Practical Common Lisp Peter Seibel,2006-11-01 * Treats LISP as a language for commercial applications, not a language for academic AI concerns. This could be considered to be a secondary text for the Lisp course that most schools teach . This would appeal to students who sat through a LISP course in college without quite getting it - so a nostalgia approach, as in wow-lisp can be practical... * Discusses the Lisp programming model and environment. Contains an introduction to the language and gives a thorough overview of all of Common Lisp's main features. * Designed for experienced programmers no matter what languages they may be coming from and written for a modern audience—programmers who are familiar with languages like Java, Python, and Perl. * Includes several examples of working code that actually does something useful like Web programming and database access.

10 PRINT CHR\$(205.5+RND(1)); : GOTO 10 Nick Montfort,Patsy Baudoin,John Bell,Ian Bogost,Jeremy Douglass,2012-11-23 A single line of code offers a way to understand the cultural context of computing. This book takes a single line of code—the extremely concise BASIC program for the Commodore 64 inscribed in the title—and uses it as a lens through which to consider the phenomenon of creative computing and the way computer programs exist in culture. The authors of this collaboratively written book treat code not as merely functional but as a text—in the case of 10 PRINT, a text that appeared in many different printed sources—that yields a story about its making,

its purpose, its assumptions, and more. They consider randomness and regularity in computing and art, the maze in culture, the popular BASIC programming language, and the highly influential Commodore 64 computer.

The Sound of Modern Polish Poetry Aleksandra Kremer, 2021-12-07 An illuminating new study of modern Polish verse in performance, offering a major reassessment of the roles of poets and poetry in twentieth-century Polish culture. What's in a voice? Why record oneself reading a poem that also exists on paper? In recent decades, scholars have sought to answer these questions, giving due credit to the art of poetry performance in the anglophone world. Now Aleksandra Kremer trains a sharp ear on modern Polish poetry, assessing the rising importance of authorial sound recordings during the tumultuous twentieth century in Eastern Europe. Kremer traces the adoption by key Polish poets of performance practices intimately tied to new media. In Polish hands, tape recording became something different from what it had been in the West, shaped by its distinctive origins behind the Iron Curtain. *The Sound of Modern Polish Poetry* reconstructs the historical conditions, audio technologies, and personal motivations that informed poetic performances by such luminaries as Czesław Miłosz, Wisława Szymborska, Aleksander Wat, Zbigniew Herbert, Miron Białoszewski, Anna Swir, and Tadeusz Różewicz. Through performances both public and private, prepared and improvised, professional and amateur, these poets tested the possibilities of the physical voice and introduced new poetic practices, reading styles, and genres to the Polish literary scene. Recording became, for these artists, a means of announcing their ambiguous place between worlds. Kremer's is a work of criticism as well as recovery, deploying speech-analysis software to shed light on forgotten audio experiments—from poetic “sound postcards,” to unusual home performances, to the final testaments of writer-performers. Collectively, their voices reveal new aesthetics of poetry reading and novel concepts of the poetic self.
