Cybersecurity, Privacy and Data Protection in EU Law Maria Grazia Porcedda,2023-03-23 Is it possible to achieve cybersecurity while safeguarding the fundamental rights to privacy and data protection? Addressing this question is crucial for contemporary societies, where network and information technologies have taken centre stage in all areas of communal life. This timely book answers the question with a comprehensive approach that

combines legal, policy and technological perspectives to capture the essence of the relationship between cybersecurity, privacy and data protection in EU law. The book explores the values, interconnections and tensions inherent to cybersecurity, privacy and data protection within the EU constitutional architecture and its digital agendas. The work's novel analysis looks at the interplay between digital policies, instruments including the GDPR, NIS Directive, cybercrime legislation, e-evidence and cyber-diplomacy measures, and technology as a regulatory object and implementing tool. This original approach, which factors in the connections between engineering principles and the layered configuration of fundamental rights, outlines all possible combinations of the relationship between cybersecurity, privacy and data protection in EU law, from clash to complete reconciliation. An essential read for scholars, legal practitioners and policymakers alike, the book demonstrates that reconciliation between cybersecurity, privacy and data protection relies on explicit and brave political choices that require an active engagement with technology, so as to preserve human flourishing, autonomy and democracy.
