is attributed to an abrupt blockage of blood flow to brain, while hemorrhagic stroke is caused by bleeding into brain. The principal aim of stroke therapy is to decrease mortality and reduce persistent neurologic injury and long-term disability. It also targets to prevent complications and recurrence after stroke as well as minimize the brain function loss caused by the cerebral damage. Fortunately, many strokes could be prevented through healthy lifestyle changes and controlling stroke risk factors, such as cigarette or tobacco smoking, high blood pressure, diabetes, and heart disease. Carotid endarterectomy and stenting of the cervical and intracranial vessels may help reduce recurrent stroke in some cases. Advanced treatments and rehabilitation are helping many stroke patients return to society and their families.

*The Resurgence of the West* Richard Rosecrance, 2013-06-18 DIVAfter two centuries of ascent, the United States finds itself in economic decline. Some advise America to cure its woes alone. But the road to isolation leads inevitably to the end of U.S. leadership in the international system, warns Richard Rosecrance in this bold and novel book. Instead, Rosecrance calls for the United States to join forces with the European Union and create a transatlantic economic union. Such a U.S.-Europe community would unblock arteries of trade and investment, rejuvenate the West, and enable Western countries to deal with East Asian challenges from a position of unity and economic strength. Exploring the possibilities for such a merger, the author writes, "The European Union offers a means of creating larger units without recourse to force. A connection between Europe and North America could eventually grow into an agglomeration of states, drawing China and the East into a new network of countries. In this way East will eventually join the West." Through this great merger the author offers a positive vision of the future in which members of a tightly knit Western alliance regain economic health and attract Eastern nations to join a new and worldwide international order./div
