World Drug Report 2006 United Nations Office on Drugs and Crime,2006-10-06 Some 200 million people, or 5 percent of the global population age 15-64, have used illicit drugs at least once in the last 12 months.

Among this population are people from almost every country on earth. More people are involved in the production and trafficking of illicit drugs and still more are touched by the devastating social and economic costs of this problem. Partially a consequence of its pervasiveness and partially a consequence of the illicit and hidden nature of the problem, reliable analysis and statistics on the production, trafficking and use of illicit drugs are rare. The World Drug Report 2006 endeavours to fill this gap. It provides one of the most comprehensive overviews of illicit drug trends at the international level. In addition, it presents a special thematic chapter on cannabis, by far the most widely produced, trafficked and used drug in the world. The analysis of trends, some going back 10 years or more, is presented in Volume 1. Detailed statistics are presented in Volume 2. Taken together, these volumes provide the most up-to-date view of today's illicit drug situation.

Informe mundial sobre las drogas 2005 United Nations Office on Drugs and Crime,2006-03-24 El Informe Mundial sobre las Drogas, 2005, brinda una de las sinopsis más completas de las tendencias de las drogas ilícitas en el plano internacional. Además, este año presenta la labor de la UNUDD en dos nuevos campos de investigación. Los dos tienden a obtener y proporcionar instrumentos con los cuales enriquecer nuestra comprensión de una situación de inmensa complejidad: una estimación del valor financiero del mercado mundial de drogas, y las medidas preliminares con miras a la confección de un índice de drogas ilícitas. El análisis de las tendencias, algunas de las cuales se iniciaron hace una decena de años o más, se presenta en el Volumen 1. En el Volumen 2 se ofrecen estadísticas detalladas. Juntos, esos volúmenes brindan al lector el panorama más reciente de la situación de las drogas ilícitas en nuestros días.

Balanced Phono-Amps Burkhard Vogel,2019-03-28 This extensively reworked 2nd edition of the book includes ten new chapters. It also features an updated discussion of simulation software tools, covering topics such as simulating complex and / or expensive amplifier structures with the free LTspice software by developing a broad range of additional simulation models, especially those for triodes and transformers. The book adopts the structure used in The Sound of Silence books, with the first part, Basics - Calculations and Simulations, providing deep simulation-triggered insights into the gain and noise mechanisms of differential amplifiers, BJTs, resistors, and triodes. The second part then discusses the RIAA Phono-Amp Engine II, describing all the necessary design, simulation, calculation, construction and measurement processes for this multi-functional MC amplifier. The third part, Knowledge Transfer, presents new ideas on draft designs of the linear low-noise MC input stages (also an extremely low-noise one) and a range of practical measurement tools. Additionally, it includes a chapter on MM amplifiers and their noise production, and offers some surprising solutions. The brand new and extensive chapter on all the simulation models developed and used in the book rounds-out the voyage through the jungle of compromises, allowing best-in-class balanced MC phono-amplifiers to be produced. Lastly, the book also features an extensive index, and free downloads of all Mathcad worksheets are available on Springer's Extra Materials website (extra.springer.com).
