Tradition and Innovation Maria do Rosário Monteiro,Mário S. Ming Kong,2021-06-29 The texts presented in Proportion Harmonies and Identities (PHI) Tradition and Innovation were compiled with the intent to establish a multidisciplinary platform for the presentation, interaction, and dissemination of researches. They also aim to foster the awareness and discussion on the topic of Tradition and Innovation, focusing on different visions relevant to Architecture, Arts and Humanities, Design and Social Sciences, and its importance and benefits for the sense of identity, both individual and communal. The idea of Tradition and Innovation has been a significant motor for development since the Western Early Modern Age. Its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists, who seek strategies and policies to accelerate the development process in different contexts.

The Return of the Serpents of Wisdom Mark Amaru Pinkham,2011-03-10 According to ancient records, the patriarchs and founders of the early civilizations in Egypt, India, China, Peru, Mesopotamia, Britain, and the Americas were colonized by the Serpents of Wisdom-spiritual masters associated with the serpent-who arrived in these lands after abandoning their beloved homelands and crossing great seas. While bearing names denoting snake or dragon (such as Naga, Lung, Djedhi, Amaru, Quetzalcoatl, Adder, etc.), these Serpents of Wisdom oversaw the construction of magnificent civilizations within which they and their descendants served as the priest kings and as the enlightened heads of mystery school traditions. The Return of the Serpents of Wisdom recounts the history of these “Serpents”-where they came from, why they came, the secret wisdom they disseminated, and why they are returning now.

Ancient Jewish Sciences and the History of Knowledge in Second Temple Literature Jonathan Ben-Dov,Seth L. Sanders,2014 This work explores the tension between the hegemony of central scientific traditions and local scientific enterprises, showing the relevance of ancient data to contemporary postcolonial historiography of science.

The Greco-Egyptian Magical Formularies Christopher Faraone,Sofia Torallas Tovar,2022-11-14 In Greco-Roman Egypt, recipes for magical undertaking, called magical formularies, commonly existed for love potions, curses, attempts to best business rivals—many of the same challenges that modern people might face. In The Greco-Egyptian Magical Formularies: Libraries, Books, and Individual Recipes, volume editors Christopher Faraone and Sofia Torallas Tovar present a series of essays by scholars involved in a multiyear project to reedit and translate the various magical handbooks that were inscribed in the Roman period in the Greek or Egyptian languages. For the first time, the material remains of these papyrus rolls and codices are closely examined, revealing important information about the production of books in Egypt, the scribal culture in which they were produced, and the traffic in single recipes copied from them. Especially important for historians of the book and the Christian Bible are new insights in the historical shift from roll to codex, complicated methods of inscribing the bilingual papyri (in which the Greek script is written left to right and the demotic script right to left), and the new realization that several of the longest extant handbooks are clearly compilations of two or more shorter handbooks, which may have come from different places. The essays also reexamine and rethink the idea that these handbooks came from the personal libraries of practicing magicians or temple scriptoria, in one case going so far as to suggest that two of the handbooks had literary pretensions of a sort and were designed to be read for pleasure rather than for quotidian use in making magical recipes.

The Alternative Tradition James Thrower,2011-05-02 The series Religion and Society (RS) contributes to the exploration of religions as social systems – both in Western and non-Western societies; in particular, it examines religions in their differentiation from, and intersection with, other cultural systems, such as art, economy, law and politics. Due attention is given to paradigmatic case or comparative studies that exhibit a clear theoretical orientation with the empirical and historical data of religion and such aspects of religion as ritual, the religious imagination, constructions of tradition, iconography, or media. In addition, the formation of religious communities, their construction of identity, and their relation to society and the wider public are key issues of this series.

