Popular Science , 1921-01 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

*Scientific Democracy Invented* Ronald Pereira, 2004 CONCERNING THE TITLE: Scientific Democracy Invented The title Scientific Democracy Invented needs an explanation. Since the 16th century, Mathematicians and Sociologists have anticipated a time when politicians would solve human problems the way Scientists solve theirs, rather than through fraud, corruption, violence and warfare. There is an analogy between the Human Body and Scientific Democracy Scientific Democracy has an analogy with the working of the Human Body. This is shown in Part 15, Sections A, B, and C. Biological theory led to the Organic Theory of the State. Both Plato and Aristotle argued that the State was an organism. They argued that the cell is to the human body as the individual is to the State. Therefore the rights of the State precede the rights of individuals. Others who believed in this theory were the philosophers Claude Saint Simon, Herbert Spencer, and the Communists. Sociologists have anticipated a time when politics would become a Science, and Laws would be indisputable principles, not the Whims of elected Rulers.

*Key Account Plans* Lynette Ryals, Malcolm McDonald, 2010-05-14 To manage key accounts profitably you need strategic planning that works. This book is the definitive guide to achieving this based on the unmatched practical and research experience of Ryals and McDonald. Key Account Management is proven to deliver substantial benefits to the bottom line. Best practice companies know that real results from managing powerful customers are not achieved through short-term cost cutting. Instead, as the best companies understand, it depends on fostering carefully developed and profitably managed relationships with an equally carefully selected group of key accounts. This is a genuinely strategic activity that goes well beyond sales management and the simplistic use of budgets to generate targets. It is about the behaviours and practices that make predictable, profitable and sustainable Key Account Management possible. To achieve this the book is constructed to deliver- \* Clear descriptions of the various techniques and the reason for their importance \* A hugely powerful step by step approach to using the key techniques to build strategic skills \* Templates for building real plans \* Cases, examples and vignettes to show best real world practice Based on wide application in the business world, and the world class research at Cranfield Management School this book will be an essential introduction to the principles and reality of Strategic Key Account Planning. For senior managers, key account managers at all levels as well as those on executive and MBA courses it will be an essential guide and text.

Work, Management, and the Business of Living A. Moneim El-Meligi, 2012 In the modern economic paradigm characterized by a multitude of business management theories aimed at maximizing profits, there is a danger of formalizing management techniques to the extent of dehumanizing individuals or reducing them to humanoids. This book deals with familiar concepts in the management literature, but always in light of the model of the human person. It sheds light on organizing processes in individuals, small groups, and organizations and other large social systems by covering empirical research on three central topics — modes of influence, intrapersonal communication, and change — through which the social context is constantly shifting. Concepts from other fields are also

introduced by the author into the field of management, such as philosophy, biology, sociology, semantics, and mythology, to name a few. As a protest against behaviorism, materialism, objectivism, determinism, elitism, and many other “-ism's” that degrade the human person, this book provides food for thought to students of management and organizational behavior, psychologists and sociologists, as well as political scientists and leaders of business and nonbusiness institutions.

**Rethinking Foreign Investment for Sustainable Development** Kevin P.

Gallagher, Daniel Chudnovsky, 2010 Consisting of country case studies and comparative analyses from Latin American and US based political economists, this volume examines the recent history of foreign investment for development in Latin America in the context of the current backlash against 'Washington Consensus' policies. These essays form the broad conclusion that foreign direct investment fell far short of generating the necessary linkages for sustainable economic development.

