Reconfigurable Field Programmable Gate Arrays for Mission-Critical Applications Niccolò Battezzati, Luca Sterpone, Massimo Violante, 2010-11-09 Embedded systems applications that are either mission or safety-critical usually entail low- to mid- production volumes, require the rapid development of specific tasks, which are typically computing intensive, and are cost bounded. The adoption of re-configurable FPGAs in such application domains is constrained to the availability of suitable techniques to guarantee the dependability requirements entailed by critical applications. This book describes the challenges faced by designers when implementing a mission- or safety-critical application using re-configurable FPGAs and it details various techniques to overcome these challenges. In addition to an overview of the key concepts of re-

configurable FPGAs, it provides a theoretical description of the failure modes that can cause incorrect operation of re-configurable FPGA-based electronic systems. It also outlines analysis techniques that can be used to forecast such failures and covers the theory behind solutions to mitigate fault effects. This book also reviews current technologies available for building re-configurable FPGAs, specifically SRAM-based technology and Flash-based technology. For each technology introduced, theoretical concepts presented are applied to real cases. Design techniques and tools are presented to develop critical applications using commercial, off-the-shelf devices, such as Xilinx Virtex FPGAs, and Actel ProASIC FPGAs. Alternative techniques based on radiation hardened FPGAs, such as Xilinx SIRF and Atmel ATF280 are also presented. This publication is an invaluable reference for anyone interested in understanding the technologies of re-configurable FPGAs, as well as designers developing critical applications based on these technologies.

Qualitative Health Research Janice M

Morse, 2016-06-03 The leading figure in qualitative health research (QHR), Janice M. Morse, asserts that QHR is its own separate discipline—distinct from both traditional health research and other kinds of qualitative research—and examines the implications of this position for theory, research, and practice. She contends that the health care environments transform many of the traditional norms of qualitative research and shape a new and different kind of research tradition. Similarly, the humanizing ethos of qualitative health research has much to teach traditional researchers and practitioners in health disciplines. She explores how the discipline of QHR can play out in practice, both in the clinic and in the classroom, in North America and around the world. A challenging, thought-provoking call to rethink how to conduct qualitative research in health settings.

The International Handbook of Suicide Prevention

Rory C. O'Connor, Jane Pirkis, 2016-09-14 The International Handbook of Suicide Prevention, 2nd Edition, presents a series of readings that consider the individual and societal factors that lead to suicide, it addresses ways these factors may be mitigated, and presents the most up-to-date evidence for effective suicide prevention approaches. An updated reference that shows why effective suicide prevention can only be achieved

by understanding the many reasons why people choose to end their lives Gathers together contributions from more than 100 of the world's leading authorities on suicidal behavior—many of them new to this edition Considers suicide from epidemiological, psychological, clinical, sociological, and neurobiological perspectives, providing a holistic understanding of the subject Describes the most up-to-date, evidence-based research and practice from across the globe, and explores its implications across countries, cultures, and the lifespan

Immunisation against infectious diseases David Salisbury, Mary Ramsay, Karen Noakes, 2006-12-11 This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

Angiogenesis, Lymphangiogenesis and Clinical Implications G. Marone,F. Granata,2013-10-21

Angiogenesis, the formation of new blood vessels, is fundamental for physiological processes such as embryonic and postnatal development, wound repair, and reproductive functions. Angiogenesis plays a major role in tumor growth and in several autoimmune and allergic disorders.

Lymphangiogenesis, the formation of new lymphatic vessels, is also important for tumor growth, the formation of metastasis, and chronic inflammatory diseases. Judah Folkman, a pioneer in the study of angiogenesis, first proposed that macrophages and mast cells could be a relevant source of angiogenic factors. Since then, much effort has gone into the elucidation of the role of immune cells in the modulation of angiogenesis and lymphangiogenesis. There is now compelling evidence that several components of the innate and adaptive immune system are implicated in inflammatory and neoplastic angiogenesis and lymphangiogenesis. Articles in this volume deal with the emerging, intriguing possibility that immune cells are both a source and a target of angiogenic and lymphangiogenic factors. Therefore, cells of the immune system might play a role in inflammatory and neoplastic angiogenesis/lymphangiogenesis through the expression of several angiogenic factors and their receptors and co-receptors. The important new

findings in this volume will be of special interest to vascular biologists, basic and clinical immunologists, oncologists and to specialists in allergic and immune disorders.

Models Soraya de Chadarevian, Nick Hopwood, 2004
Now that '3-D models' are so often digital displays on flat screens, it is timely to look back at the solid models that were once the third dimension of science. This book is about wooden ships and plastic molecules, wax bodies and a perspex economy, monuments in cork and mathematics in plaster, casts of diseases, habitat dioramas, and extinct monsters rebuilt in bricks and mortar. These remarkable artefacts were fixtures of laboratories and lecture halls, studios and workshops, dockyards and museums. Considering such objects together for the first time, this interdisciplinary volume demonstrates how, in research as well as in teaching, 3-D models played major roles in making knowledge. Accessible and original chapters by leading scholars highlight the special properties of models, explore the interplay between representation in two dimensions and three, and investigate the shift to modelling with computers. The book is fascinating reading for anyone interested in the sciences, medicine, and technology, and in collections and museums.