Unified Field Mechanics: Natural Science Beyond The Veil Of Spacetime - Proceedings Of The Ix Symposium Honoring Noted French Mathematical Physicist Jean-pierre Vigier Amoroso Richard L,Kauffman Louis H,Rowlands Peter,2015-09-08 Unified Field Mechanics, the topic of the 9th international symposium honoring noted French mathematical physicist Jean-Pierre Vigier cannot be considered highly speculative as a myopic critic might surmise. The 8th Vigier Symposium proceedings 'The Physics of Reality' should in fact be touted as a companion volume because of its dramatic theoretical Field Mechanics in additional dimensionality. Many still consider the Planck-scale zero-point field stochastic quantum foam as the 'basement of reality'. This could only be considered true under the limitations of the Copenhagen interpretation of quantum theory. As we enter the next regime of Unified Field Mechanics we now know that the energy-dependent Einstein-Minkowski manifold called spacetime has a finite radius beyond which a large-scale multiverse beckons. So far a battery of 14 experiments has been designed to falsify the model. When the 1st is successfully performed, a revolution in Natural Science will occur! This volume strengthens and expands the theoretical and experimental basis for that immanent new age.

Wandering Myths Lucy Gaynor Audley-Miller,Beate Dignas,2018-10-08 In spite of the growing amount of important new work being carried out on uses of myth in particular ancient contexts, their appeal and reception beyond the framework of one culture have rarely been the primary object of enquiry in contemporary debate. Highlighting the fact that ancient societies were linked by their shared use of mythological narratives, Wandering Myths aims to advance our understanding of the mechanisms by which such tales were disseminated cross-culturally and to investigate how they gained local resonances. In order to assess both wider geographic circulations and to explore specific local features and interpretations, a regional approach is adopted, with a particular focus on Anatolia, the Near East and Italy. Contributions are drawn from a range of disciplines, and cross a wide chronological span, but all are interlinked by their engagement with questions focusing on the factors that guided the processes of reception and steered the facets of local interpretation. The Preface and Epilogue evaluate the material in a synoptic way and frame

the challenging questions and views expressed in the Introduction.

The Secret Doctrine H. P. Blavatsky,2011-05-19 A three-volume 'synthesis of science, religion, and philosophy' by one of the nineteenth century's most controversial spiritualists.

Biodiversity Islands: Strategies for Conservation in Human-Dominated Environments Florencia Montagnini,2022-04-22 This book is intended to provide an overview for the identification and establishment of biodiversity islands. It presents examples and case studies where the biodiversity islands approach is being used in a variety of locations and contexts worldwide. It will contribute to design parameters on appropriate sizing and spatial distribution of biodiversity islands in order to be effective in conservation and regeneration across the landscape, using integrated landscape management approaches. This book is essential given the current worldwide trend of habitat destruction and the need to preserve biodiversity and its values. The chapters are organized in five sections. The first section provides the introduction. Section 2,3 and 4 discuss the challenges and alternatives of establishment and management, case studies across the globe, safeguarding of the environmental, economic, and social benefits, and the final section offers a conclusion. The contributing authors present views from the academic, the practitioner and the policymaker perspectives, offering alternatives and suggestions for promoting strategies that support biodiversity conservation through intentionally designed frameworks for sustainable forest landscapes. Readers will discover suggestions and concrete examples that can be used by a variety of stakeholders in various settings throughout the world. This book is useful to researchers, farmers, foresters, landowners, land managers, city planners, and policy makers alike.

A Companion to Greek Mythology Ken Dowden,Niall Livingstone,2011-03-21 A Companion to Greek Mythology presents a series of essays that explore the phenomenon of Greek myth from its origins in shared Indo-European story patterns and the Greeks' contacts with their Eastern Mediterranean neighbours through its development as a shared language and thought-system for the Greco-Roman world. Features essays from a prestigious international team of literary experts Includes coverage of Greek myth's intersection with history, philosophy and religion Introduces readers to topics in mythology that are often inaccessible to non-specialists Addresses the Hellenistic and Roman periods as well as Archaic and Classical Greece

Global Warming Impacts Stefano Casalegno,2011-10-05 This book addresses the theme of the impacts of global warming on different specific fields, ranging from the regional and global economy, to agriculture, human health, urban areas, land vegetation, marine areas and mangroves. Despite the volume of scientific work that has been undertaken in relation to each of these issues, the study of the impacts of global warming upon them is a relatively recent and unexplored topic. The chapters of this book offer a broad overview of potential applications of global warming science. As this science continues to evolve, confirm and reject study hypotheses, it is hoped that this book will stimulate further developments in relation to the impacts of changes in the global climate.

