*Feeding Strategies to Improve Sustainability and Welfare in Animal Production* Fulvia Bovera,Giovanni Piccolo,2021-04-23 This book contains the scientific contributions published within the Animals topical collection “Feeding Strategies to Improve Sustainability and Welfare in Animal Production”. Originally a Special Issue, it has turned into a permanent collection, with its first article being published in July 2019 and more than 30 published articles a year later: evidence of the great interest from the scientific community regarding the topics addressed. The articles, which are grouped by species (poultry, ruminants, pigs, etc.) and by topic, deal with a wide range of arguments that, first of all, highlight the extraordinary complexity and diversity that exists in the animal production sector, and then, the great influence that nutrition and feeding can have in terms of optimizing the use of environmental resources and improving the welfare of farmed animals. In addition, all this is closely connected with the urgent need to safeguard the resources of the planet on which we live.

*A Neolithic and Bronze Age Landscape in Northamptonshire* Jan Harding,Frances Healy,2013-01-15 The Raunds Area Project investigated more than 20 Neolithic and Bronze Age monuments in the Nene Valley. From c 5000 BC to the early 1st millennium cal BC a succession of ritual mounds and burial mounds were built as settlement along the valley sides increased and woodland was cleared. Starting as a regular stopping-place for flint knapping and domestic tasks, first the Long Mound, and then Long Barrow, the north part of the Turf Mound and the Avenue were built in the 5th millennium BC. With the addition of the Long Enclosure, the Causewayed Ring Ditch, and the Southern Enclosure, there was a chain of five or six diverse monuments stretched along the river bank by c 3000 cal BC. Later, a timber platform, the Riverside Structure, was built and the focus of ceremonial activity shifted to the Cotton 'Henge', two concentric ditches on the occupied valley side. From c 2200 cal BC monument building accelerated and included the Segmented Ditch Circle and at least 20 round barrows, almost all containing burials, at first inhumations, then cremations down to c 1000 cal BC, by which time two overlapping systems of paddocks and droveways had been laid out. Finally, the terrace began to be settled when these had gone out of use, in the early 1st millennium cal BC. This second volume of the Raunds Area Project, published as a CD, comprises the detailed reports on the environmental archaeology, artefact studies, geophysics and chronology.