Sierra Stories Gary Noy, 2014-08-01 The author of Gold Rush Stories shares tales of the larger-than-life characters from the history of the legendary Sierra Nevada mountain range. With its 14,000-foot granite mountains, crystalline lakes, conifer forests, and hidden valleys, the Sierra Nevada has long been the domain of dreams, attracting the

heroic and the delusional, the best of humanity and the worst. Stories abound, and characters emerge so outlandish and outrageous that they must be real. Could the human imagination have invented someone like Eliza Gilbert? Born in Limerick, Ireland, in 1818, she transformed herself into Lola Montez, born in Seville, Spain, in 1823, and brought to the Gold Country the provocative “Spider Dance”—impersonating a young woman repelling a legion of angry spiders under her petticoats. Or Otto Esche, who in 1860 imported fifteen two-humped Bactrian camels from Asia to transport goods to the mines. Or the artist Albert Bierstadt, whose paintings Mark Twain characterized as having “more the atmosphere of Kingdom-Come than of California.” Or multimillionaire George Whittell Jr., who was frequently spotted driving around Lake Tahoe in a luxurious convertible with his pet lion in the front seat. These, and scores more, spill out of the pages of this well-illustrated and lively tribute to the Sierra by a native son.

Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States
National Research Council, Institute of Medicine, Committee on Law and Justice, Board on Children, Youth, and Families, Committee on the Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States, 2013-11-12 Every day in the United States, children and adolescents are victims of commercial sexual exploitation and sex trafficking. Despite the serious and long-term consequences for victims as well as their families, communities, and society, efforts to

prevent, identify, and respond to these crimes are largely under supported, inefficient, uncoordinated, and unevaluated. Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States examines commercial sexual exploitation and sex trafficking of U.S. citizens and lawful permanent residents of the United States under age 18. According to this report, efforts to prevent, identify, and respond to these crimes require better collaborative approaches that build upon the capabilities of people and entities from a range of sectors. In addition, such efforts need to confront demand and the individuals who commit and benefit from these crimes. The report recommends increased awareness and understanding, strengthening of the law's response, strengthening of research to advance understanding and to support the development of prevention and intervention strategies, support for multi-sector and interagency collaboration, and creation of a digital information-sharing platform. A nation that is unaware of these problems or disengaged from solutions unwittingly contributes to the ongoing abuse of minors. If acted upon in a coordinated and comprehensive manner, the recommendations of Confronting Commercial Sexual Exploitation and Sex Trafficking of Minors in the United States can help advance and strengthen the nation's emerging efforts to prevent, identify, and respond to commercial sexual exploitation and sex trafficking of minors in the United States.

Surgical Education Heather Fry, Roger Kneebone, 2011-08-29 Surgical Education: Theorising an Emerging Domain delineates surgical (as opposed to medical) education as a new and emerging field of academic enquiry. This reflects profound changes in healthcare training and practice on an international basis. As such, this book introduces, examines and explores the contribution of selected concepts and theories to surgical learning and practice. The first four chapters consider core facets of surgical education, such as simulation, while subsequent chapters take a key idea, often well known in another field, and examine its relevance to surgical education. Of course, performing invasive procedures is no longer the exclusive preserve of 'traditional' surgeons. Boundaries between surgery and the interventional specialties (radiology, cardiology, intensive care) are becoming increasingly blurred, especially as technology continues to expand. Changing work patterns and explosive technological development mark this out as a major growth area. New educational approaches (e.g. the use of simulation) are emerging. And all clinical practice is a team activity, where clinicians from many specialties (medicine, nursing, allied professions) come together with shared goals. For

all the above groups, and their patients, education (teaching, training, learning and assessment) is of crucial importance. Yet the unique characteristics of surgical education have not previously been addressed from an educational perspective, nor have its possibilities as a new research domain been mapped. The domain needs to be theorised and its epistemological foundations established. There is thus both a need and a market for a definitive work in this area, aimed at surgeons, other clinicians, non-clinicians, educators, and others interested in this new domain.

Ageing and COVID-19 Maria Łuszczynska, Marvin Formosa, 2021-11-29 The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. This volume presents a range of research approaches to the exploration of ageing during a pandemic situation. One of the first collections of its kind, it offers an array of studies employing research methodologies that lend themselves to replication in similar contexts by those seeking to understand the effects of epidemics on older people. Thematically organised, it shows how to reconcile qualitative and quantitative approaches, thus rendering them complementary, bringing together studies from around the world to offer an international perspective on ageing as it relates to an unprecedented epidemiological phenomenon. As such, it will appeal to researchers in the field of gerontology, as well as sociologists of medicine

and clinicians seeking to understand the disruptive effects of the recent coronavirus outbreak on later life.

Roman Arbitration Derek Roebuck, Bruno de Loynes de Fumichon, 2004 The Roman empire encompassed a vast area, incorporating many different cultures, and yet Roman law had to resolve disputes across the board. This meticulous study of the ways and means in which Roman law asserted control over disputes between individuals, communities and even states, is based on an in-depth analysis of legal texts, including Justinian's Corpus Juris . The study examines the Roman concept of the arbitrator, a duty that any good man' could have been called upon to perform, the types of cases he might be expected to settle, the settlements and compromises, the hearings and the enforcement measures available to him.