Mesopotamia in the Ancient World Robert Rollinger,Erik van Dongen,2015-04-07 The Melammu Project, founded in 1998, organized five successive conferences and a sixth in 2008. Melammu Symposia 7 now represents a new dawn for the project publishing the contributions of the meeting in Obergurgl in November 2013. This time it will not be an isolated event: Further conferences have already taken place and been planned (Kiel 2014, Helsinki and Tartu 2015, Kassel 2016, and Beirut 2017), the project board has been renewed, reinvigorated and rejuvenated, and plans are underway for a thorough reworking and updating of the project database. Its focus (now slightly reworded to be somewhat wider) is to investigate the continuity, transformation and diffusion of Mesopotamian and Ancient Near Eastern culture from the third millennium BCE through the ancient world until Islamic times (quoted from the Melammu Project website). Of course, Mesopotamia was not the source of all culture; but it was an important area in ancient history, that without doubt deserves such a project, dedicated to the study of its cultural impact and heritage. This volume assembles 42 contributions devoted to the topics Prayers and Incantations, Foreign Reception of Mesopotamian Objects, The Use of Literary Figures of Speech, Mesopotamia and the World, The World of Politics, Iran and Early Islam, and Representations of Power.

Ecology, Evolution and Behaviour of Wild Cattle Mario Melletti,James Burton,2014-10-30 A beautifully illustrated reference work on the biology, ecology, conservation status and management of all thirteen species of wild cattle and buffalo. This book will be a valuable resource for students, researchers, and professionals in animal behaviour, behavioural ecology, evolutionary biology and conservation biology.

Not Scattered or Confused Mark McEntire,2019-10-01 The Hebrew Bible displays a complicated attitude toward cities. Much of the story tells of a rural, agrarian society, yet those stories were written by people living in urban environments. Moreover, cities frequently appear in a negative light; the Hebrew slaves in the book of Exodus were forced to build cities, and the book of Samuel's critique of monarchy assumes an urban setting that supports that monarchy. At the same, time Ezra-Nehemiah makes restoration of Jerusalem and its wall a holy priority, and Genesis 1–11 (and subsequent references to the primeval narrative) show a much more layered view of the dangers and opportunities of the urban context. As the world's population continues to move into cities and we debate the impact on human life and the natural environment, it becomes increasingly important to know how the biblical writers understood the ways in which urban life enhances and disrupts human thriving. In this book, McEntire offers a comprehensive and hopeful understanding of the Bible and the city.

Drug Policy Alison Ritter,2021-11-29 Taking a multidisciplinary perspective (including public health, sociology, criminology, and political science amongst others) and using examples from across the globe, this book provides a detailed understanding of the complex and highly contested nature of drug policy, drug policy making, and the theoretical perspectives that inform the study of drug policy. It draws on four different theoretical perspectives: evidence-informed policy, policy process theories, democratic theory, and post-structural policy analysis. The use and trade in illegal drugs is a global phenomenon. It is viewed by governments as a significant social, legal, and health problem that shows no signs of abating. The key questions explored throughout this book are what governments and other bodies of social regulation should do about illicit drugs, including drug policies aimed at improving health and reducing harm, drug laws and regulation, and the role of research and values in policy development. Seeing policy formation as dynamic iterative interactions between actors, ideas, institutions, and networks of policy advocates, the book explores how policy problems are constructed and policy solutions selected, and how these processes intersect with research evidence and values. This then animates the call to democratise drug policy and bring about inclusive meaningful participation in policy development in order to provide the opportunity for better, more effective, and value-aligned drug policies. This book will be of great interest to students and scholars of drug policy from a number of disciplines, including public health, sociology, criminology, and political science.
