Raindancing Glenn Granger,2013-03-01 This groundbreaking book launches a passionate crusade for 'rational marketing' – based on facts and data, rather than guesswork, traditions and raindancing. Marketing without measurement is myth. "Until now," says Glenn Granger, "marketers have been flying blind. Even the big brands that can afford to pay consultants for data modelling and forecasting are only getting snapshots, retrospectively, once or twice a year. And media costs are high, so the numbers can be huge. Nowhere outside marketing are millions invested – or gambled – with so little analysis and scrutiny." How different would business be if powerful modelling tools that were as easy to use as spreadsheets or word processors could be there on every marketer's desktop? What if these tools could help with everyday decisions, like whether to take up a media owner's last-minute 3-for-2 offer, and whether a price cut would be a great move or commercial suicide? Bringing rational accountability to marketing is not about deskilling. It is about giving the marketer a new power to fine tune campaign spending, defend budgets and predict the impact of specific initiatives. Glenn Granger draws on his own high-level consulting and business experience to make the case for this urgently-needed marketing revolution. His upbeat, non-technical style makes Raindancing startling, vivid and vital reading for chief executives, finance directors, CMOs and everyone who works in marketing.

Using an elegant concept of extended tools, the book presents a method for the constructive building of 'hybrid' applications. The book includes such application areas as direct marketing, banking insurance and executive information systems. The methods used adopt the latest object-oriented and client-server techniques. Rapid Application Generation of Business and Finance Software is an important book for computer scientists working on rapid application development. Management Economics: An Accelerated Approach William G. Forgang,Karl W. Einolf,2015-03-26 Thoroughly classroom tested, this text is designed specifically for one-semester accelerated and online courses at the upper undergraduate and MBA levels. It is based on the theme that business and personal decisions are made within both micro- and macro-economic environments. By understanding the environments and their effects on outcomes of decisions, better choices can be made. The text also differs from others in the area because it is less theoretical, it provides a broader perspective for management problem solving, and it bridges economics with other business disciplines. Each chapter includes a management decision-oriented case study that applies tools of economic analysis. An online instructors manual is available to professors who adopt the text.

Intangible Management Ken Standfield,2002-07-09 Intention, context, emotional intelligence, escalation and sustainability are words that are generally absent from the operational management techniques of managers worldwide. They form, however, the basis of skills required to manage organizations in today's knowledge-based economy. The authors investigate the ways that intangible values can be identified, measured, and managed. They explore the fundamental differences between a manufacturing economy and one which creates value through knowledge, relationships and time. Using case studies, theory, applications and accounting tools, the authors aim to demonstrate how a new value framework can protect investors while giving companies the ability to generate long-term growth.

Modern Principles of Economics Tyler Cowen,Alex Tabarrok,2009-10-09 From the authors:See the Invisible Hand. Understand Your World. That's the tagline of Modern Principles and our teaching philosophy. Nobel laureate Vernon Smith put it this way: At the heart of economics is a scientific mystery... a scientific mystery as deep, fundamental and inspiring as that of the expanding universe or the forces that bind matter... How is order produced from freedom of choice? We want students to be inspired by this mystery and by how economists have begun to solve it. Thus, we show how markets interconnect and respond in surprising ways to changes in resources and preferences. Consider, for example, how markets respond to a reduction in the supply of oil. Of course, the price of oil increases giving consumers an incentive to use less and suppliers an incentive to discover more. But an increase in the price of oil also encourages Brazilian sugar cane farmers to devote more of their production to ethanol and less to sugar thereby driving up the price of sugar. An increase in the price of sugar means a reduction in the quantity of candy demanded. So one way the market responds to a reduction in the supply of oil is by encouraging consumers to eat less candy! In analyses like this, we teach students to see the invisible hand and in so doing to understand their world. Similarly, we offer a unique and simple proof of the amazing invisible hand theorem that without any central direction competitive markets allocate production across firms in a way that minimizes aggregate costs! To understand their world students must understand when self-interest promotes the social interest and when it does not. Thus, Modern Principles has in-depth analyses of externalities, public goods, and ethical issues with market incomes and trade. Moreover, we always discuss economic theory in the context of real world problems such as the decline of the ocean fisheries, climate change, and the shortage of human organs for transplant.