**50 Things Liberals Love to Hate** Mike Gallagher, 2012-08-28 America, how does the liberal hate thee? Let us count the ways . . . It's hard work being a liberal these days. Not only do a mere 20 percent of Americans identify themselves as liberal, but one could go broke supporting a skinny double-decaf Starbucks habit. On top of that, when you hate things most Americans love, it's tiring to have to endlessly correct/educate/fix/enlighten the poor dullards out there who just want to enjoy their lives. Which, taken as a whole, makes the average liberal lonely, short on cash, and mad as hell! So, in the spirit of the compassion they themselves espouse, 50 Things Liberals Love to Hate is truth spoken with love, an invitation to the disenfranchised: it's not too late, liberals, to join the fun! C'mon, crack open a Bud and throw another T-bone on the grill. But kindly check your disdain at the door when it comes to: WALMART: How about a handmade, locally sourced flat-screen television instead? STEAKHOUSES: There's no steamed tofu on this menu. McDONALD'S: The stranger in the playground handing out candy to children. FLAG PINS: It's okay to love America, but not enough to wear it on your lapel. FOOTBALL: War with cleats and pads. THE V-8 ENGINE: There's just something plain wrong about all that power and freedom under the control of one person. SUCCESS: When you make more money than the rest of us, it hurts our feelings. THE FOUNDING FATHERS: A bunch of old white guys who are making it nearly impossible for modern government to pick our doctors, teach our children, correct our diets, and save our money. . . . and 42 other things that have liberals packing some serious hate. Mike Gallagher—America's sixth-ranked radio talk show host and Fox News contributor—skewers liberal lunacy with cutting irony and scathing wit. Here are 50 warning signs of a liberal mind implosion, all darn good reasons to lock the doors, crank up the A/C, turn on the game, and let the countdown begin. . . .

**Goh Keng Swee on China** Keng Swee Goh, 2012-06-30 Touted as one of the main engineers of Singapore's economic growth, Dr Goh's collection of writings and speeches seek to shed light on the various challenges that China faced in the early 90s. His arguments and analyses were presented clearly and concisely while being firmly established upon economic principles. Covering a broad range of topics from the growth of industries and enterprises to financial reforms and the difficulties of doing business in China, this collection provides a comprehensive view of problems the Chinese government faced while providing possible solutions. Despite being written two decades ago, the issues raised in these papers and speeches are uncannily relevant to the issues that the current Chinese government faces today.

*Christian Science* Mark Twain,2011-05-01 Though Mark Twain is best remembered as perhaps the quintessential American humor writer, he was also a keen observer and critic of cultural and social trends. In this vein, he undertook a book-length discussion and analysis of Christian Science and New Thought, both of which enjoyed immense popularity in the nineteenth and early twentieth centuries in the United States. The controversial text was originally rejected by Twain's publisher, a gesture that the author saw as confirming the influence and power of the religious movement.

**The World of Musicals [2 volumes]** Mark A. Robinson,2014-04-17 This wide-ranging, two-volume encyclopedia of musicals old and new will captivate young fans—and prove invaluable to those contemplating staging a musical production. Written with high school students in mind, *The World of Musicals: An Encyclopedia of Stage, Screen, and Song* encompasses not only Broadway and film musicals, but also made-for-television musicals, a genre that has been largely ignored. The two volumes cover significant musicals in easily accessible entries that offer both useful information and fun facts. Each entry lists the work's writers, composers, directors, choreographers, and cast, and includes a song list, a synopsis, and descriptions of the original production and important revivals or remakes. Biographical entries share the stories of some of the brightest and most celebrated talents in the business. The encyclopedia will undoubtedly ignite and feed student interest in musical theatre. At the same time, it will prove a wonderful resource for teachers or community theatre directors charged with selecting and producing shows. In fact, anyone interested in theatre, film, television, or music will be fascinated by the work's tantalizing bits of historical and theatre trivia.

**Teach the Best and Stomp the Rest** William C. Knaak,Jean T. Knaak,2013-05 This book is an experienced analysis of the failures of American schools to provide learning for a majority of its students including those known as the forgotten half-and the reasons for those failures. It explores who is being educated, and what is known about learning in terms of prerequisites, brain differences and cultures. The book describes the failed initiatives of more money, class size reduction, school choice, magnet schools, vouchers, and merit pay for teachers. Charter schools don't cut it for a majority of our children. No Child Left Behind (NCLB) and Race To the Top (RTT) are expensive, unmitigated disasters. The American schools have mostly missed the promise of change and technology and are now engaged in massive fallacious testing, resulting in little benefit to the nation and significant harm to the children. Outrageously priced Higher Education has little to offer to improve the national education malaise, and lingers on in its dismal, disorderly state. However, American schools in their INNOCENCE are a product of and restricted by their governmental, economic, civic, and ecologic environment. As described in the closure of the book, *The Future*, the major structural changes needed to re-create our national learning system have overrun national planning and thinking capacity. Fortunately, there are promising patterns of change in progress.

**The Almanac of American Education 2011** Deirdre A. Gaquin,Sarah E. Baltic,2011-02-25 The *Almanac of American Education* helps users understand and compare the quality of education at the national, state, and county levels. Compiled from official U.S. government and reliable private sources, the book contains historical and current data, insightful analysis, and useful graphs that provide compelling insights into the state of education in America.

**Consumer Government** Douglas W. Ayres, 2012-03 THE MUNICIPAL BUSINESS SYSTEM VIA THE ART OF FULL DISCLOSURE The above titled Book is intended to change the way local governments do NOT do business. It is predicated on and dedicated to an achieved fact: There is NO compelling reason why cities, counties and government special districts cannot be run better than private businesses are alleged to operate. Local Government can be superior! Further, there is no reason for municipal services to be gutted as is being done and advocated, and/or outsourced for ideological and unknown undocumented cost-saving reasons. It is time local government defended itself against massive misinformation and lack of supporting data. Cities can, and should be run like a business. This Book details the adaptation of corporate line-of-business profit & loss corporate accounting to municipal services. The MUNICIPAL BUSINESS SYSTEM, explained in detail in this Book, has provided billions of new revenues to 250+ governments. Better yet, those monies were retrieved from those improperly benefitting from tax-supported direct benefit services. Previously, influential persons and organizations were subsidized by taxes paid by everyone. By providing a highly detailed inventory of services, then full costing information for each to the public and their elected representatives, huge amounts of tax monies were repatriated. Those monies were diverted from those who should pay fees, and returned to pay for services provided to the community at large. Thus Police, Fire, EMS, parks, recreation, library, street maintenance, and agreed-to social services were resuscitated. Through the MUNICIPAL BUSINESS SYSTEM process the tax and fee-paying public is provided detailed full disclosure of revenue, cost-of-service, and quality information for the hundreds of local services provided by most cities and counties. And choice if, when, how, and quantity provided. Thus re-inventing the manner in which taxes are used and service levels defined. At last, there is a SYSTEM to utilize computerization capabilities fully to provide a rationale and reasons for not cutting municipal budgets or privatizing local services, and thus destroying local government, its protections and services. Importantly, taxes paid by all can be utilized solely to finance services benefitting ALL, not subsidizing just the few to retain special local service benefits solely for personal, corporate, or business purposes, at the expense of the community at large. The Author utilized his decades of experience and knowledge acquired in-the-trenches to develop, refine, and apply the MUNICIPAL BUSINESS SYSTEM. He now shares with others what was labored over for 40 years of development by a corps of dedicated municipal employees, and ultimately with a brilliant group of financial analysts and CPAs, who designed and implemented the detailed highly sophisticated but simply computerized MUNICIPAL BUSINESS SYSTEM. Then Ayres taught the how at three major universities for 15 years. The Book provides sufficient textual overview, explanation, specific illustrations, examples, and details to know and control the cost of all services throughout the entirety of local - and maybe even state - governments. Douglas W. Ayres, MPA, LLD spent eight years with the University of Chicago's National Governmental Center (PAS) conducting scores of consulting engagements around the U.S., Canada and in Venezuela. He served as Town Clerk/Assistant Town Manager of Salem, Virginia; City Manager of Melbourne, Florida (Cape Canaveral); City Treasurer/Assistant City Manager, then City Manager of Salem, Oregon. As City Manager of Inglewood, California he installed the computerized MUNICIPAL BUSINESS SYSTEM. As a USC Graduate School Professor h
